

AS/NZS 3350.2.34:2001
(Incorporating Amendment No. 1)

AS/NZS 3350.2.34:2001

Australian/New Zealand Standard™

**Safety of household and similar
electrical appliances**

**Part 2.34: Particular requirements—
Motor-compressors
(IEC 60335-2-34:1999, IDT)**

AS/NZS 3350.2.34:2001

This Joint Australian/New Zealand Standard was prepared by Joint Technical Committee EL-002, Safety of Household and Similar Electrical Appliances and Small Power Transformers. It was approved on behalf of the Council of Standards Australia on 3 November 2000 and on behalf of the Council of Standards New Zealand on 10 November 2000.

This Standard was published on 6 March 2001.

The following are represented on Committee EL-002:

Association of Certification Bodies
Australian Chamber of Commerce and Industry
Australian Electrical and Electronic Manufacturers Association
Canterbury Manufacturers Association New Zealand
Consumer Electronic Suppliers Association, Australia
Electrical regulatory authorities, Australia
Electrical test laboratories
Electrical consultants
Electricity Supply Association of Australia
Institution of Engineers Australia
Metal Trades Industries Association of Australia
Ministry of Consumer Affairs, New Zealand

Keeping Standards up-to-date

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about joint Australian/New Zealand Standards can be found by visiting the Standards Web Shop at www.standards.com.au or Standards New Zealand web site at www.standards.co.nz and looking up the relevant Standard in the on-line catalogue.

Alternatively, both organizations publish an annual printed Catalogue with full details of all current Standards. For more frequent listings or notification of revisions, amendments and withdrawals, Standards Australia and Standards New Zealand offer a number of update options. For information about these services, users should contact their respective national Standards organization.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Please address your comments to the Chief Executive of either Standards Australia or Standards New Zealand at the address shown on the back cover.

This Standard was issued in draft form for comment as DR 00128.

PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee EL-002, to supersede AS/NZS 3350.2.34:1997.

This Standard incorporates Amendment No. 1 (May 2007). The changes required by the amendments are indicated in the text by a marginal bar and amendment number against the clause, note, table, figure or part thereof affected. Where an application date other than immediate is applicable to an amendment the date of application (DOA) is indicated by the marginal bar against the part affected or by a footnote relating to the part affected.

The objective of this Standard is to provide manufacturers and regulatory bodies with minimum safety requirements, designed to give user protection against hazards that might occur during normal operation and abnormal operation of the appliance and which may be used as the basis for approval for sale or for connection to supply in Australia and New Zealand.

This Standard forms the second edition of AS/NZS 3350.2.34, *Safety of household and similar electrical appliances, Part 2.34: Particular requirements—Motor-compressors*.

This Standard is identical with and has been reproduced from, IEC 60335-2-34:1999, *Safety of household and similar electrical appliances, Part 2-34: Particular requirements for motor-compressors*. It is to be used in conjunction with the latest edition of AS/NZS 3350.1, *Safety of household and similar electrical appliances, Part 1: General requirements* and its Amendments. It was established on the basis of AS/NZS 3350.1:2002.

This Standard (Part 2) supplements or modifies the corresponding clauses in AS/NZS 3350.1 (referred to as Part 1 in this Part 2) so as to convert it into the Australian/New Zealand Standard for the safety of motor-compressors.

Where a particular clause of Part 1 is not mentioned in this Part 2, that clause applies as far as is reasonable. Where this Standard states 'addition' or 'modification' or 'replacement' the relevant text of Part 1 is to be adopted accordingly.

In this Standard, the following print types are used:

- requirements proper: in arial type;
- *test specifications: in italic type;*
- explanatory matter: in smaller arial type.

The terms 'normative' and 'informative' have been used in this Standard to define the application of the annex to which they apply. A normative annex is an integral part of a Standard, whereas an informative annex is only for information and guidance.

As this Standard is reproduced from an International Standard, the following applies:

Its number does not appear on each page of text and its identity is shown only on the cover and title page.

In the source text 'this standard' should read 'this Standard'.

A full point should be substituted for a comma when referring to a decimal marker.

CONTENTS

| | <i>Page</i> |
|--|-------------|
| INTRODUCTION | v |
| 1 Scope | 6 |
| 2 Definitions..... | 7 |
| 3 General requirements..... | 8 |
| 4 General conditions for the tests | 8 |
| 5 Void | 9 |
| 6 Classification..... | 9 |
| 7 Marking and instructions..... | 10 |
| 8 Protection against access to live parts | 10 |
| 9 Starting of motor-operated appliances..... | 10 |
| 10 Power input and current..... | 10 |
| 11 Heating | 10 |
| 12 Void | 11 |
| 13 Leakage current and electric strength at operating temperature | 11 |
| 14 Void | 11 |
| 15 Moisture resistance | 11 |
| 16 Leakage current and electric strength | 11 |
| 17 Overload protection of transformers and associated circuits | 11 |
| 18 Endurance..... | 11 |
| 19 Abnormal operation | 11 |
| 20 Stability and mechanical hazards..... | 14 |
| 21 Mechanical strength | 14 |
| 22 Construction..... | 14 |
| 23 Internal wiring | 16 |
| 24 Components..... | 17 |
| 25 Supply connection and external flexible cords | 17 |
| 26 Terminals for external conductors | 17 |
| 27 Provision for earthing | 17 |
| 28 Screws and connections | 17 |
| 29 Creepage distances, clearances and distances through insulation | 17 |
| 30 Resistance to heat, fire and tracking | 18 |
| 31 Resistance to rusting..... | 18 |
| 32 Radiation, toxicity and similar hazards | 18 |
