## Australian/New Zealand Standard™

Interior and workplace lighting

Part 3: Measurement, calculation and presentation of photometric data

#### AS/NZS 1680.3:2017

This Joint Australian/New Zealand Standard was prepared by Joint Technical Committee LG-001, Interior Lighting. It was approved on behalf of the Council of Standards Australia on 10 May 2017 and by the New Zealand Standards Approval Board on 7 June 2017.

This Standard was published on 30 June 2017.

The following are represented on Committee LG-001:

Australian Building Codes Board
CIE Australia
Energy Efficiency and Conservation Authority of New Zealand
Engineers Australia
IES: The Lighting Society
Lighting Council Australia
Lighting Council New Zealand
Property Council of Australia
University of Sydney

### **Keeping Standards up-to-date**

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about joint Australian/New Zealand Standards can be found by visiting the Standards Web Shop at www.saiglobal.com or Standards New Zealand web site at www.standards.govt.nz and looking up the relevant Standard in the online catalogue.

For more frequent listings or notification of revisions, amendments and withdrawals, Standards Australia and Standards New Zealand offer a number of update options. For information about these services, users should contact their respective national Standards organization.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Please address your comments to the Chief Executive of Standards Australia or the New Zealand Standards Executive at the address shown on the back cover.

This Standard was issued in draft form for comment as DR AS 1680.3:2016.

#### **PREFACE**

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee LG-001, Interior and Workplace Lighting, to supersede AS 1680.3—1991, Interior lighting, Part 3: Measurement, calculation and presentation of photometric data.

The objective of this Standard is to specify for the Australian and New Zealand lighting industries, laboratory conditions, procedures and instrumentation for making photometric measurements on luminaires for interior and workplace lighting, together with requirements for the derivation of certain photometric data needed for interior lighting calculations.

This edition is a minor revision from AS 1680.3—1991 to introduce the measurement of solid state lighting devices such as LED lamps, LED modules and LED luminaires. The main body of the Standard is substantially unchanged from AS 1680.3—1991 and the photometry of solid state lighting is covered in Appendix I. It is expected that a major revision of this whole document will occur within the next five years after the publication of relevant technical reports currently in development by the CIE.

The terms 'normative' and 'informative' have been used in this Standard to define the application of the appendix to which they apply. A normative appendix is an integral part of a Standard, whereas an informative appendix is for information and guidance only.

## CONTENTS

		Page
SECTIO	ON 1 SCOPE AND GENERAL	
1.1	SCOPE	6
1.2	REFERENCED DOCUMENTS	
1.3	DEFINITIONS	
1.4	UNITS AND TERMINOLOGY	,
1.5	MEASUREMENT OF SOLID STATE LIGHTING DEVICES	
1.6	PHOTOMETRIC CENTRE	
1.7	CUT-OFF ANGLE REFERENCE POINT	
1.7	COORDINATE SYSTEMS FOR LUMINAIRES	
1.0	COORDINATE STSTEMS FOR EUMINAIRES	11
SECTIO	ON 2 LABORATORY CONDITIONS AND PROCEDURES	
2.1	SCOPE OF SECTION	15
2.2	LABORATORY MEASUREMENTS	15
2.3	LABORATORY FACILITIES	16
2.4	STATUS OF MEASUREMENTS	16
2.5	ELECTRIC POWER SUPPLY AND INDICATING INSTRUMENTS	17
2.6	TEMPERATURE CONTROL AND INDICATING INSTRUMENTS	
2.7	PHOTOCELLS AND ASSOCIATED APPARATUS	18
2.8	SELECTION OF LUMINAIRES FOR TEST	
2.9	SELECTION OF BALLASTS FOR USE WITH LUMINAIRES UNDER TEST	
2.10		
	UNDER TEST	
2.11		
	STANDARD MEASURING CONDITIONS FOR LUMINAIRES	_
	STANDARD MEASURING CONDITIONS FOR BARE LAMPS
