AS 61800.2—2004

Australian Standard™

**Adjustable speed electrical power drive
systems**

**Part 2: General requirements—Rating
specifications for low voltage adjustable
frequency a.c. power drive systems**

This Australian Standard was prepared by Committee EL-027, Power Electronics. It was approved on behalf of the Council of Standards Australia on 6 August 2004. This Standard was published on 6 September 2004.

The following are represented on Committee EL-027:

Australian Communications Authority
Australian Electrical and Electronic Manufacturers Association
Bureau of Steel Manufacturers of Australia
Energy Supply Association of Australia
Monash University
University of Wollongong

Keeping Standards up-to-date

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about Standards can be found by visiting the Standards Web Shop at www.standards.com.au and looking up the relevant Standard in the on-line catalogue.

Alternatively, the printed Catalogue provides information current at 1 January each year, and the monthly magazine, *The Global Standard*, has a full listing of revisions and amendments published each month.

Australian Standards™ and other products and services developed by Standards Australia are published and distributed under contract by SAI Global, which operates the Standards Web Shop.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Contact us via email at mail@standards.org.au, or write to the Chief Executive, Standards Australia International Ltd, GPO Box 5420, Sydney, NSW 2001.

PREFACE

This Standard was prepared by the Standards Australia Committee EL-027, Power Electronics.

The objective of this Standard is to provide designers, manufacturers, specifiers, purchasers and users of variable speed drive systems with a set of characteristics to define variable speed drives with a supply voltage of up to 1 kV a.c.

This Standard is identical with, and has been reproduced from, IEC 61800-2, Ed. 1.0 (1998), *Adjustable speed electrical power drive systems, Part 2: General requirements—Rating specifications for low voltage adjustable frequency a.c. power drive systems*.

As this Standard is reproduced from an International Standard, the following applies:

- (a) Its number does not appear on each page of text and its identity is shown only on the cover and title page.
- (b) In the source text ‘this international standard’ should read ‘this Australian Standard’.
- (c) A full point should be substituted for a comma when referring to a decimal marker.
- (d) Any French text on figures should be ignored.

The terms ‘normative’ and ‘informative’ are used to define the application of the annex to which they apply. A normative annex is an integral part of a standard, whereas an informative annex is only for information and guidance.

CONTENTS

	<i>Page</i>
1 General.....	1
1.1 Scope and object	1
1.2 Normative references	1
1.3 Symbols	3
2 Definitions.....	4
2.1 System	4
2.2 Converters	7
2.3 Drive system operating characteristics	9
2.4 CDM, BDM and converter input parameters	11
2.5 CDM, BDM and converter output parameters	13
2.6 Converter circuitry and circuit elements	15
2.7 Induction motor parameters	16
2.8 Control systems	17
3 Functional features	17
3.1 Operational	17
3.2 Fault supervision	18
3.3 Minimum status indication required	18
3.4 I/O devices	18
4 Service conditions.....	18
4.1 Installation and operation.....	18
4.1.1 Electrical service conditions	18
4.1.2 Environmental service conditions	21
4.1.3 Unusual environmental service conditions	22
4.1.4 Installation, commissioning and operation	23
4.2 Storage of equipment.....	23
4.2.1 Climatic conditions	23
4.2.2 Specific storage hazards	23
4.3 Transportation	24
4.3.1 Climatic conditions	24
4.3.2 Unusual climatic conditions	24
4.3.3 Mechanical conditions	24
5 Ratings	24
5.1 BDM input ratings	24
5.1.1 Input voltages	24
5.1.2 Input currents.....	25
5.2 BDM output ratings	25
5.2.1 Continuous output ratings	25
5.2.2 Overload capability	25
5.2.3 Operating frequency range.....	26
5.3 Efficiency and losses	26
5.4 Transformers and reactors	26
6 Performance requirements	27
6.1 Steady state performance	27
6.1.1 Deviation band (see figure 7)	27
