

AS 3532—1988

Australian Standard[®]

**TEST METHODS FOR
DETERMINING ELECTROLYTIC
CORROSION WITH INSULATING
MATERIALS**

This Australian standard was prepared by Committee EL/—, Electrical Standards Board. It was approved on behalf of the Council of the Standards Association of Australia on 16 December 1987 and published on 7 March 1988.

The following interests are represented on Committee EL/—:

Association of Consulting Engineers Australia
Australian British Chamber of Commerce
Australian Electrical and Electronic Manufacturers Association
Australian Federation of Consumer Organizations
Australian Retailers Association
Confederation of Australian Industry
CSIRO, Division of Applied Physics
Department of Defence
Department of Administrative Services
Electrical Contractors Associations of Australia
Electricity Supply Association of Australia
Illuminating Engineering Societies of Australia
Institution of Biomedical Engineering (Australia)
Institution of Engineers, Australia
Public Works Department, N.S.W.
Railways of Australia Committee
Regulatory Authorities (Electrical)
Telecom Australia

Review of Australian Standards. *To keep abreast of progress in industry, Australian Standards are subject to periodic review and are kept up to date by the issue of amendments or new editions as necessary. It is important therefore that Standards users ensure that they are in possession of the latest edition, and any amendments thereto.*

Full details of all Australian Standards and related publications will be found in the Standards Australia Catalogue of Publications; this information is supplemented each month by the magazine 'The Australian Standard', which subscribing members receive, and which gives details of new publications, new editions and amendments, and of withdrawn Standards.

Suggestions for improvements to Australian Standards, addressed to the head office of Standards Australia, are welcomed. Notification of any inaccuracy or ambiguity found in an Australian Standard should be made without delay in order that the matter may be investigated and appropriate action taken.

This Standard was issued in draft form for comment as DR 82095 (in part).

PREFACE

This Standard was prepared on behalf of the Association's Electrical Standards Board. It is identical with and has been produced from IEC 426 (1973), *Test methods for determining electrolytic corrosion with insulating materials*.

The page numbers of the IEC English text are given on the bottom left corner of each page of this Standard.

For the purposes of this Australian Standard, the cross references to other Publications should be replaced by references to Australian Standards as shown below except where the words 'No Australian equivalent' are used. It should be noted that this statement applies only at the time of publication of this Standard.

<i>Reference to IEC Publication</i>	<i>Appropriate Australian Standard</i>
IEC 167 Methods of test for the determination of the insulation resistance of solid insulating materials	AS 1255 Methods of test for electrical characteristics of solid plastics insulating materials Part 2: Determination of insulation resistance (AS 1255.2)
IEC 212 Standard conditions for use prior to and during the testing of solid electrical insulating materials	No Australian equivalent.
IEC 260 Test enclosures of non-injection type for constant relative humidity	No Australian equivalent.

© Copyright — STANDARDS AUSTRALIA

Users of Standards are reminded that copyright subsists in all Standards Australia publications and software. Except where the Copyright Act allows and except where provided for below no publications or software produced by Standards Australia may be reproduced, stored in a retrieval system in any form or transmitted by any means without prior permission in writing from Standards Australia. Permission may be conditional on an appropriate royalty payment. Requests for permission and information on commercial software royalties should be directed to the head office of Standards Australia.

Standards Australia will permit up to 10 percent of the technical content pages of a Standard to be copied for use exclusively in-house by purchasers of the Standard without payment of a royalty or advice to Standards Australia.

Standards Australia will also permit the inclusion of its copyright material in computer software programs for no royalty payment provided such programs are used exclusively in-house by the creators of the programs.

Care should be taken to ensure that material used is from the current edition of the Standard and that it is updated whenever the Standard is amended or revised. The number and date of the Standard should therefore be clearly identified.

The use of material in print form or in computer software programs to be used commercially, with or without payment, or in commercial contracts is subject to the payment of a royalty. This policy may be varied by Standards Australia at any time.
