

Australian Standard™

**Quantities and units**

**Part 0: General principles**

This Australian Standard was prepared by Committee ME-071, Quantities, Units and Conversions. It was approved on behalf of the Council of Standards Australia on 21 June 2002 and published on 5 August 2002.

---

The following are represented on Committee ME-071:

CSIRO, Telecommunications and Industrial Physics

National Standards Commission

National Association of Testing Authorities Australia

The University of Melbourne

---

### **Keeping Standards up-to-date**

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about Standards can be found by visiting the Standards Australia web site at [www.standards.com.au](http://www.standards.com.au) and looking up the relevant Standard in the on-line catalogue.

Alternatively, the printed Catalogue provides information current at 1 January each year, and the monthly magazine, *The Australian Standard*, has a full listing of revisions and amendments published each month.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Contact us via email at [mail@standards.com.au](mailto:mail@standards.com.au), or write to the Chief Executive, Standards Australia International Ltd, GPO Box 5420, Sydney, NSW 2001.

## PREFACE

This Standard was prepared by the Standards Australia Committee ME-071, *Quantities, Units and Conversions*, to supersede AS 2900.0—1986, *Quantities, units, and symbols*, Part 0: *General principles concerning quantities, units, and symbols*.

This Standard is identical with, and has been reproduced from, ISO 31-0:1992/Amd.1:1998, *Quantities and units*, Part 0: *General principles*.

The amendment to ISO 31-0:1992 is included in this document and is shown by a bar line set against the affected text.

The objective of this Standard is to provide users with general information about principles concerning physical quantities, equations, quantity and unit symbols, and coherent unit systems, especially the International System of Units, SI.

Users of this Standard are advised by Standards Australia, under arrangements with ISO and IEC, as well as certain other Standards organizations, that the number of this Standard is not reproduced on each page; its identity is shown only on the cover and title pages.

For the purpose of this Standard, the ISO text should be modified as follows:

- (a) *Terminology* The words ‘this Australian Standard’ should replace the words ‘this International Standard’ wherever they appear.
- (b) *Decimal marker* Substitute a full point for a comma where it appears as a decimal marker.
- (c) *References* The reference to the International Standards should be replaced by reference to the following Australian Standard:

<i>Reference to International Standard or other Publication</i>	<i>Australian Standard</i>
ISO	AS
31 Quantities and units	2900 Quantities and units
31-1 Part 1: Space and time	2900.1 Part 1: Space and time
31-3 Part 3: Mechanics	2900.3 Part 3: Mechanics
31-4 Part 4: Heat	2900.4 Part 4: Heat
31-5 Part 5: Electricity and magnetism	2900.5 Part 5: Electricity and magnetism
31-10 Part 10: Nuclear reactions and ionizing radiations	2900.10 Part 10: Nuclear reactions and ionizing radiations
31-11 Part 11: Mathematical signs and symbols for use in the physical sciences and technology	2900.11 Part 11: Mathematical signs and symbols for use in the physical sciences and technology
31-12 Part 12: Characteristic numbers	2900.12 Part 12: Characteristic numbers
31-13 Part 13: Solid state physics	2900.13 Part 13: Solid state physics

## CONTENTS

	<i>Page</i>
1 SCOPE .....	1
2 QUANTITIES AND UNITS .....	1
3 RECOMMENDATIONS FOR PRINTING SYMBOLS AND NUMBERS .....	9
ANNEXES	
A GUIDE TO TERMS USED IN NAMES FOR PHYSICAL QUANTITIES .....	13
B GUIDE TO THE ROUNDING OF NUMBERS.....	17
C INTERNATIONAL ORGANIZATIONS IN THE FIELD OF QUANTITIES AND UNITS .....	19
AMDT 1:1998.....	23
