Australian Standard<sup>®</sup>

---

**A method of temperature-rise  
assessment by extrapolation for  
partially type-tested assemblies  
(PTTA) of low-voltage switchgear  
and controlgear**

---

This Australian Standard was prepared by Committee EL/6, Industrial Switchgear and Controlgear. It was approved on behalf of the Council of Standards Australia on 22 March 1996 and published on 5 June 1996.

---

The following interests are represented on Committee EL/6:

Australian British Chamber of Commerce  
Australian Electrical and Electronic Manufacturers Association  
Bureau of Steel Manufacturers of Australia  
Electricity Supply Association of Australia  
Independent Elect Switchboard Manufacturers Associations  
Institution of Engineers Australia  
Ministry of Commerce, New Zealand  
National Electrical Contractors Association of Australia  
Railway of Australia  
Sydney Water Corporation Limited  
Testing Interests  
WorkCover Authority of N.S.W.

---

**Review of Australian Standards.** To keep abreast of progress in industry, Australian Standards are subject to periodic review and are kept up to date by the issue of amendments or new editions as necessary. It is important therefore that Standards users ensure that they are in possession of the latest edition, and any amendments thereto.

Full details of all Australian Standards and related publications will be found in the Standards Australia Catalogue of Publications; this information is supplemented each month by the magazine 'The Australian Standard', which subscribing members receive, and which gives details of new publications, new editions and amendments, and of withdrawn Standards.

Suggestions for improvements to Australian Standards, addressed to the head office of Standards Australia, are welcomed. Notification of any inaccuracy or ambiguity found in an Australian Standard should be made without delay in order that the matter may be investigated and appropriate action taken.

---

*This Standard was issued in draft form for comment as DR 95395.*

## PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee EL/6 on Industrial Switchgear and Controlgear.

It is the result of a consensus among representatives on the Joint Committee to produce it as an Australian Standard.

This Standard is identical with and has been reproduced from IEC 890:1987, the Corrigendum:1988 and Amendment 1:1995.

The text affected by the Corrigendum and Amendment 1 is marked by a double marginal bar.

As this Standard is reproduced from an international Standard, the following applies:

- (a) The AS number is shown only on the cover and title page, while the International Standard number appears only on the cover.
- (b) In the source text, 'this International Standard' should read 'this Australian Standard'.
- (c) A full point substitutes for a comma when referring to a decimal marker.

The reference to international Standards should be replaced by equivalent Australian standards, as follows:

<i>Reference to International Standard</i>	<i>Australian Standard</i>
439 Low-voltage switchgear and controlgear assemblies	3439 Low-voltage switchgear and controlgear assemblies
439-1 Part 1: Type-tested and partially type-tested assemblies	3439.1 Part 1: Type-tested and partially type-tested assemblies

### © Copyright — STANDARDS AUSTRALIA

Users of Standards are reminded that copyright subsists in all Standards Australia publications and software. Except where the Copyright Act allows and except where provided for below no publications or software produced by Standards Australia may be reproduced, stored in a retrieval system in any form or transmitted by any means without prior permission in writing from Standards Australia. Permission may be conditional on an appropriate royalty payment. Requests for permission and information on commercial software royalties should be directed to the head office of Standards Australia.

Standards Australia will permit up to 10 percent of the technical content pages of a Standard to be copied for use exclusively in-house by purchasers of the Standard without payment of a royalty or advice to Standards Australia.

Standards Australia will also permit the inclusion of its copyright material in computer software programs for no royalty payment provided such programs are used exclusively in-house by the creators of the programs.

Care should be taken to ensure that material used is from the current edition of the Standard and that it is updated whenever the Standard is amended or revised. The number and date of the Standard should therefore be clearly identified.

The use of material in print form or in computer software programs to be used commercially, with or without payment, or in commercial contracts is subject to the payment of a royalty. This policy may be varied by Standards Australia at any time.

## CONTENTS
