AS 2268—1979

Australian Standard

ELECTRICAL EQUIPMENT FOR EXPLOSIVE ATMOSPHERES

ELECTROSTATIC PAINT AND POWDER SPRAYGUNS

The following scientific, industrial and governmental organizations and departments were officially represented on the committee entrusted with the preparation of this standard:

Australian Coal Association

Australian Electrical Manufacturers Association

Confederation of Australian Industry

Department of Productivity

Department of Public Works, N.S.W.

Departments of Explosives

Departments of Labour and Industry

Departments of Mines

Electrical Contractors Associations of Australia

Insurance Council of Australia

Oil Companies

Statutory Electricity Authorities

Sydney County Council (Testing Interest)

This standard, prepared by Committee EL 14, Electrical Equipment in Hazardous Locations, was approved on behalf of the Council of the Standards Association of Australia on 24 April 1979, and was published on 1 August 1979.

Review of Australian Standards. To keep abreast of progress in industry, Australian Standards are subject to periodic review and are kept up to date by the issue of amendments or new editions as necessary. It is important therefore that Standards users ensure that they are in possession of the latest edition, and any amendments thereto.

Full details of all Australian Standards and related publications will be found in the Standards Australia Catalogue of Publications; this information is supplemented each month by the magazine 'The Australian Standard', which subscribing members receive, and which gives details of new publications, new editions and amendments, and of withdrawn Standards.

Suggestions for improvements to Australian Standards, addressed to the head office of Standards Australia, are welcomed. Notification of any inaccuracy or ambiguity found in an Australian Standard should be made without delay in order that the matter may be investigated and appropriate action taken.

PREFACE

This standard was prepared by the Association's Committee on Electrical Equipment for Hazardous Locations for the guidance of manufacturers, users, statutory authorities and associated interests, and for use with the SAA Wiring Rules. It prescribes requirements in respect of the design, construction and marking of electrostatic paint and powder sprayguns and associated apparatus and includes a section on testing.

In its terminology, definitions and general treatment of the subject, this standard takes into account a similar standard issued by the British Approvals Service for Electrical Equipment in Flammable Atmospheres (BASEEFA), viz—

BASEEFA Standard SFA 3010, Electrostatic Paint and Powder Spray Guns.

Acknowledgement is made of the assistance received from this source.

The standard requires reference to the following standards:

AS 1020	SAA Static Electricity Code		
AS 1021	Protection by Purging of Electrical Equipment for Explosive Atmospheres		
AS 1593	Increased Safety of Electrical Equipment for Explosive Atmospheres		
AS 1825	Pressurized Enclosure of Electrical Equipment for Explosive Atmospheres		
AS 1826	Special Protection of Electrical Equipment for Explosive Atmospheres		
AS 1829	Intrinsically Safe Electrical Apparatus for Explosive Atmospheres		
AS 1939	Classification of Degrees of Protection Provided by Enclosures for Electrical Equipment		
AS 2210	Safety Footwear		
AS 3000	Part 1—SAA Wiring Rules		
AS C98	Flameproof Enclosure of Electrical Equipment for Explosive Atmospheres		
AS C100	Approval and Test Specification for Definitions and General Requirements for Electrical Materials and Equipment		
BS 2050	Electrical Resistance of Conductive and Antistatic Products Made from Flexible Polymeric Material		
BS 5451	Electrically Conducting and Antistatic Rubber Footwear		

$@ \ Copyright - STANDARDS \ AUSTRALIA \\$

Users of Standards are reminded that copyright subsists in all Standards Australia publications and software. Except where the Copyright Act allows and except where provided for below no publications or software produced by Standards Australia may be reproduced, stored in a retrieval system in any form or transmitted by any means without prior permission in writing from Standards Australia. Permission may be conditional on an appropriate royalty payment. Requests for permission and information on commercial software royalties should be directed to the head office of Standards Australia.

Standards Australia will permit up to 10 percent of the technical content pages of a Standard to be copied for use exclusively in-house by purchasers of the Standard without payment of a royalty or advice to Standards Australia.

Standards Australia will also permit the inclusion of its copyright material in computer software programs for no royalty payment provided such programs are used exclusively in-house by the creators of the programs.

Care should be taken to ensure that material used is from the current edition of the Standard and that it is updated whenever the Standard is amended or revised. The number and date of the Standard should therefore be clearly identified.

The use of material in print form or in computer software programs to be used commercially, with or without payment, or in commercial contracts is subject to the payment of a royalty. This policy may be varied by Standards Australia at any time.
