

Australian Standard™

**The handling and transport of
dangerous cargoes in port areas**

This Australian Standard was prepared by Committee ME-081, Storage, Handling and Transport of Dangerous Cargoes in Port Areas. It was approved on behalf of the Council of Standards Australia on 10 October 2005.
This Standard was published on 16 November 2005.

The following are represented on Committee ME-081:

Association of Australian Port & Marine Authorities
Australasian Fire Authorities Council
Australasian Railway Association
Australian Chamber of Commerce and Industry
Australian Institute of Petroleum
Australian Maritime Safety Authority
Australian Shipowners Association
Department of Consumer and Employment Protection, W.A.
ICHCA Australia
Plastics and Chemicals Industries Association
Queensland Transport
Shipping Australia

Additional Interests:

Department of Natural Resources and Mines, Queensland
Manufacturers and suppliers of dangerous goods

Keeping Standards up-to-date

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about Standards can be found by visiting the Standards Web Shop at www.standards.com.au and looking up the relevant Standard in the on-line catalogue.

Alternatively, the printed Catalogue provides information current at 1 January each year, and the monthly magazine, *The Global Standard*, has a full listing of revisions and amendments published each month.

Australian Standards™ and other products and services developed by Standards Australia are published and distributed under contract by SAI Global, which operates the Standards Web Shop.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Contact us via email at mail@standards.org.au, or write to the Chief Executive, Standards Australia, GPO Box 476, Sydney, NSW 2001.

This Standard was issued in draft form for comment as DR 03382.

PREFACE

This Standard was prepared by Standards Australia Committee ME-081, Storage, Handling and Transport of Dangerous Cargoes in Port Areas, to supersede AS 3846—1998. Its requirements are based on, and are intended to complement, the International Maritime Organization (IMO) *Recommendations on the Safe Transport of Dangerous Cargoes and Related Activities in Port Areas*.

The Standard has been revised to meet changed regulatory requirements and to update procedures in line with current practices.

The purpose of this Standard is to provide safety requirements and recommendations for facilities and operations at ports where dangerous cargoes are handled.

In this Standard, the term ‘dangerous cargoes’ is defined as any cargo, including fuel, stores or other commodities, whether packaged or in bulk, intended for carriage by sea and having properties that are within the Classes listed in the IMO *International Maritime Dangerous Goods Code* (IMDG Code).

This definition also includes any bulk cargo which is not covered by the *IMDG Code*, but which is subject to the requirements of the IMO Code for the *Construction and Equipment of Ships Carrying Dangerous Chemicals in Bulk*, the *IMO Code for the Construction and Equipment of Ships Carrying Liquefied Gases in Bulk*, the *IMO Code of Existing Ships Carrying Liquefied Gases in Bulk*, or Appendix B of the *IMO Code of Safe Practice for Solid Bulk Cargoes*, insofar as such a cargo could constitute a hazard to those in the port area or to the port environment.

It is recognized that there are solid substances shipped in bulk which do not constitute any hazard when stored ashore, but which may create problems affecting safety subsequent to their loading onto a ship. In such situations compliance with the provisions of the *IMO Code of Safe Practice for Solid Bulk Cargoes (BC Code)* is necessary.

Permission to use the Ship/Shore Safety Check list from the fourth edition of the *International Safety Guide for Oil Tankers and Terminals* (ISGOTT) is gratefully acknowledged.

The terms ‘normative’ and ‘informative’ have been used in this Standard to define the application of an appendix. A normative Appendix is an integral part of a Standard, whereas an informative Appendix provides information and guidance only.

Statements expressed in mandatory terms in notes to tables are deemed to be requirements of this Standard.

CONTENTS

	<i>Page</i>
SECTION 1 SCOPE AND GENERAL	
1.1 SCOPE	6
1.2 APPLICATION	6
1.3 REFERENCED DOCUMENTS	6
1.4 DEFINITIONS AND ABBREVIATIONS.....	6
SECTION 2 GENERAL REQUIREMENTS	
2.1 SCOPE OF SECTION	17
2.2 RISK ASSESSMENT, REQUIREMENTS AND PRECAUTIONS	17
2.3 GENERAL REQUIREMENTS FOR DOCUMENTATION, MARKING AND PACKAGING OF DANGEROUS CARGOES.....	17
2.4 GENERAL REQUIREMENTS FOR PORTS, BERTHS AND SHIPS	18
SECTION 3 ADVANCE NOTIFICATION	
3.1 SCOPE OF SECTION	20
3.2 ADVANCE NOTIFICATION	20
3.3 PACKAGED DANGEROUS CARGOES	20
3.4 BULK DANGEROUS CARGOES	20
SECTION 4 DANGEROUS CARGOES OF EXPLOSIVES OF CLASS 1	
4.1 SCOPE OF SECTION	22
4.2 COMPATIBILITY AND MIXED STOWAGE	22
4.3 GENERAL REQUIREMENTS	22
4.4 REQUIREMENTS RELATING TO THE SHIP	25
4.5 ORDINARY BERTHS	26
4.6 SPECIAL BERTHS	26
SECTION 5 PACKAGED DANGEROUS CARGOES OF CLASSES 2, 3, 4, 5, 6, 8 OR 9	
5.1 SCOPE OF SECTION	29
5.2 GENERAL REQUIREMENTS	29
5.3 RESTRICTED AREAS	30
5.4 SEGREGATION	30
SECTION 6 ADDITIONAL REQUIREMENTS FOR AMMONIUM NITRATE AND CALCIUM HYPOCHLORITE	
6.1 SCOPE OF SECTION	32
6.2 CLASSIFICATION OF AMMONIUM NITRATE AND CALCIUM HYPOCHLORITE.....	32
6.3 FUNDAMENTAL SAFETY	32
6.4 QUANTITY LIMITS AT ORDINARY BERTHS	33
6.5 LARGER QUANTITIES AT A SPECIAL BERTH.....	33
6.6 REQUIREMENTS FOR HANDLING AMMONIUM NITRATE OR CALCIUM HYPOCHLORITE AT A SPECIAL BERTH	35
6.7 EMERGENCY PROCEDURES	37
6.8 AMMONIUM NITRATE AND CALCIUM HYPOCHLORITE IN PACKAGES, INTERMEDIATE BULK CONTAINERS, FREIGHT CONTAINERS AND BULK	37
