

AS/NZS 4641:2007  
(Incorporating Amendment No. 1)

AS/NZS 4641:2007

Australian/New Zealand Standard™

**Electrical apparatus for detection of  
oxygen and other gases and vapours at  
toxic levels—General requirements and  
test methods**

## **AS/NZS 4641:2007**

This Joint Australian/New Zealand Standard was prepared by Joint Technical Committee EL-014, Equipment for Explosive Atmospheres. It was approved on behalf of the Council of Standards Australia on 14 August 2007 and on behalf of the Council of Standards New Zealand on 13 July 2007. This Standard was published on 28 September 2007.

---

The following are represented on Committee EL-014:

Association of Consulting Engineers Australia  
Auckland Regional Chamber of Commerce  
Australian Chamber of Commerce and Industry  
Australian Coal Association  
Australian Electrical and Electronic Manufacturers Association  
Australian Industry Group  
Australian Institute of Petroleum  
Australian Institute of Refrigeration Air Conditioning and Heating (Inc)  
Australian Petroleum Production and Exploration Association  
Department of Primary Industries, Mineral Resources, NSW  
Electrical Compliance Testing Association  
Electrical Regulatory Authorities Council  
Energy Networks Association  
Engineers Australia  
Environmental Risk Management Authority of New Zealand  
Institute of Electrical Inspectors  
Institute of Instrumentation, Control and Automation Australia  
Mining Electrical and Mining Mechanical Engineering Society, NSW  
Ministry of Economic Development (New Zealand)  
National Electrical and Communications Association  
New Zealand Association of Marine, Aviation and Power Engineers  
New Zealand Employers and Manufacturers Association  
Simtars (Natural Resources, Mines and Water)  
WorkCover New South Wales

### **Keeping Standards up-to-date**

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about joint Australian/New Zealand Standards can be found by visiting the Standards Web Shop at [www.standards.com.au](http://www.standards.com.au) or Standards New Zealand web site at [www.standards.co.nz](http://www.standards.co.nz) and looking up the relevant Standard in the on-line catalogue.

Alternatively, both organizations publish an annual printed Catalogue with full details of all current Standards. For more frequent listings or notification of revisions, amendments and withdrawals, Standards Australia and Standards New Zealand offer a number of update options. For information about these services, users should contact their respective national Standards organization.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Please address your comments to the Chief Executive of either Standards Australia or Standards New Zealand at the address shown on the back cover.

---

*This Standard was issued in draft form for comment as DR 07221.*

## PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee EL-014, Equipment for Explosive Atmospheres, to supersede AS/NZS 4641(Int):2005.

*This Standard incorporates Amendment No. 1 (June 2008). The changes required by the Amendment are indicated in the text by a marginal bar and amendment number against the clause, note, table, figure or part thereof affected.*

The objective of this Standard is to provide general requirements and test methods for manufacturers, testing authorities and certifying bodies concerned with electrical apparatus for the measurement of the concentration of oxygen and toxic levels of gases and vapours.

Adherence to the manufacturers requirements concerning calibration, field checks and maintenance, as spelled out in their published instruction manuals, is essential for normal use.

The tests required by this Standard are not intended to imply that any modification may be made to the manufacturers' instructions for normal use.

The terms 'normative' and 'informative' are used to define the application of the appendix to which they apply. A normative appendix is an integral part of a Standard, whereas an informative appendix is only for information and guidance.

## CONTENTS

	<i>Page</i>
<b>SECTION 1 SCOPE AND GENERAL</b>	
1.1 SCOPE .....	5
1.2 REFERENCED DOCUMENTS .....	5
1.3 DEFINITIONS .....	6
1.4 GENERAL .....	11
<b>SECTION 2 REQUIREMENTS PRIOR TO TESTING</b>	
2.1 GENERAL .....	12
2.2 UNPOWERED STORAGE .....	12
2.3 STANDARD TEST GAS .....	13
2.4 FLOW RATE FOR TEST GASES .....	14
2.5 STANDARD LABORATORY CONDITIONS .....	14
2.6 INITIAL CALIBRATION .....	14
<b>SECTION 3 PERFORMANCE TESTS FOR TOXIC GAS MONITORS</b>	
3.1 LINEARITY TEST.....	15
3.2 SHORT-TERM STABILITY.....	15
3.3 LONG-TERM STABILITY.....	15
3.4 ALARMS .....	17
3.5 TEMPERATURE VARIATION TEST.....	17
3.6 PRESSURE VARIATION.....	17
3.7 PRESSURE RECOVERY .....	18
3.8 HUMIDITY .....	18
3.9 AIR VELOCITY .....	18
3.10 FLOW RATE .....	18
3.11 ORIENTATION .....	19
3.12 VIBRATION .....	19
3.13 DROP TEST.....	20
3.14 WARM-UP TIME .....	20
3.15 TIME OF RESPONSE.....	21
3.16 RECOVERY TIME .....	21
3.17 MINIMUM TIME TO OPERATE.....	21
3.18 NON-AMBIGUITY TEST .....	21
3.19 RESIDUAL EFFECT TEST .....	22
3.20 BATTERY CAPACITY .....	22
3.21 POWER SUPPLY VARIATION TEST.....	23
3.22 POWER SUPPLY INTERRUPTIONS .....	23
3.23 ADDITION OF SAMPLING PROBE .....	23
3.24 EFFECT OF OTHER GASES/CROSS-SENSITIVITY .....	24
3.25 ELECTROMAGNETIC IMMUNITY .....	26
3.26 TIME WEIGHTED AVERAGE (TWA) FUNCTION .....	26
