

Australian/New Zealand Standard™

**Precast concrete pipes (pressure and non-pressure)**

## **AS/NZS 4058:2007**

This Joint Australian/New Zealand Standard was prepared by Joint Technical Committee WS-006, Concrete Pipes. It was approved on behalf of the Council of Standards Australia on 22 January 2007 and on behalf of the Council of Standards New Zealand on 19 December 2006.

This Standard was published on 18 April 2007.

---

The following are represented on Committee WS-006:

Australasian Railway Association  
Australian Chamber of Commerce and Industry  
Brisbane City Council  
Business New Zealand  
Concrete Pipe Association of Australasia  
Engineers Australia  
Main Roads Department, QLD  
Master Builders Australia  
New Zealand Water and Waste Association  
Precast New Zealand  
University of Tasmania  
Water Services Association of Australia

---

### **Keeping Standards up-to-date**

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about joint Australian/New Zealand Standards can be found by visiting the Standards Web Shop at [www.standards.com.au](http://www.standards.com.au) or Standards New Zealand web site at [www.standards.co.nz](http://www.standards.co.nz) and looking up the relevant Standard in the on-line catalogue.

Alternatively, both organizations publish an annual printed Catalogue with full details of all current Standards. For more frequent listings or notification of revisions, amendments and withdrawals, Standards Australia and Standards New Zealand offer a number of update options. For information about these services, users should contact their respective national Standards organization.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Please address your comments to the Chief Executive of either Standards Australia or Standards New Zealand at the address shown on the back cover.

---

## Australian/New Zealand Standard™

# Precast concrete pipes (pressure and non-pressure)

Originated, in part, as AS A35—1957 and AS A124—1962.  
AS A35 revised and designated AS 1342—1973,  
AS A124 revised and designated AS 1392—1974.  
AS 1342—1973 and AS 1392—1974 revised and designated AS  
4058—1992.  
AS 4058—1992 and NZS 3107:1978 jointly revised and designated  
AS/NZS 4058:2007.

## PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee WS—006, Concrete Pipes, to supersede AS 4058—1992, *Precast concrete pipes (pressure and non-pressure)* and NZS 3107:1978, *Specification for precast concrete drainage and pressure pipes*.

The objective of this revision is to update the Standard for publication as a joint Australian/New Zealand Standard.

Where a choice is given between an Australian Standard and a New Zealand Standard (for example, Testing) the Australian Standard will apply in Australia and the New Zealand Standard in New Zealand.

Users of the Standard are reminded that the means for determining whether a pipe, manufactured in accordance with this Standard, is suitable for a particular loading application, are contained in AS/NZS 3725, *Design for installation of buried concrete pipes*.

The in-service life of a pipeline installation is dependent on the pipe's manufacture, application and installation conditions. Based on past experience of concrete pipe installations, a service life of 100 years could be expected when pipes are manufactured in accordance with this Standard and installed in accordance with AS/NZS 3725 in a 'normal environment' and 'marine environment', as defined in this Standard. Pipes subject to 'other environments' (i.e. more aggressive) should be assessed for suitability using appropriate engineering judgement. See Appendix E of this Standard.

The terms 'normative' and 'informative' have been used in this Standard to define the application of the appendix to which they apply. A 'normative' appendix is an integral part of a Standard, whereas an 'informative' appendix is only for information and guidance.

Statements expressed in mandatory terms in notes to tables and figures are deemed to be requirements of this Standard. All other notes are for information only.

## CONTENTS

	<i>Page</i>
SECTION 1 SCOPE AND GENERAL	
1.1 SCOPE .....	4
1.2 REFERENCED DOCUMENTS .....	4
1.3 DEFINITIONS .....	5
1.4 CLASSIFICATION OF PIPES .....	7
1.5 MARKING .....	9
SECTION 2 MATERIALS	
2.1 VERIFICATION OF MATERIALS COMPLIANCE .....	12
2.2 CONCRETE MATERIALS.....	12
2.3 REINFORCEMENT .....	13
2.4 JOINT MATERIALS.....	13
SECTION 3 MANUFACTURE, HANDLING AND STORAGE	
3.1 VERIFICATION OF MANUFACTURING PROCESS COMPLIANCE .....	14
3.2 DESIGN DETAILS .....	14
3.3 DIMENSIONS AND TOLERANCES .....	15
3.4 WORKMANSHIP AND FINISH .....	18
3.5 HANDLING, STORAGE AND TRANSPORTATION .....	21
SECTION 4 PERFORMANCE TESTS	
4.1 VERIFICATION OF FINISHED PRODUCT COMPLIANCE .....	22
4.2 PROOF LOAD .....	22
4.3 ULTIMATE LOAD.....	23
4.4 WATER-TIGHTNESS 90 kPa TESTS .....	24
4.5 SPECIFIED ( $\geq 50$ kPa) AND ULTIMATE PRESSURE TESTS .....	24
4.6 WATER ABSORPTION .....	24
4.7 FLEXIBLE JOINT ASSEMBLY.....	24
SECTION 5 COMPLIANCE WITH PERFORMANCE REQUIREMENTS	
5.1 MEANS OF DEMONSTRATING COMPLIANCE WITH THE PERFORMANCE REQUIREMENTS.....	25
5.2 SAMPLING AND TESTING .....	25
SECTION 6 ORDERING AND SUPPLYING PIPES	
6.1 PIPE DESIGN AND TEST INFORMATION.....	29
6.2 INFORMATION TO BE SUPPLIED WITH EACH DELIVERY OF PIPE .....	30
6.3 MANUFACTURING INFORMATION TO BE SUPPLIED UPON REQUEST .....	30
APPENDICES	
A SAMPLING SCHEME FOR ROUTINE TESTING .....	31
B CHECKLIST OF PURCHASING REQUIREMENTS.....	37
C LOAD TESTS FOR CONCRETE PIPES .....	38
D PRESSURE TESTS FOR ELASTOMERIC SEAL JOINTED PIPES.....	44
E GUIDE TO CONCENTRATION LIMITS APPLICABLE TO SOME CONSTITUENTS OF THE BURIED ENVIRONMENT .....	49
F ABSORPTION TEST FOR CONCRETE PIPES.....	51
G MEASUREMENT OF CONCRETE COVER TO REINFORCEMENT.....	54
H JOINT ASSEMBLY TEST FOR CONCRETE PIPES WITH FLEXIBLE JOINTS ..	56
