Australian/New Zealand Standard[®]

**Preparation of function charts
for control systems**

[IEC title: Preparation of function charts for control systems]

AS/NZS 4382:1996

This Joint Australian/New Zealand Standard was prepared by Joint Technical Committee TE/13, Symbols Units and Quantities for Electrotechnology. It was approved on behalf of the Council of Standards Australia on 15 February 1996 and on behalf of the Council of Standards New Zealand on 11 March 1996. It was published on 5 May 1996.

The following interests are represented on Committee TE/13:

AUSTEL

Airservices Australia
Australasian Railway Association
Australian Chamber of Commerce and Industry
Department of Defence, Australia
Department of Employment and Technical and Further Education, S.A.
Institution of Engineers, Australia
Institution of Radio and Electronics Engineers, Australia
Queensland Mining Council
Royal Melbourne Institute of Technology
The Association of Consulting Engineers, Australia

Review of Standards. To keep abreast of progress in industry, Joint Australian/New Zealand Standards are subject to periodic review and are kept up to date by the issue of amendments or new editions as necessary. It is important therefore that Standards users ensure that they are in possession of the latest edition, and any amendments thereto.

Full details of all Joint Standards and related publications will be found in the Standards Australia and Standards New Zealand Catalogue of Publications; this information is supplemented each month by the magazines 'The Australian Standard' and 'Standards New Zealand', which subscribing members receive, and which give details of new publications, new editions and amendments, and of withdrawn Standards.

Suggestions for improvements to Joint Standards, addressed to the head office of either Standards Australia or Standards New Zealand, are welcomed. Notification of any inaccuracy or ambiguity found in a Joint Australian/New Zealand Standard should be made without delay in order that the matter may be investigated and appropriate action taken.

This Standard was issued in draft form for comment as DR 95238.

PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee TE/13 on Symbols, Units and Quantities for Electrotechnology, as a Joint Standard.

The objective of this Standard is to provide developers of control systems with methods and symbols for preparing function charts for control systems to facilitate the clear, consistent and unambiguous presentation of the charts. The Standard may be applied to non-electrical systems.

This Standard is identical with and has been reproduced from IEC 848, *Preparation of function charts for control systems*. The Corrigendum:1990 to the Standard has been included at the rear of this Standard and text affected is marked by a marginal bar.

The term 'informative' has been used in this Standard to define the application of the annex to which it applies. An 'informative' annex is only for information and guidance.

As this Standard is reproduced from an international Standard, the following applies:

- (a) Its number does not appear on each page of text and its identity is shown only on the cover and title page.
- (b) In the source text 'this International Standard' should read 'this Australian/New Zealand Standard'.
- (c) A full point substitutes for a comma when referring to a decimal marker.

References to International Standards should be replaced by equivalent Australian/New Zealand Standards as follows:

<i>Reference to International Standard</i>		<i>Australian Standard</i>	
IEC		AS

© Copyright — STANDARDS AUSTRALIA/STANDARDS NEW ZEALAND

Users of Standards are reminded that copyright subsists in all Standards Australia and Standards New Zealand publications and software. Except where the Copyright Act allows and except where provided for below no publications or software produced by Standards Australia or Standards New Zealand may be reproduced, stored in a retrieval system in any form or transmitted by any means without prior permission in writing from Standards Australia or Standards New Zealand. Permission may be conditional on an appropriate royalty payment. Australian requests for permission and information on commercial software royalties should be directed to the head office of Standards Australia. New Zealand requests should be directed to Standards New Zealand.

Up to 10 percent of the technical content pages of a Standard may be copied for use exclusively in-house by purchasers of the Standard without payment of a royalty or advice to Standards Australia or Standards New Zealand.

Inclusion of copyright material in computer software programs is also permitted without royalty payment provided such programs are used exclusively in-house by the creators of the programs.

Care should be taken to ensure that material used is from the current edition of the Standard and that it is updated whenever the Standard is amended or revised. The number and date of the Standard should therefore be clearly identified.

The use of material in print form or in computer software programs to be used commercially, with or without payment, or in commercial contracts is subject to the payment of a royalty. This policy may be varied by Standards Australia or Standards New Zealand at any time.

CONTENTS

Clause	<i>Page</i>
1 Scope	1
2 Normative references	1
3 General principles	1
4 General description of the function chart	6
5 Detailed commands (actions) and detailed transition conditions	22
6 Re-use of the same sequence	32
7 Detailed representation of a step	33
8 Examples of function charts	33
Annex A - Mathematical description of the function chart	44
Annex B - Bibliography	45
Annex C - Index of symbols	46
