

AS 3630.1—1988  
ISO 8630-1:1987

Australian Standard<sup>®</sup>

---

**INFORMATION PROCESSING—  
DATA INTERCHANGE ON 130 mm  
(5.25 in) FLEXIBLE DISK  
CARTRIDGES USING MODIFIED  
FREQUENCY MODULATION  
RECORDING AT 13 262 ftprad,  
ON 80 TRACKS ON EACH SIDE**

**Part 1—DIMENSIONAL, PHYSICAL  
AND MAGNETIC  
CHARACTERISTICS**

---

This Australian Standard was prepared by Committee IS/1, Information Processing Systems. It was approved on behalf of the Council of the Standards Association of Australia on 21 November 1988 and published on 12 December 1988.

---

The following interests are represented on Committee IS/1:

- Australian Association of Permanent Building Societies
- Australian Bankers' Association
- Australian Bureau of Statistics
- Australian Computer Equipment Manufacturers Association
- Australian Computing Services Association
- Australian Computer Users Association
- Australian Information Industry Association
- Canberra College of Advanced Education
- CSIRO, Division of Information Technology
- Department of Defence
- Department of Industry, Technology and Commerce
- Latrobe University
- Life Insurance Federation of Australia
- Public Service Board, N.S.W.
- Telecom Australia
- University of Technology, Sydney

---

**Review of Australian Standards.** To keep abreast of progress in industry, Australian Standards are subject to periodic review and are kept up to date by the issue of amendments or new editions as necessary. It is important therefore that Standards users ensure that they are in possession of the latest edition, and any amendments thereto.

Full details of all Australian Standards and related publications will be found in the Standards Australia Catalogue of Publications; this information is supplemented each month by the magazine 'The Australian Standard', which subscribing members receive, and which gives details of new publications, new editions and amendments, and of withdrawn Standards.

Suggestions for improvements to Australian Standards, addressed to the head office of Standards Australia, are welcomed. Notification of any inaccuracy or ambiguity found in an Australian Standard should be made without delay in order that the matter may be investigated and appropriate action taken.

## PREFACE

This Standard was prepared by the Association's Committee on Information Processing Systems. It is identical with and has been reproduced from International Standard ISO 8630-1, drawn up by ISO TC 97, Information Processing Systems.

It is part of an ongoing program of review and addition of Input/Output Media Standards.

For the purpose of this Australian Standard, the text of this ISO Standard should be modified as follows:

- (a) *Terminology*—The words 'Australian Standard' should replace the words 'International Standard' wherever they appear.
- (b) *Cross-reference*—The references to International Standards should be replaced by reference to Australian Standards as follows:

<i>Reference to International Standards</i>		<i>Relevant Australian Standard</i>	
ISO		AS	
646	Information processing—ISO 7-bit coded character set for information interchange	1726	Information processing—7-bit coded character set for information processing
2022	Information processing—ISO 7-bit and 8-bit coded character sets—code extension techniques	1953	Information processing—ISO 7-bit and 8-bit coded character sets—Code extension techniques
6429	Information processing—7-bit and 8-bit coded character sets—Additional control functions for character-imaging devices	2761	Information processing—7-bit and 8-bit coded character sets—Additional control functions for character-imaging devices

## © Copyright — STANDARDS AUSTRALIA

Users of Standards are reminded that copyright subsists in all Standards Australia publications and software. Except where the Copyright Act allows and except where provided for below no publications or software produced by Standards Australia may be reproduced, stored in a retrieval system in any form or transmitted by any means without prior permission in writing from Standards Australia. Permission may be conditional on an appropriate royalty payment. Requests for permission and information on commercial software royalties should be directed to the head office of Standards Australia.

Standards Australia will permit up to 10 percent of the technical content pages of a Standard to be copied for use exclusively in-house by purchasers of the Standard without payment of a royalty or advice to Standards Australia.

Standards Australia will also permit the inclusion of its copyright material in computer software programs for no royalty payment provided such programs are used exclusively in-house by the creators of the programs.

Care should be taken to ensure that material used is from the current edition of the Standard and that it is updated whenever the Standard is amended or revised. The number and date of the Standard should therefore be clearly identified.

The use of material in print form or in computer software programs to be used commercially, with or without payment, or in commercial contracts is subject to the payment of a royalty. This policy may be varied by Standards Australia at any time.
