Australian/New Zealand Standard™

**Environmental management—
Life cycle assessment—
Life cycle interpretation**

s t a n d a r d s Australia

AS/NZS ISO 14043:2001

This Joint Australian/New Zealand Standard was prepared by Joint Technical Committee EV-005, Life Cycle Analysis—Environmental. It was approved on behalf of the Council of Standards Australia on 29 September 2000 and on behalf of the Council of Standards New Zealand on 12 January 2001. It was published on 16 February 2001.

The following interests are represented on Committee EV-005:

Australian Chamber of Commerce and Industry
Australian Chemical Specialties Manufacturers Association
Australian Industry Group
Australian and New Zealand Environment and Conservation Council
Consumers Federation of Australia
Institution of Engineers Australia
Nature Conservation Council of N.S.W.
New Zealand Forest Research Institute
Plastics and Chemicals Industries Association
RMIT University
Strategic Industry Research Foundation
Waste Management Association of Australia

Keeping Standards up-to-date

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about joint Australian/New Zealand Standards can be found by visiting the Standards Australia web site at www.standards.com.au or Standards New Zealand web site at www.standards.co.nz and looking up the relevant Standard in the on-line catalogue.

Alternatively, both organizations publish an annual printed Catalogue with full details of all current Standards. For more frequent listings or notification of revisions, amendments and withdrawals, Standards Australia and Standards New Zealand offer a number of update options. For information about these services, users should contact their respective national Standards organization.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Please address your comments to the Chief Executive of either Standards Australia International or Standards New Zealand at the address shown on the back cover.

PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee EV-005, Life Cycle Analysis—Environmental.

This Standard is identical with and has been reproduced from ISO 14043:2000, *Environmental management—Life cycle assessment—Life cycle interpretation*.

The objective of this Standard is to provide requirements and recommendations for conducting the life cycle interpretation in life cycle assessment (LCA) or life cycle inventory analysis (LCI) studies. Specific methodologies for the life cycle interpretation phase of LCA and LCI studies are not described in this Standard.

As this Standard is reproduced from an International Standard, the following applies:

- (a) Its number does not appear on each page of text and its identity is shown only on the cover and title page.
- (b) In the source text ‘this International Standard’ should read ‘this Australian/New Zealand Standard’.
- (c) A full point should be substituted for a comma when referring to a decimal marker.

References to International Standards should be replaced by references to equivalent Australian or Australian/New Zealand Standards, as follows:

<i>Reference to International Standard</i>	<i>Australian/New Zealand Standard</i>
ISO	AS/NZS ISO

	AS ISO
14050 Environmental management—Vocabulary	14050 Environmental management—Vocabulary

The term ‘informative’ has been used in this Standard to define the application of the annex to which it applies. An ‘informative’ annex is only for information and guidance.

CONTENTS

	<i>Page</i>
Introduction	iv
1 Scope	1
2 Normative references	1
3 Terms and abbreviated terms.....	1
4 General description of life cycle interpretation	2
5 Identification of significant issues.....	3
6 Evaluation.....	5
7 Conclusions and recommendations.....	7
8 Reporting	7
9 Other investigations	8
Annex A (informative) Examples of Life Cycle Interpretation	9
