

Australian Standard™

Wood processing machinery—Safety

Part 7: Finishing machinery—Tenoning, profiling and edge-banding machines

This Australian Standard was prepared by Committee SF-007, Guarding of Woodworking Machinery. It was approved on behalf of the Council of Standards Australia on 20 January 2005.
This Standard was published on 11 February 2005.

The following are represented on Committee SF-007:

Australian Chamber of Commerce and Industry
Australian Industry Group
Australian Woodworking Industry Suppliers Association
Construction, Forestry, Mining and Energy Union
Department for Administrative and Information Services South Australia
Department of Infrastructure, Energy and Resources, Tas.
Furnishing Teachers Advising Group
Metal Trades Industry Association
Safety Institute of Australia
Tasmanian Timber Promotion Board
Victorian Association of Forest Industries
Victorian WorkCover Authority
WorkSafe Western Australia

Keeping Standards up-to-date

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about Standards can be found by visiting the Standards Web Shop at www.standards.com.au and looking up the relevant Standard in the on-line catalogue.

Alternatively, the printed Catalogue provides information current at 1 January each year, and the monthly magazine, *The Global Standard*, has a full listing of revisions and amendments published each month.

Australian Standards™ and other products and services developed by Standards Australia are published and distributed under contract by SAI Global, which operates the Standards Web Shop.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Contact us via email at mail@standards.org.au, or write to the Chief Executive, Standards Australia, GPO Box 5420, Sydney, NSW 2001.

PREFACE

This Standard was prepared by the Standards Australia Committee SF-007, Guarding of Woodworking Machinery as a revision, in part, of AS 1473—1991, *Guarding and safe use of woodworking machinery*.

This Standard is one of a series of Standards dealing with the safety of woodworking machinery, which have been developed as a result of requests from regulatory authorities for a new edition of the Standard.

In common with many of the Standards dealing with the safeguarding of machinery this Standard is based upon drafts released by the European Committee for Standardization, CEN. In using these drafts the Committee is maintaining consistency with the machinery safeguarding Standards published in Australia.

This Standard specifies the requirements which are unique to tenoning, profiling and edge-banding machines. The requirements applicable to all woodworking machines are to be found in AS 1473.2, *Wood processing machinery—Safety, Part 2: Finishing machinery—Common requirements*.

The terms ‘normative’ and ‘informative’ have been used in this Standard to define the application of the appendix to which they apply. A ‘normative’ appendix is an integral part of a Standard, whereas an ‘informative’ appendix is only for information and guidance.

CONTENTS

	<i>Page</i>
SECTION 1 SCOPE AND GENERAL	
1.1 SCOPE	5
1.2 OBJECTIVE.....	5
1.3 REFERENCED DOCUMENTS	5
1.4 DEFINITIONS	5
 SECTION 2 SPECIFIC REQUIREMENTS FOR SINGLE END TENONING OR PROFILING MACHINES WITH MANUAL FEED	
2.1 SCOPE OF SECTION	12
2.2 CONTROLS	12
2.3 PROTECTION AGAINST MECHANICAL HAZARDS	14
2.4 PROTECTION AGAINST NON-MECHANICAL HAZARDS.....	18
2.5 WARNING LABEL	19
2.6 AVAILABLE OPERATING SPEEDS NOTICE	19
2.7 INSTRUCTION HANDBOOK.....	19
2.8 SAFE WORKING PRACTICE.....	19
 SECTION 3 SPECIFIC REQUIREMENTS FOR SINGLE ENDED TENONING OR PROFILING MACHINES WITH MECHANICAL FEED	
3.1 SCOPE OF SECTION	20
3.2 CONTROLS	20
3.3 PROTECTION AGAINST MECHANICAL HAZARDS	21
3.4 ISOLATION.....	23
3.5 INSTRUCTION HANDBOOK.....	24
3.6 SAFE WORKING PRACTICES	24
 SECTION 4 SPECIFIC REQUIREMENTS FOR DOUBLE ENDED TENONING OR PROFILING MACHINES WITH MECHANICAL FEED	
4.1 SCOPE OF SECTION	25
4.2 CONTROLS	25
4.3 PROTECTION AGAINST MECHANICAL HAZARDS	26
4.4 WARNING LABEL	30
4.5 AVAILABLE OPERATING SPEED NOTICE	30
4.6 INSTRUCTION HANDBOOK.....	30
4.7 SAFE WORKING PRACTICES	30
 SECTION 5 SPECIFIC REQUIREMENTS FOR MULTIPLE SAW PROFILING STATION MACHINES WITH OR WITHOUT MECHANICAL FEED	
5.1 SCOPE OF SECTION	31
5.2 CONTROLS	31
5.3 PROTECTION AGAINST MECHANICAL HAZARDS	32
5.4 AVAILABLE OPERATING SPEEDS NOTICE	38
5.5 TOP PRESSURE ADJUSTMENT NOTICE	38
5.6 INSTRUCTION HANDBOOK.....	38
5.7 SAFE WORKING PRACTICES	38
