

AS 1742.11—1999

AS 1742.11—1999

Australian Standard<sup>®</sup>

**Manual of uniform control devices**

**Part 11: Parking controls**

This Australian Standard® was prepared by Committee MS-012, Road Signs and Traffic Signals. It was approved on behalf of the Council of Standards Australia on 16 November 1998.

This Standard was published on 5 March 1999.

---

The following are represented on Committee MS-012:

- ARRB Transport Research
  - Australasian Railway Association
  - Australian Automobile Association
  - Australian Chamber of Commerce and Industry
  - AUSTROADS
  - Department of Transport and Works, N.T.
  - Department of Transport, S.A.
  - Department of Transport, Tas.
  - Department of Urban Services, A.C.T.
  - Institute of Municipal Engineering
  - Main Roads, Qld
  - Main Roads, W.A.
  - Roadmarking Industry Association of Australia
- 

This Standard was issued in draft form for comment as DR 98114.

Standards Australia wishes to acknowledge the participation of the expert individuals that contributed to the development of this Standard through their representation on the Committee and through the public comment period.

---

### **Keeping Standards up-to-date**

Australian Standards® are living documents that reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued.

Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments that may have been published since the Standard was published.

Detailed information about Australian Standards, drafts, amendments and new projects can be found by visiting **[www.standards.org.au](http://www.standards.org.au)**

Standards Australia welcomes suggestions for improvements, and encourages readers to notify us immediately of any apparent inaccuracies or ambiguities. Contact us via email at **[mail@standards.org.au](mailto:mail@standards.org.au)**, or write to Standards Australia, GPO Box 476, Sydney, NSW 2001.

## PREFACE

This Standard was prepared by the Standards Australia Committee MS/12, Road Signs and Traffic Signals to supersede AS 1742.11—1989. It is one in a series of fourteen standards which together form the *Manual of uniform traffic control devices*. The series comprises the following Standards:

### AS

- 1742 Manual of uniform traffic control devices
- 1742.1 General introduction and index of signs
- 1742.2 Traffic control devices for general use
- 1742.3 Traffic control devices for works on roads
- 1742.4 Speed controls
- 1742.5 Street name and community facility name signs
- 1742.6 Service and tourist signs for motorists
- 1742.7 Railway crossings
- 1742.8 Freeways
- 1742.9 Bicycle facilities
- 1742.10 Pedestrian control and protection
- 1742.11 Parking controls (this Standard)
- 1742.12 Bus, transit and truck lanes
- 1742.13 Local area traffic management
- 1742.14 Traffic signals

Principal variations from the 1989 edition are as follows:

- (a) Deletion of detail on the layout of on-street parking areas and spaces. This is now covered in AS 2890.5, *Parking facilities, Part 5: On-street parking*.
- (b) Deletion of detail on sign coding for ordering purposes. A survey revealed that this was not being used.
- (c) Expansion of detail relating to the signposting and marking of clearways, the marking of parking spaces for the disabled, and the provision of direction signs to parking areas.
- (d) Inclusion of signs indicating 'tow-away' areas.
- (e) A change in the shape of the arrowhead on linear parking control signs to improve legibility.

The terms 'normative' and 'informative' have been used in this Standard to define the application of the appendix to which they apply. A 'normative' appendix is an integral part of a Standard, whereas an 'informative' appendix is only for information and guidance.

### © Copyright — STANDARDS AUSTRALIA

Users of Standards are reminded that copyright subsists in all Standards Australia publications and software. Except where the Copyright Act allows and except where provided for below no publications or software produced by Standards Australia may be reproduced, stored in a retrieval system in any form or transmitted by any means without prior permission in writing from Standards Australia. Permission may be conditional on an appropriate royalty payment. Requests for permission and information on commercial software royalties should be directed to the head office of Standards Australia.

Standards Australia will permit up to 10 percent of the technical content pages of a Standard to be copied for use exclusively in-house by purchasers of the Standard without payment of a royalty or advice to Standards Australia.

Standards Australia will also permit the inclusion of its copyright material in computer software programs for no royalty payment provided such programs are used exclusively in-house by the creators of the programs.

Care should be taken to ensure that material used is from the current edition of the Standard and that it is updated whenever the Standard is amended or revised. The number and date of the Standard should therefore be clearly identified.

The use of material in print form or in computer software programs to be used commercially, with or without payment, or in commercial contracts is subject to the payment of a royalty. This policy may be varied by Standards Australia at any time.

## CONTENTS
