

AS 1216—1995

Australian Standard[®]

Class labels for dangerous goods

This Australian Standard was prepared by Committee CH/9, Safe Handling of Chemicals. It was approved on behalf of the Council of Standards Australia on 20 January 1995 and published on 5 May 1995.

The following interests are represented on Committee CH/9:

Australian Chemical Specialities Manufacturers Association
Australian Conservation Foundation
Australian Fire Authorities Council
Australian Government Analytical Laboratories
Australian Institute of Petroleum
Australian Paint Manufacturers Federation
Department for Industrial Affairs, S.A.
Department of Defence
Department of Minerals and Energy, Western Australia
Environment Protection Authority of New South Wales
Melbourne Water
National Association for Crop Protection and Animal Health
National Association of Testing Authorities, Australia
National Occupational Health and Safety Commission
Occupational Health and Safety Authority, Vic.
Plastics and Chemicals Industry Association
Queensland Department of Transport
Railways of Australia Committee
Tasmania Development and Resources
Work Health Authority, N.T.
WorkCover Authority, N.S.W

Review of Australian Standards. To keep abreast of progress in industry, Australian Standards are subject to periodic review and are kept up to date by the issue of amendments or new editions as necessary. It is important therefore that Standards users ensure that they are in possession of the latest edition, and any amendments thereto.

Full details of all Australian Standards and related publications will be found in the Standards Australia Catalogue of Publications; this information is supplemented each month by the magazine 'The Australian Standard', which subscribing members receive, and which gives details of new publications, new editions and amendments, and of withdrawn Standards.

Suggestions for improvements to Australian Standards, addressed to the head office of Standards Australia, are welcomed. Notification of any inaccuracy or ambiguity found in an Australian Standard should be made without delay in order that the matter may be investigated and appropriate action taken.

PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee CH/9 on Safe Handling of Chemicals to supersede AS 1216, Part 1—1984: *Classification, hazard identification and information systems for dangerous goods*, Part 1: *Classification and class labels for dangerous goods*.

This Standard is the result of a consensus among Australian and New Zealand representatives on the Joint Committee to produce it as an Australian Standard.

AS 1216 is one of a series of Standards planned, published or being developed for the storage and handling of dangerous goods. Other published Standards in the series are:

AS

- 1596 LP gas—Storage and handling
- 1678 Emergency procedure guide—Transport
- 1894 Code of practice for the safe handling of cryogenic fluids
- 1940 The storage and handling of flammable and combustible liquids
- 2022 Anhydrous ammonia—Storage and handling (known as the SAA Anhydrous Ammonia Code)
- 2507 The storage and handling of pesticides
- 2508 Safe storage and handling information cards for hazardous materials
- 2714 The storage and handling of hazardous chemical materials—Class 5.2 substances (organic peroxides)
- 2927 The storage and handling of liquefied chlorine gas
- 2931 Selection and use of emergency procedure guides for the transport of dangerous goods
- 3780 The storage and handling of corrosive substances
- 3961 Liquefied natural gas—Storage and handling
- 4081 The storage, handling and transport of liquid and liquefied polyfunctional isocyanates

The objective of this Standard is to provide users of dangerous goods with information on the design and selection of Class and Subsidiary Risk labels, based on the requirements of the sixth edition of the *Australian Dangerous Goods Code* (ADG Code), and provides an example of each label for the production of correct labels. The content of this Standard is in accordance with the tenth revised edition of the United Nations *Recommendations on the transport of dangerous goods*, which is adopted internationally in various codes for the transport of dangerous goods.

In this edition of the Standard the previously-appearing information on dangerous goods classification, all of which is contained in the ADG Code, has been deleted and the title of the Standard has been changed accordingly; further, the previously-mentioned large replicas of labels have been newly incorporated in the Standard. Both of these changes have been made in order to increase the suitability of this Standard for its intended purpose.

CONTENTS

	<i>Page</i>
SECTION 1 SCOPE AND GENERAL	
1.1 SCOPE	4
1.2 APPLICATION	4
1.3 REFERENCED AND RELATED DOCUMENTS	4
1.4 DEFINITIONS	4
SECTION 2 CLASS LABELS, SUBSIDIARY RISK LABELS AND MIXED CLASS LABELS	
2.1 ASSIGNMENT OF LABELS	6
2.2 LABEL DESIGNS	6
2.3 SPECIFICATIONS FOR CLASS AND MIXED CLASS LABELS	8
2.4 SPECIFICATIONS FOR SUBSIDIARY RISK LABELS	9

Originated as AS 1216.1—1976.
Previous edition 1984.
Fourth edition 1995.

Users of Standards are reminded that copyright subsists in all Standards Australia publications and software. Except where the Copyright Act allows and except where provided for below no publications or software produced by Standards Australia may be reproduced, stored in a retrieval system in any form or transmitted by any means without prior permission in writing from Standards Australia. Permission may be conditional on an appropriate royalty payment. Requests for permission and information on commercial software royalties should be directed to the head office of Standards Australia.

Standards Australia will permit up to 10 percent of the technical content pages of a Standard to be copied for use exclusively in-house by purchasers of the Standard without payment of a royalty or advice to Standards Australia.

Standards Australia will also permit the inclusion of its copyright material in computer software programs for no royalty payment provided such programs are used exclusively in-house by the creators of the programs.

Care should be taken to ensure that material used is from the current edition of the Standard and that it is updated whenever the Standard is amended or revised. The number and date of the Standard should therefore be clearly identified.

The use of material in print form or in computer software programs to be used commercially, with or without payment, or in commercial contracts is subject to the payment of a royalty. This policy may be varied by Standards Australia at any time.
