AS 3794.1—1991
ISO/IEC 9593–1 1990

Australian Standard®

Computer graphics—Programmer's Hierarchical Interactive Graphics System (PHIGS) language bindings—Part 1 FORTRAN

This is a free page sample. Access the full version online.

This Australian Standard was prepared by Committee IT/3, Computer Related Graphics. It was approved on behalf of the Council of Standards Australia on 15 October 1990 and published on 18 February 1991.

The following interests are represented on Committee IT/3:

ACADS

Association of Consulting Engineers Australia

Australian Vice Chancellors Committee

Department of Defence

Royal Australian Institute of Architects

Telecom Australia

Review of Australian Standards. *To keep abreast of progress in industry, Australian Standards are subject to periodic review and are kept up-to-date by the issue of amendments or new editions as necessary. It is important therefore that Standards users ensure that they are in possession of the latest edition, and any amendments thereto.*

Full details of all Australian Standards and related publications will be found in the Standards Australia Catalogue of Publications; this information is supplemented each month by the magazine 'The Australian Standard', which subscribing members receive, and which gives details of new publications, new editions and amendments, and of withdrawn Standards.

Suggestions for improvements to Australian Standards, addressed to the head office of Standards Australia, are welcomed. Notification of any inaccuracy or ambiguity found in an Australian Standard should be made without delay in order that the matter may be investigated and appropriate action taken.

PREFACE

This Standard was prepared by the Standards Australia Committee on Computer Related Graphics. It is identical with and has been reproduced from ISO/IEC 9593-1: 1990: Computer graphics—*Programmer's Hierarchical Interactive Graphics System (PHIGS) language bindings*—Part 1: *FORTRAN*.

Under arrangements made between Standards Australia and the International Standards Bodies, ISO and IEC, as well as certain other Standards organizations, users of this Australian Standard are advised of the following:

(a) Copyright is vested in Standards Australia.

(b) The number of this Standard is not reproduced on each page; its identity is shown only on the cover and title pages.

For the purpose of this Australian Standard, the ISO/IEC text should be modified as follows:

(a) *Terminology* The words 'Australian Standard' should replace the words 'International Standard' wherever they appear.

(b) *References* The references to International Standards should be replaced by references to Australian Standards as follows:

Reference to International Standard		*Australian Standard*	
ISO		AS	
1539	Programming languages—FORTRAN	1486	Programming language—FORTRAN
ISO/IEC			
9592	Information processing systems—Computer graphics—Programmer's Hierarchical Interactive Graphics System (PHIGS)—	3732	Computer graphics—Programmer's Hierarchical Interactive Graphics System (PHIGS)
9592-1	Part 1: Functional description	3732.1	Part 1: Functional description

© Copyright — STANDARDS AUSTRALIA

Users of Standards are reminded that copyright subsists in all Standards Australia publications and software. Except where the Copyright Act allows and except where provided for below no publications or software produced by Standards Australia may be reproduced, stored in a retrieval system in any form or transmitted by any means without prior permission in writing from Standards Australia. Permission may be conditional on an appropriate royalty payment. Requests for permission and information on commercial software royalties should be directed to the Head Office of Standards Australia.

Standards Australia will permit up to 10 percent of the technical content pages of a Standard to be copied for use exclusively in-house by purchasers of the Standard without payment of a royalty or advice to Standards Australia.

Standards Australia will also permit the inclusion of its copyright material in computer software programs for no royalty payment provided such programs are used exclusively in-house by the creators of the programs.

Care should be taken to ensure that material used is from the current edition of the Standard and that it is updated whenever the Standard is amended or revised. The number and date of the Standard should therefore be clearly identified.

The use of material in print form or in computer software programs to be used commercially, with or without payment, or in commercial contracts is subject to the payment of a royalty. This policy may be varied by Standards Australia at any time.

CONTENTS

Page

1 Scope 5
2 Normative references 5
3 Principles 6
3.1 Specification 6
3.2 Mapping of PHIGS function names to FORTRAN subroutine names 6
3.3 Parameters 6
3.4 The FORTRAN subset 6
3.5 Error handling 7
4 Generating FORTRAN subroutine names 8
5 Data types 12
6 Enumeration types 21
7 List of the PHIGS function names 28
7.1 List of functions ordered alphabetically by bound name 28
7.2 List of functions ordered alphabetically by PHIGS function name 33
8 PHIGS errors specific to the FORTRAN binding 39
9 The PHIGS function interface 40
9.1 General principles 40
9.2 Control functions 41
9.3 Output primitive functions 43
9.4 Attribute specification functions 48
9.4.1 Bundled attribute selection 48
9.4.2 Individual attribute selection 49
9.4.3 Aspect source flag setting 54
9.4.4 Workstation attribute table definition 54
9.4.5 Workstation filter definition 56
9.4.6 Colour model control 57
9.4.7 HLHSR attributes 57
9.5 Transformation functions 58
9.5.1 Modelling transformations 58
9.5.2 View operations 59
9.5.3 Workstation transformation 60
9.5.4 Utility functions to support modelling 61
9.5.5 Utility functions to support viewing 66
9.6 Structure content functions 68
9.7 Structure manipulation functions 71
9.8 Structure display functions 73
9.9 Structure archiving functions 74
9.10 Input functions 78
9.10.1 Pick related structure elements 78
9.10.2 Initialization of input devices 78
9.10.3 Setting mode of input devices 91
9.10.4 Request input functions 93
9.10.5 Sample input functions 96
9.10.6 Event input functions 99
9.11 Metafile functions 102
9.12 Inquiry functions 104
9.12.1 Inquiry functions for operating state value 104
9.12.2 Inquiry functions for PHIGS description table 104
9.12.3 Inquiry functions for PHIGS state list 106
9.12.4 Inquiry functions for workstation state list 108
9.12.5 Inquiry functions for workstation description table 127
9.12.6 Inquiry functions for structure state list 148
