AS/NZS 3010:2005

Australian/New Zealand Standard™

## Electrical installations—Generating sets

## **AS/NZS 3010:2005**

This Joint Australian/New Zealand Standard was prepared by Joint Technical Committee EL-001, Wiring Rules. It was approved on behalf of the Council of Standards Australia on 11 May 2005 and on behalf of the Council of Standards New Zealand on 20 May 2005. This Standard was published on 27 June 2005.

---

The following are represented on Committee EL-001:

Association of Consulting Engineers Australia  
Australian Building Codes Board  
Australian Electrical and Electronic Manufacturers Association  
Canterbury Manufacturers Association New Zealand  
Communications, Electrical Plumbing Union  
Consumers' Federation of Australia  
Electrical and Communications Association, Queensland  
Electrical Contractors Association of New Zealand  
Electrical Regulatory Authorities Council  
Electrical Safety Organisation (New Zealand)  
ElectroComms & Energy Utilities Industry Skills Council  
Energy Networks Association  
Engineers Australia  
Institute of Electrical Inspectors  
Ministry of Economic Development (New Zealand)  
National Electrical and Communications Association  
New Zealand Council of Elders  
New Zealand Electrical Institute  
Telstra Corporation Limited

### **Keeping Standards up-to-date**

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about joint Australian/New Zealand Standards can be found by visiting the Standards Web Shop at [www.standards.com.au](http://www.standards.com.au) or Standards New Zealand web site at [www.standards.co.nz](http://www.standards.co.nz) and looking up the relevant Standard in the on-line catalogue.

Alternatively, both organizations publish an annual printed Catalogue with full details of all current Standards. For more frequent listings or notification of revisions, amendments and withdrawals, Standards Australia and Standards New Zealand offer a number of update options. For information about these services, users should contact their respective national Standards organization.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Please address your comments to the Chief Executive of either Standards Australia or Standards New Zealand at the address shown on the back cover.

---

*This Standard was issued in draft form for comment as DR 03312.*

## PREFACE

This Standard was prepared by the joint Standards Australia/Standards New Zealand Committee EL-001, Wiring rules, to supersede AS 3010.1—1987.

The objective of the Standard is to establish safety requirements for the use of generating sets for the supply of electricity at voltages normally exceeding 50 V a.c. or 120 V d.c.

Major changes to AS 3010.1—1987 are as follows:

- (a) The Standard has become a single Standard (i.e. without parts) as some types of generators listed in the previous preface such as—
  - (i) rotary converters;
  - (ii) static invertors;
  - (iii) hydro and wind driven generators; and
  - (iv) photovoltaic arraysmay be covered by other publications.
- (b) Switching of the normal supply neutral is not allowed for MEN earthing systems.
- (c) The inclusion of guidance connection drawings.
- (d) Changes of terminology to align with AS/NZS 3000.
- (e) It is published as a joint Australian/New Zealand Standard.

## CONTENTS

	<i>Page</i>
<b>SECTION 1 SCOPE AND GENERAL</b>	
1.1 SCOPE .....	4
1.2 APPLICATION .....	4
1.3 REFERENCED DOCUMENTS .....	5
1.4 DEFINITIONS .....	5
<b>SECTION 2 GENERAL REQUIREMENTS FOR THE INSTALLATION OF GENERATING SETS</b>	
2.1 GENERAL .....	6
2.2 LOCATION.....	6
2.3 MECHANICAL AND THERMAL PROTECTION .....	6
2.4 CONTROL OF GENERATING SET .....	7
2.5 ELECTRICAL INSTALLATION.....	7
<b>SECTION 3 ADDITIONAL REQUIREMENTS FOR PERMANENTLY CONNECTED GENERATING SETS</b>	
3.1 GENERAL .....	21
3.2 LOCATION.....	21
3.3 GUARDING OF LIVE PARTS .....	22
3.4 EARTHING OF HIGH VOLTAGE GENERATING SETS.....	22
3.5 TRANSFORMERS.....	22
3.6 ADDITIONAL REQUIREMENTS FOR GENERATING SETS FOR EMERGENCY SUPPLY SYSTEMS AND ESSENTIAL SAFETY SERVICES.....	23
<b>SECTION 4 ADDITIONAL REQUIREMENTS FOR PLUG AND SOCKET-OUTLET CONNECTED GENERATING SETS</b>	
4.1 GENERAL .....	25
4.2 EARTHING AND BONDING .....	25
4.3 CONNECTION TO AN ELECTRICAL INSTALLATION.....	26
4.4 CONTROL OF SOCKET-OUTLETS.....	26
