PREFACE

This standard was prepared by the Association's Committee on Power Switchgear.

It forms Part 2 of a two-part standard on high voltage testing techniques. Part 1 — General Requirements, Test Requirements, Test Procedures and Measuring Devices has already been published.

This Part is complementary to Part 1 and is intended to provide information on measuring systems and devices to enable specified requirements for accuracy to be achieved.

The standard is based on IEC Doc.42(Central Office)27, High Voltage Test Techniques, Measuring Devices, Application Guide, and acknowledgment is made of the assistance received therefrom.

In the use of this standard, reference to the following standards may be necessary:

AS 1243 Voltage Transformers for Measurement and Protection

AS C329 Method for the Measurement of Voltage with Sphere-gaps
(One Sphere Earthed)
