

AS 3668—1989

Australian Standard[®]

**Flexible intermediate bulk
containers—Non-dangerous goods**

This Australian Standard was prepared by Committee PK/11, Flexible Intermediate Bulk Containers. It was approved on behalf of the Council of Standards Australia on 10 January 1989 and published on 21 July 1989.

The following interests are represented on Committee PK/11:

Department of Defence
Department of Transport & Communications
Railways of Australia Committee
Association of Australian Port and Marine Authorities
Australian Flexible Intermediate Bulk Containers Association
Packaging Council of Australia

Review of Australian Standards. *To keep abreast of progress in industry, Australian Standards are subject to periodic review and are kept up to date by the issue of amendments or new editions as necessary. It is important therefore that Standards users ensure that they are in possession of the latest edition, and any amendments thereto.*

Full details of all Australian Standards and related publications will be found in the Standards Australia Catalogue of Publications; this information is supplemented each month by the magazine 'The Australian Standard', which subscribing members receive, and which gives details of new publications, new editions and amendments, and of withdrawn Standards.

Suggestions for improvements to Australian Standards, addressed to the head office of Standards Australia, are welcomed. Notification of any inaccuracy or ambiguity found in an Australian Standard should be made without delay in order that the matter may be investigated and appropriate action taken.

This Standard was issued in draft form for comment as DR 88114.

PREFACE

This Standard was prepared by Standards Australia's Committee on Flexible Intermediate Bulk Containers under the direction of the Packaging Standards Board.

This Standard, which deals with requirements and recommendations applicable to the complete flexible intermediate bulk container, takes no account of the particular requirements relating to materials, construction and performance that would need to be applied to intermediate bulk containers used for the conveyance and storage of substances deemed dangerous in legislation relating to dangerous goods.

In the preparation of this Standard reference was made to British Standard BS 6382 Part 1: 1983, *Specification for flexible intermediate bulk containers designed to be lifted from above by integral or detachable devices*, and acknowledgement is made of the assistance obtained therefrom.

Users of Standards are reminded that copyright subsists in all Standards Australia publications and software. Except where the Copyright Act allows and except where provided for below no publications or software produced by Standards Australia may be reproduced, stored in a retrieval system in any form or transmitted by any means without prior permission in writing from Standards Australia. Permission may be conditional on an appropriate royalty payment. Requests for permission and information on commercial software royalties should be directed to the head office of Standards Australia.

Standards Australia will permit up to 10 percent of the technical content pages of a Standard to be copied for use exclusively in-house by purchasers of the Standard without payment of a royalty or advice to Standards Australia.

Standards Australia will also permit the inclusion of its copyright material in computer software programs for no royalty payment provided such programs are used exclusively in-house by the creators of the programs.

Care should be taken to ensure that material used is from the current edition of the Standard and that it is updated whenever the Standard is amended or revised. The number and date of the Standard should therefore be clearly identified.

The use of material in print form or in computer software programs to be used commercially, with or without payment, or in commercial contracts is subject to the payment of a royalty. This policy may be varied by Standards Australia at any time.
