

AS 1099.2.29—1990
IEC 68-2-29(1987)

Australian Standard[®]

**Basic environmental testing
procedures for electrotechnology**

**Part 2: Tests
1099.2.29: Test Eb—Bump and
guidance**

This Australian Standard was prepared by Committee ET/5, Environment Testing Procedures. It was approved on behalf of the Council of Standards Australia on 6 December 1989 and published on 4 June 1990.

The following interests are represented on Committee:

Aerospace Technologies of Australia
Confederation of Australian Industry
Department of Administrative Services—Australian Construction Services
Department of Defence
Electricity Supply Association of Australia
National Association of Testing Authorities
Society of Automotive Engineers, Australia
Telecom Australia
University of New South Wales

Review of Australian Standards. *To keep abreast of progress in industry, Australian Standards are subject to periodic review and are kept up to date by the issue of amendments or new editions as necessary. It is important therefore that Standards users ensure that they are in possession of the latest edition, and any amendments thereto.*

Full details of all Australian Standards and related publications will be found in the Standards Australia Catalogue of Publications; this information is supplemented each month by the magazine 'The Australian Standard', which subscribing members receive, and which gives details of new publications, new editions and amendments, and of withdrawn Standards.

Suggestions for improvements to Australian Standards, addressed to the head office of Standards Australia, are welcomed. Notification of any inaccuracy or ambiguity found in an Australian Standard should be made without delay in order that the matter may be investigated and appropriate action taken.
