Department of Planning and Infrastructure (NT)
Gas Appliance Manufacturers Association of Australia
Institute of Plumbing Australia
Master Plumbers, Gasfitters and Drainlayers New Zealand
National Fire Industry Association
NSW Fair Trading
Plastics Industry Pipe Association of Australia
Plastics New Zealand
Plumbers Licensing Board of WA
Plumbing Industry Commission (Victoria)
Plumbing Products Industry Group
South Australian Water Corporation
Water New Zealand
Water Services Association of Australia

Keeping Standards up-to-date

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about joint Australian/New Zealand Standards can be found by visiting the Standards Web Shop at www.saiglobal.com.au or Standards New Zealand web site at www.standards.co.nz and looking up the relevant Standard in the on-line catalogue.

For more frequent listings or notification of revisions, amendments and withdrawals, Standards Australia and Standards New Zealand offer a number of update options. For information about these services, users should contact their respective national Standards organization.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Please address your comments to the Chief Executive of either Standards Australia or Standards New Zealand at the address shown on the back cover.

This Standard was issued in draft form for comment as DR AS/NZS 3500.5.

PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee WS-014, National Plumbing and Drainage, to supersede AS/NZS 3500.5:2000, *National plumbing and drainage, Part 5: Domestic installations*.

The objective of this Standard is to provide a quick reference document for a property that contains up to 19 Class 1a buildings as defined in the National Construction Code (NCC), BCA Vol. 2, Housing Provisions. Plumbing and drainage systems that fall outside this objective or are otherwise not covered by this Standard are provided for in the other relevant Parts of AS/NZS 3500, *Plumbing and drainage*.

In New Zealand this Standard is acceptable for complying with the New Zealand Building Code for plumbing and drainage in association with simple houses as referenced in the *Simple House Acceptable Solution*.

This revision has been published to bring the document into alignment with the requirements of AS/NZS 3500, Parts 1 to 4, as published in May 2012. All sections, apart from Section 5, *Stormwater drainage*, have been revised extensively, both in content and layout.

This Standard incorporates extracts from AS/NZS 3500.1, *Plumbing and drainage, Part 1: Water services*, AS/NZS 3500.2, *Plumbing and drainage, Part 2: Sanitary plumbing and drainage*, AS/NZS 3500.3, *Plumbing and drainage, Part 3: Stormwater drainage*, and AS/NZS 3500.4, *Plumbing and drainage, Part 4: Heated water services*, suitable for domestic type plumbing and drainage installations. Readers of this Standard are advised that some network utility operators may have additional or varied requirements to those described herein.

Statements expressed in mandatory terms in notes to tables and figures are deemed to be requirements of this Standard.

Notes to the text are for information and guidance only.

The terms 'normative' and 'informative' have been used in this Standard to define the application of the appendix to which they apply. A 'normative' appendix is an integral part of a Standard, whereas an 'informative' appendix is only for information and guidance.

This Standard incorporates a Commentary on some Clauses. The Commentary directly follows the relevant clause, is designated by 'C' preceding the clause number and is printed in italics in a panel.

CONTENTS

	<i>Page</i>
SECTION 1 SCOPE AND GENERAL.....	5
SECTION 2 WATER SERVICES.....	11
SECTION 3 HEATED WATER SERVICES	47
