

AS 2381.10—1995

Australian Standard®

Electrical equipment for explosive atmospheres—Selection, installation and maintenance

Part 10: Equipment in combustible dust (Class II) areas

This Australian Standard was prepared by Committee EL/14, Electrical Equipment in Hazardous Areas. It was approved on behalf of the Council of Standards Australia on 21 April 1995 and published on 5 August 1995.

The following interests are represented on Committee EL/14:

Australian Chamber of Commerce and Industry
Australian Coal Association
Australian Electrical and Electronic Manufacturers Association
Australian Gas Association
Australian Institute of Petroleum
Australian Institute of Refrigeration, Air conditioning and Heating
Department of Minerals and Energy, Qld
Department of Mineral Resources N.S.W.
Institute of Instrumentation and Control
Ministry of Commerce, New Zealand
National Electrical Contractors Associations of Australia
Regulatory authorities (electrical)
Testing interests
The WorkCover Authority, N.S.W.

Review of Australian Standards. *To keep abreast of progress in industry, Australian Standards are subject to periodic review and are kept up to date by the issue of amendments or new editions as necessary. It is important therefore that Standards users ensure that they are in possession of the latest edition, and any amendments thereto.*

Full details of all Australian Standards and related publications will be found in the Standards Australia Catalogue of Publications; this information is supplemented each month by the magazine 'The Australian Standard', which subscribing members receive, and which gives details of new publications, new editions and amendments, and of withdrawn Standards.

Suggestions for improvements to Australian Standards, addressed to the head office of Standards Australia, are welcomed. Notification of any inaccuracy or ambiguity found in an Australian Standard should be made without delay in order that the matter may be investigated and appropriate action taken.

PREFACE

This Standard was prepared by the Joint Australian/New Zealand Standards Committee EL/14 on Electrical Equipment in Hazardous Areas, to supersede AS 2381.10—1989.

This Standard is the result of a consensus among representatives on the Joint Committee to produce it as an Australian Standard.

This is Part 10 of a series of Standards covering the selection, installation and maintenance of electrical equipment for use in areas where flammable or combustible materials are generated, processed, handled or stored and which therefore are potentially explosive.

Each part details requirements appropriate to one of the types of protection techniques used to achieve electrical safety. Part 1 of this series details general requirements pertaining to all types of protection techniques and should be read in conjunction with this Part.

Other Standards in this series are as follows:

- AS 2381 Electrical equipment for explosive atmospheres—Selection, installation and maintenance
- AS 2381.1 Part 1: General requirements
- AS 2381.2 Part 2: Flameproof enclosures
- AS 2381.6 Part 6: Increased safety e
- AS 2381.7 Part 7: Intrinsic safety i

Other parts of this Standard, dealing with the techniques of

- Encapsulation m
- Non-sparking n
- Pressurization p
- Sand filled q
- Special protection s

are in the course of preparation.

The requirements specified in this Standard are supplementary but not alternatives to any requirements which would apply to installations in non-hazardous areas (see AS 3000).

Changes to the 1989 edition, include:

- (a) Editorial changes including the update of references to other Standards.
- (b) Inclusion of pressurization as an acceptable explosion protection technique.
- (c) Clarification of requirements for conduit systems covered by the AS/NZS 2053 series.

The term 'informative' has been used in this Standard to define the application of the appendix to which it applies. An 'informative' appendix is only for information and guidance.

Users of Standards are reminded that copyright subsists in all Standards Australia publications and software. Except where the Copyright Act allows and except where provided for below no publications or software produced by Standards Australia may be reproduced, stored in a retrieval system in any form or transmitted by any means without prior permission in writing from Standards Australia. Permission may be conditional on an appropriate royalty payment. Requests for permission and information on commercial software royalties should be directed to the head office of Standards Australia.

Standards Australia will permit up to 10 percent of the technical content pages of a Standard to be copied for use exclusively in-house by purchasers of the Standard without payment of a royalty or advice to Standards Australia.

Standards Australia will also permit the inclusion of its copyright material in computer software programs for no royalty payment provided such programs are used exclusively in-house by the creators of the programs.

Care should be taken to ensure that material used is from the current edition of the Standard and that it is updated whenever the Standard is amended or revised. The number and date of the Standard should therefore be clearly identified.

The use of material in print form or in computer software programs to be used commercially, with or without payment, or in commercial contracts is subject to the payment of a royalty. This policy may be varied by Standards Australia at any time.

CONTENTS

	<i>Page</i>
SECTION 1 SCOPE AND GENERAL	
1.1 SCOPE	4
1.2 REFERENCED DOCUMENTS	4
1.3 DEFINITIONS	5
1.4 ELECTRICAL RATING	6
1.5 PROTECTION AGAINST STATIC	6
1.6 PROTECTION AGAINST LIGHTNING	6
1.7 OTHER CONSIDERATIONS	6
SECTION 2 SELECTION OF EQUIPMENT	
2.1 SCOPE OF SECTION	7
2.2 PERMITTED TYPES OF PROTECTION	7
2.3 TEMPERATURE CLASSIFICATION	8
2.4 PHYSICAL CHARACTERISTICS	9
2.5 HEATING EQUIPMENT	9
SECTION 3 INSTALLATION	
3.1 SCOPE OF SECTION	11
3.2 WIRING SYSTEMS	11
3.3 SUPPORTS FOR WIRING	13
3.4 DRAINAGE	13
3.5 THREADED CONNECTIONS	13
3.6 EARTHING	14
3.7 EQUIPOTENTIAL BONDING	14
3.8 SOCKET-OUTLETS	14
3.9 PROTECTION	15
3.10 ISOLATION	15
3.11 ABRASION PROTECTION	15
SECTION 4 INSPECTION, TESTING AND MAINTENANCE	
4.1 GENERAL	16
4.2 DOCUMENTATION	16
4.3 FORMS OF INSPECTION	16
4.4 ON SITE ELECTRICAL TESTING	16
4.5 MAINTENANCE	17
APPENDICES	
A GENERAL CONSIDERATIONS	18
B INFORMATION REGARDING INSTALLATION	20
C INSPECTION, TESTING AND MAINTENANCE	21
