

AS/NZS 61058.1:2002

AS/NZS 61058.1

Australian/New Zealand Standard™

Switches for appliances

**Part 1: General requirements
(IEC 61058.1:2000 MOD)**

AS/NZS 61058.1:2002

This Joint Australian/New Zealand Standard was prepared by Joint Technical Committee EL-004, Electrical Accessories. It was approved on behalf of the Council of Standards Australia on 29 January 2002 and on behalf of the Council of Standards New Zealand on 19 February 2002. It was published on 14 March 2002.

The following interests are represented on Committee EL-004:

Australasian Railway Association
Australian Chamber of Commerce and Industry
Australian Electrical and Electronic Manufacturers Association
Canterbury Manufacturers Association, New Zealand
Consumer Electronic Suppliers Association
Electricity Supply Association of Australia
Energy Safety Service, New Zealand
International Accreditation New Zealand
National Electrical and Communications Association
Plastics and Chemicals Industries Association
Regulatory Authorities (Electrical), Australia
Testing Interests (Australia)

Keeping Standards up-to-date

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about joint Australian/New Zealand Standards can be found by visiting the Standards Australia web site at www.standards.com.au or Standards New Zealand web site at www.standards.co.nz and looking up the relevant Standard in the on-line catalogue.

Alternatively, both organizations publish an annual printed Catalogue with full details of all current Standards. For more frequent listings or notification of revisions, amendments and withdrawals, Standards Australia and Standards New Zealand offer a number of update options. For information about these services, users should contact their respective national Standards organization.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Please address your comments to the Chief Executive of either Standards Australia International or Standards New Zealand at the address shown on the back cover.

PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee EL-004, Electrical Accessories to supersede AS/NZS 3139.1:1995, *Approval and test specification—Switches for appliances*, Part 1: *General requirements*, from date of publication.

The objective of this Standard is to provide Australian and New Zealand electrical industries with general electrical safety requirements for switches for appliances. This Standard does not apply to cord-line switches within the scope of AS/NZS 3127:2002, *Approval and test specification—Cord-line switches*.

This Standard is an adoption with national modifications and has been reproduced from the third edition of IEC 61058-1:2000, *Switches for appliances*, Part 1: *General requirements*, and has been varied as indicated to take account of Australian/New Zealand conditions.

Variations to IEC 61058-1:2000 are indicated at the appropriate places throughout this Standard. Strikethrough (~~example~~) identifies IEC tables, figures and passages of text which, for the purposes of this Australian/New Zealand Standard, are deleted. Where Australian/New Zealand tables, figures or passages of text are added, each is set in its proper place and identified by shading (**example**). Added figures are not themselves shaded, but are identified by a shaded border.

These variations also form the Australian national variations for purposes of the IEC scheme for recognition of results of testing to Standards for safety of electrical equipment (the CB scheme).

A reference to an International Standard identified in the Normative References Clause by strikethrough (~~example~~) is replaced by a reference to the Australian or Australian/New Zealand Standard(s) listed immediately thereafter and identified by shading (**example**). Where the struck-through referenced document and the referenced Australian or Australian/New Zealand Standard are identical, this is indicated in parenthesis after the title of the latter.

The terms ‘normative’ and ‘informative’ have been used in this Standard to define the application of the annex to which they apply. A ‘normative’ annex is an integral part of a Standard, whereas an ‘informative’ annex is only for information and guidance.

In this Standard, the following print types are used:

- requirements proper: in arial type;
- *test specifications: in italic type;*
- explanatory matter: in smaller arial type.

This Standard will replace AS 3133 (NZS/AS 3133):1989, *Approval and test specification—Air break switches*, 5 years from date of publication, in so far as that Standard presently applies to switches for appliances.

As this Standard is reproduced from an International Standard, the following applies:

- (a) Its number does not appear on each page of text and its identity is shown only on the cover and title page.
- (b) In the source text ‘this standard’ should read ‘this Australian/New Zealand Standard’.
- (c) A full point should be substituted for a comma when referring to a decimal marker.

This Standard does not purport to include all the necessary conditions of a contract.

CONTENTS

	<i>Page</i>
1 Scope	1
2 Normative references.....	2
3 Definitions	7
3.1 General terms.....	7
3.2 Definitions relating to voltages, currents and wattage	10
3.3 Definitions relating to the different types of switches.....	12
3.4 Definitions relating to the operation of the switch.....	13
3.5 Definitions relating to connections to the switch.....	14
3.6 Definitions relating to terminals and terminations	15
3.7 Definitions relating to insulation	17
3.8 Definitions relating to pollution.....	18
4 General requirements	18
5 General notes on tests.....	18
6 Rating.....	22
7 Classification	23
7.1 Classification of switches.....	23
7.2 Classification of terminals.....	28
8 Marking and documentation	37
9 Protection against electric shock.....	46
10 Provision for earthing.....	48
11 Terminals and terminations.....	50
11.1 Terminals for copper conductors.....	50
12 Construction	59
12.1 Constructional requirements relating to protection against electric shock.....	59
12.2 Constructional requirements relating to safety during mounting and normal operation of the switch.....	60
12.3 Constructional requirements relating to the mounting of switches and to the attachment of cords	61
13 Mechanism	61
14 Protection against solid foreign objects, ingress of dust, water, and humid conditions..	62
14.1 Protection against solid foreign objects.....	62
14.2 Protection against ingress of dust.....	63
14.3 Protection against ingress of water	63
14.4 Protection against humid conditions.....	64
15 Insulation resistance and dielectric strength.....	65
16 Heating.....	67
16.1 General requirements	67
16.2 Contacts and terminals	67
16.3 Other parts	69
17 Endurance	74
17.1 General requirements	74
17.2 Electrical endurance tests.....	78
