IEC 60947-6-2, Ed. 2.1 (2007)

AS/NZS IEC 60947.6.2:2015

Australian/New Zealand Standard™

**Low-voltage switchgear and controlgear**

**Part 6.2: Multiple function equipment—  
Control and protective switching  
devices (or equipment) (CPS)**

## **AS/NZS IEC 60947.6.2:2015**

This Joint Australian/New Zealand Standard was prepared by Joint Technical Committee EL-006, Industrial Switchgear and Controlgear. It was approved on behalf of the Council of Standards Australia on 27 May 2015 and on behalf of the Council of Standards New Zealand on 29 May 2015.  
This Standard was published on 29 June 2015.

---

The following are represented on Committee EL-006:

Association of Accredited Certification Bodies  
Ausgrid  
Australian Chamber of Commerce and Industry  
Australian Industry Group  
Bureau of Steel Manufacturers of Australia  
Business New Zealand  
Electrical Contractors Association of New Zealand  
Engineers Australia  
National Electrical and Communications Association  
National Electrical Switchboard Manufacturers Association  
Rail Industry Safety and Standards Board (RISSB)

---

### **Keeping Standards up-to-date**

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about joint Australian/New Zealand Standards can be found by visiting the Standards Web Shop at [www.saiglobal.com.au](http://www.saiglobal.com.au) or Standards New Zealand web site at [www.standards.co.nz](http://www.standards.co.nz) and looking up the relevant Standard in the on-line catalogue.

For more frequent listings or notification of revisions, amendments and withdrawals, Standards Australia and Standards New Zealand offer a number of update options. For information about these services, users should contact their respective national Standards organization.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Please address your comments to the Chief Executive of either Standards Australia or Standards New Zealand at the address shown on the back cover.

## PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee EL-006, Industrial Switchgear and Controlgear.

This part of IEC 60947 applies to control and protective switching devices (or equipment) (CPS), the main contacts of which are intended to be connected to circuits of rated voltage not exceeding 1,000 V a.c. or 1,500 V d.c.

The object of this part is to state—

- (a) the characteristics of CPSs;
- (b) the conditions with which CPSs comply with reference to their operation and behaviour, their dielectric properties, and the degree of protection provided by their enclosure where applicable;
- (c) the tests intended to verify that these conditions have been met, and the methods to be adopted for these tests; and
- (d) the information to be marked on or given with the CPSs.

This Standard is identical with, and has been reproduced from IEC 60947-6-2, Ed. 2.1 (2007), *Low-voltage switchgear and controlgear, Part 6-2: Multiple function equipment—Control and protective switching devices (or equipment) (CPS)*. A vertical line in the margins shows where IEC 60947-6-2, Ed. 2.0 (2002) has been modified by amendment 1 (2007).

The principal difference between this and the previous edition, is that this is a joint Australian/New Zealand Standard.

This Standard should be read in conjunction with IEC 60947-1.

The numbering of the tables is not identical to that of the first edition and its Amendments 1 and 2.

As this Standard is reproduced from an International Standard, the following applies:

- (A) In the source text ‘this part of IEC 60947’ should read ‘this Australian/New Zealand Standard’.
- (B) A full point substitutes for a comma when referring to a decimal marker.

References to International Standards should be replaced by references to Australian or Australian/New Zealand Standards, as follows:
