

Programmable controllers

Part 4: User guidelines

This Australian Standard® was prepared by Committee IT-006, Industrial Process Measurement, Control and Automation. It was approved on behalf of the Council of Standards Australia on 14 November 2014.
This Standard was published on 19 December 2014.

The following are represented on Committee IT-006:

- Australian Computer Society
 - Australian Industry Group
 - Australian Petroleum Production and Exploration Association
 - Australian Safety Critical Systems Association
 - Consult Australia
 - Engineers Australia
 - Institute of Chemical Engineers Australia
 - Institute of Instrumentation, Control and Automation Australia
 - ISACA
 - Process Control Society
 - University of Queensland
 - Workplace Health and Safety Queensland
-

This Standard was issued in draft form for comment as DR AS IEC 61131.4:2014.

Standards Australia wishes to acknowledge the participation of the expert individuals that contributed to the development of this Standard through their representation on the Committee and through the public comment period.

Keeping Standards up-to-date

Australian Standards® are living documents that reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued.

Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments that may have been published since the Standard was published.

Detailed information about Australian Standards, drafts, amendments and new projects can be found by visiting www.standards.org.au

Standards Australia welcomes suggestions for improvements, and encourages readers to notify us immediately of any apparent inaccuracies or ambiguities. Contact us via email at mail@standards.org.au, or write to Standards Australia, GPO Box 476, Sydney, NSW 2001.

PREFACE

This Standard was prepared by the Standards Australia Committee IT-006, Industrial Process Measurement, Control and Automation, to supersede AS IEC 61131.4—2004.

The objective of this Standard is to introduce the end-users of Programmable Controllers (PLCs) to the AS IEC 61131 series, and to assist the end-users in their selection and specification of PLC equipment according to the AS IEC 61131 series. This user guideline has as its main audience PLC end-users.

This Standard should be read in conjunction with the other parts of the AS IEC 61131 series.

This Standard is identical with, and has been reproduced from, IEC/TR 61131-4, Ed. 2.0 (2004), *Programmable controllers—Part 4: User guidelines*.

This edition differs extensively from the previous (2004) edition. Whereas the previous edition was mainly tutorial in nature, this edition aims to provide an engineering overview of the AS IEC 61131 series for those end-users of PLCs who may not be expected to delve into the extensive details of the AS 61131 series, but wish to understand the benefit of using AS IEC 61131 compliant PLCs.

As this Standard is reproduced from an International Standard, the following applies:

- (a) In the source text ‘this part of IEC 61131’ should read ‘this Australian Standard’.
- (b) A full point substitutes for a comma when referring to a decimal marker.

References to International Standards should be replaced by references to Australian or Australian/New Zealand Standards, as follows:

<i>Reference to International Standard</i>	<i>Australian Standard</i>
IEC	AS IEC
61131 Programmable controllers	61131 Programmable controllers
61131-1 Part 1: General information	61131.1 Part 1: General information
61131-2 Part 2: Equipment requirements and tests	61131.2 Part 2: Equipment requirements and tests
61131-3 Part 3: Programming languages	61131.3 Part 3: Programming languages
61131-5 Part 5: Communications	61131.5 Part 5: Communications
61131-7 Part 7: Fuzzy control programming	61131.7 Part 7: Fuzzy control programming
61131-8 Part 8: Guidelines for the application and implementation of programming languages	61131.8 Part 8: Guidelines for the application and implementation of programming languages

The term ‘informative’ has been used in this Standard to define the application of the annex to which it applies. An ‘informative’ annex is only for information and guidance.

CONTENTS

1	General	8
1.1	Scope and object.....	8
1.2	Normative references	9
1.3	Use of this report.....	9
2	Terms and definitions	10
3	General recommendations for installation.....	11
3.1	Environmental conditions	11
3.2	Field wiring.....	11
3.3	Electromagnetic compatibility	12
3.4	User system markings	13
4	PLC in functional safety applications	13
4.1	Functional safety and safety-related-system concept.....	13
4.2	Using a PLC in a safety-related application	15
4.3	Requirements on PLCs in a safety-related system.....	16
4.4	Integration of PLC into a safety-related system	16
	Annex A (informative) Overview of normative parts of IEC 61131.....	19
A.1	Overview of IEC 61131-1.....	19
A.2	Overview of IEC 61131-2.....	26
A.3	Overview of IEC 61131-3.....	59
A.4	(blank).....	88
A.5	Overview of IEC 61131-5.....	88
A.6	(blank).....	100
A.7	Overview of IEC61131-7.....	100
A.8	(blank).....	107
	Annex B (informative) Conformity to IEC 61131 and product certification.....	108
B.1	General	108
B.2	Conformity to standards	108
B.3	Declaration of conformity and certification	109
B.4	The inter-relation of standards to laws in European Community.....	109
B.5	CE-marking of PLCs in the European Union	111
B.6	Transition periods.....	113
B.7	Other jurisdictions	114
B.8	Reference documents.....	115
	Annex C (informative) Use of PLC programming languages and examples.....	116
C.1	Preamble.....	116
C.2	Advance planning	116
C.3	Structure and organization	117
C.4	Use of PLC languages.....	120
