

Australian Standard<sup>®</sup>

## **Safety of machinery**

### **Part 2801: Safety distances and safety gaps—Positioning of protective equipment with respect to the approach speed of parts of the human body**

This Australian Standard® was prepared by Committee SF-041, General Principles for the Guarding of Machinery. It was approved on behalf of the Council of Standards Australia on 27 May 2008.

This Standard was published on 25 June 2008.

---

The following are represented on Committee SF-041:

- Australian Chamber of Commerce and Industry
  - Australian Electrical and Electronic Manufacturers Association
  - Department for Administration and Information Services, SA
  - Department of Consumer and Employment Protection, WorkSafe Division, WA
  - Department of Industrial Relations, Qld
  - Department of Primary Industries, Mine Safety, NSW
  - Engineers Australia
  - Federal Chamber of Automotive Industries
  - Human Factors and Ergonomics Society of Australia
  - Institute of Instrumentation, Control and Automation Australia
  - National Electrical and Communications Association
  - National Safety Council of Australia
  - Office of the Australian Safety and Compensation Council
  - Safety Institute of Australia
  - The University of Melbourne
  - Tractor and Machinery Association of Australia
  - Victorian WorkCover Authority
- 

This Standard was issued in draft form for comment as DR 07271.

Standards Australia wishes to acknowledge the participation of the expert individuals that contributed to the development of this Standard through their representation on the Committee and through the public comment period.

---

### **Keeping Standards up-to-date**

Australian Standards® are living documents that reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued.

Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments that may have been published since the Standard was published.

Detailed information about Australian Standards, drafts, amendments and new projects can be found by visiting **[www.standards.org.au](http://www.standards.org.au)**

Standards Australia welcomes suggestions for improvements, and encourages readers to notify us immediately of any apparent inaccuracies or ambiguities. Contact us via email at **[mail@standards.org.au](mailto:mail@standards.org.au)**, or write to Standards Australia, GPO Box 476, Sydney, NSW 2001.

## PREFACE

This Standard was prepared by the Standards Australia Committee SF-041, General Principles for the Guarding of Machinery to supersede, (in part), AS 4024.2—1998, *Safeguarding of machinery, Part 2: Installation and commissioning requirements for electro-sensitive systems—Optoelectronic devices*.

In common with other Parts of AS 4024, this Standard is based upon documents originating within the European Community in the field of safety of machinery. Many of these European Standards are being adopted virtually unchanged as International Standards by the International Organization for Standardization (ISO) and the committee has agreed to continue to use material emanating from both CEN and ISO.

The Standard is based upon but not equivalent to ISO 13855:2002 *Safety of machinery—Positioning of protective equipment with respect to the approach of parts of the human body*.

The term ‘informative’ has been used in this Standard to define the application of the appendix to which it applies. An ‘informative’ appendix is only for information and guidance.

## CONTENTS

	<i>Page</i>
FOREWORD.....	4
1 SCOPE .....	5
2 OBJECTIVE.....	5
3 REFERENCED DOCUMENTS .....	5
4 DEFINITIONS .....	6
5 METHOD.....	7
6 GENERAL EQUATIONS FOR THE CALCULATION OF MINIMUM DISTANCES.....	9
7 CALCULATION OF MINIMUM DISTANCE FOR ELECTRO-SENSITIVE PROTECTIVE EQUIPMENT EMPLOYING ACTIVE OPTO-ELECTRONIC PROTECTIVE DEVICES .....	9
8 METHOD OF CALCULATING THE MINIMUM DISTANCES FOR GROUND LEVEL TRIP DEVICES .....	16
APPENDICES	
A WALKING SPEEDS AND STRIDE LENGTHS .....	18
B WORKED EXAMPLES .....	19
