

Australian Standard™

**Telecommunication cables—Insulation,
sheath and jacket**

This Australian Standard was prepared by Committee CT-001, Communications Cabling. It was approved on behalf of the Council of Standards Australia on 14 November 2002 and published on 16 May 2003.

The following are represented on Committee CT-001:

Australian Chamber of Commerce and Industry
Australian Communications Authority
Australian Communications Industry Forum
Australian Electrical and Electronic Manufacturers Association
Australian Information Industry Association
Australian Telecommunications Users Group
BICSI Australia
Electrical Compliance Testing Association
Electrical Regulatory Authorities Council
Electrical Supply Association of Australia
Institute of Engineers Australia
National Electrical and Communications Association
New Zealand Consulting Interests
New Zealand Defence Force
Plastics and Chemicals Industry Association
SingTel Optus
Telecom New Zealand
Telstra Corporation Limited
Vendor Interests New Zealand

Additional interests participating in the preparation of this Standard:

Elf Atochem (Australia) Pty Limited
Corning Cables Australia
Qenos Pty Ltd
General Cables Aust Ltd
Pirelli Power Cables and Systems
Ponga Donga Pty Ltd
Compco Pty Ltd
Belden Australia Pty Ltd

Keeping Standards up-to-date

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about Standards can be found by visiting the Standards Australia web site at www.standards.com.au and looking up the relevant Standard in the on-line catalogue.

Alternatively, the printed Catalogue provides information current at 1 January each year, and the monthly magazine, *The Australian Standard*, has a full listing of revisions and amendments published each month.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Contact us via email at mail@standards.com.au, or write to the Chief Executive, Standards Australia International Ltd, GPO Box 5420, Sydney, NSW 2001.

This Standard was issued in draft form for comment as DR 01094.

AS 1049—2003

PREFACE

This Standard was prepared by the Standards Australia Committee CT-001, Communications Cabling, to supersede AS 1049—2000. In the course of preparation, this Standard has incorporated relevant material from UL 444, *Standard for Safety for Communications Cables*.

The objective of this Standard is to provide polymer manufacturers, telecommunication cable manufacturers and end users with requirements and test methods for plastics used in telecommunication cables insulation, sheathing and jackets in order to maintain quality control and acceptance levels at the various stages of manufacture.

The objective of this revision is to incorporate requirements for additional materials used for insulation, sheaths and jackets.

The terms ‘normative’ and ‘informative’ have been used in this Standard to define the application of the appendix to which they apply. A ‘normative’ appendix is an integral part of a Standard, whereas an ‘informative’ appendix is only for information and guidance. Thirty six test methods are set out in normative appendices.

Statements expressed in mandatory terms in footnotes and notes to tables are deemed to be requirements of this Standard.

CONTENTS

	<i>Page</i>
SECTION 1 SCOPE AND GENERAL.....	6
1.1 SCOPE.....	6
1.2 APPLICATION	6
1.3 MATERIAL SELECTION.....	10
1.4 REFERENCED DOCUMENTS.....	12
1.5 DEFINITIONS.....	13
1.6 ACRONYMS.....	16
SECTION 2 PE INSULATION	18
2.1 SCOPE OF SECTION	18
2.2 COMPOUND.....	19
2.3 INSULATION	20
SECTION 3 PA 12 SOLID INSULATION.....	27
3.1 SCOPE OF SECTION	27
3.2 INSULATION TESTS.....	27
SECTION 4 NON-HALOGENATED PPO-BASED MATERIAL (CONTAINING A FIRE/FLAME RETARDANT) FOR SOLID INSULATION.....	28
4.1 SCOPE OF SECTION	28
4.2 INSULATION TESTS.....	28
SECTION 5 PVC SOLID INSULATION.....	30
5.1 SCOPE OF SECTION	30
5.2 INSULATION TESTS.....	30
SECTION 6 PP SOLID INSULATION	32
6.1 SCOPE OF SECTION	32
6.2 INSULATION TESTS.....	32
SECTION 7 PE SHEATH OR PE JACKET	33
7.1 SCOPE OF SECTION	33
7.2 COMPOUND.....	33
7.3 SHEATH OR JACKET.....	35
SECTION 8 POLYAMIDE JACKET	38
8.1 SCOPE OF SECTION	38
8.2 COMPOUND.....	38
8.3 JACKET	39
SECTION 9 INTEGRALLY BONDED PE SHEATH AND POLYAMIDE JACKET	41
9.1 GENERAL.....	41
9.2 COMPOUND.....	41
9.3 INTEGRALLY-BONDED SHEATH AND JACKET	41
