

Australian/New Zealand Standard™

Eye and face protection

Part 4: Filters and eye protectors against laser radiation (laser eye- protectors)

A1 | *AS/NZS 1337.4:2011, Eye and face protection, Part 4: Filters and eye protectors against laser radiation (laser eye-protectors), is an identical adoption of EN 207:2009, Personal eye-protection equipment – Filters and eye-protectors against laser radiation (laser eye-protectors), and is reproduced with the permission of CEN, Avenue Marnix 17, B-1000 Brussels, Belgium. All exploitation rights of the European Standards in any form and by any means are reserved world-wide to CEN and its National Members, and no reproduction may be undertaken without express permission in writing by CEN through Standards Australia Limited.*

AS/NZS 1337.4:2011

This Joint Australian/New Zealand Standard was prepared by Joint Technical Committee SF-006, Eye and Face Protection. It was approved on behalf of the Council of Standards Australia on 7 October 2011 and on behalf of the Council of Standards New Zealand on 20 October 2011.

This Standard was published on 11 November 2011.

The following are represented on Committee SF-006:

Association of Accredited Certification Bodies
Australasian Fire and Emergency Service Authorities Council
Australian Chamber of Commerce and Industry
Australian Dispensing Opticians Association
Australian Industry Group
New Zealand Association of Optometrists
Optical Distributors and Manufacturers Association of Australia
Queensland University of Technology
TestSafe Australia
The Human Factors & Ergonomics Society of Australia
The University of New South Wales
University of Auckland (New Zealand)
Welding Technology Institute of Australia

Keeping Standards up-to-date

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about joint Australian/New Zealand Standards can be found by visiting the Standards Web Shop at www.saiglobal.com.au or Standards New Zealand web site at www.standards.co.nz and looking up the relevant Standard in the on-line catalogue.

For more frequent listings or notification of revisions, amendments and withdrawals, Standards Australia and Standards New Zealand offer a number of update options. For information about these services, users should contact their respective national Standards organization.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Please address your comments to the Chief Executive of either Standards Australia or Standards New Zealand at the address shown on the back cover.

AS/NZS 1337.4:2011

PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee SF-006, Eye and Face Protection, to supersede AS/NZS 1337.4:2004, *Personal eye-protection, Part 4: Filters and eye-protectors against laser radiation (laser eye-protectors)*.

This Standard incorporates Amendment No. 1 (December 2014). The changes required by the Amendment are indicated in the text by a marginal bar and amendment number against the clause, note, table, figure or part thereof affected.

The objective of this Standard is to specify performance requirements, test methods, marking requirements, selection and use of personal eye-protectors against laser radiation in the spectral range 180 nm to 1000 micrometre.

This Standard is identical with, and has been reproduced from EN 207:2009, *Personal eye-protection equipment—Filters and eye-protectors against laser radiation (laser eye-protectors)*.

As this Standard is reproduced from a European Standard, the following applies:

- (a) Its number appears on the cover and title page while the European Standard number appears only on the cover.
- (b) In the source text 'this European Standard' should read 'this Australian/New Zealand Standard'.
- (c) A full point substitutes for a comma when referring to a decimal marker.

The term 'informative' has been used in this Standard to define the application of the annex to which it applies. An 'informative' annex is only for information and guidance.

CONTENTS

	<i>Page</i>
1	Scope5
2	Normative references5
3	Requirements5
3.1	Spectral transmittance of filters and frames5
3.2	Luminous transmittance of filters5
3.3	Resistance of filters and frames to laser radiation5
3.4	Refractive values of filters and eye-protectors6
3.5	Quality of material and surface of filters7
3.5.1	Material and surface defects7
3.5.2	Diffusion of light7
3.6	Stability of filters and eye-protectors to ultraviolet radiation and elevated temperature7
3.6.1	Stability to ultraviolet radiation7
3.6.2	Stability at elevated temperature7
3.7	Resistance of filters and frames to ignition by contact with hot surfaces7
3.8	Field of vision of eye-protectors7
3.9	Construction of filters and frames8
3.10	Mechanical strength of eye-protectors8
3.10.1	Basic requirement8
3.10.2	Optional requirements8
4	Testing8
4.1	General8
4.2	Spectral transmittance of filters and frames 10
4.3	Luminous transmittance of filters 10
4.4	Resistance of filters and frames to laser radiation 10
4.5	Refractive value of filters and eye-protectors 11
4.6	Quality of material and surface of filters 11
4.6.1	Material and surface defects 11
4.6.2	Diffusion of light 11
4.7	Stability to UV radiation and stability to elevated temperature 11
4.7.1	Stability to UV radiation 11
4.7.2	Stability to elevated temperature 11
4.8	Resistance of filters and frames to ignition by contact with hot surfaces 11
4.9	Field of vision of eye-protectors 12
4.10	Determination of the protected range 12
4.11	Frames 13
4.12	Mechanical strength 13
5	Information supplied by the manufacturer 13
6	Marking 14
6.1	Eye-protectors 14
6.2	Filters 16
Annex A (informative) Principle 17	
A.1	Limit values and time base 17
A.2	Beam areas 18
A.3	Angle dependence 19
A.4	Example test report 19
Annex B (informative) Recommendations for the use of laser radiation eye-protectors 22	
B.1	General 22
