AS/NZS 60479.1:2010

Australian/New Zealand Standard™

Effects of current on human beings and livestock

Part 1: General aspects

AS/NZS 60479.1:2010

This Joint Australian/New Zealand Standard was prepared by Joint Technical Committee EL-001, Wiring Rules. It was approved on behalf of the Council of Standards Australia on 14 April 2010 and on behalf of the Council of Standards New Zealand on 23 April 2010.

This Standard was published on 11 May 2010.

The following are represented on Committee EL-001:

Association of Consulting Engineers Australia
Australian Building Codes Board
Australian Industry Group
Communications, Electrical and Plumbing Union
Consumers' Federation of Australia
Electrical and Communications Association (Queensland)
Electrical Contractors Association of New Zealand
Electrical Regulatory Authorities Council
Electrical Safety Organisation (New Zealand)
ElectroComms and Energy Utilities Industries Skills Council
Energy Networks Australia
Engineers Australia
Institute of Electrical Inspectors
Ministry of Economic Development (New Zealand)
National Electrical and Communications Association
New Zealand Council of Elders
New Zealand Electrical Institute
New Zealand Manufacturers and Exporters Association
Telstra Corporation Limited

Keeping Standards up-to-date

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about joint Australian/New Zealand Standards can be found by visiting the Standards Web Shop at www.saiglobal.com.au or Standards New Zealand web site at www.standards.co.nz and looking up the relevant Standard in the on-line catalogue.

For more frequent listings or notification of revisions, amendments and withdrawals, Standards Australia and Standards New Zealand offer a number of update options. For information about these services, users should contact their respective national Standards organization.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Please address your comments to the Chief Executive of either Standards Australia or Standards New Zealand at the address shown on the back cover.

This Standard was issued in draft form for comment as DR AS/NZS 60479.1.

AS/NZS 60479.1:2010

Australian/New Zealand Standard™

Effects of current on human beings and livestock

Part 1: General aspects

Originated as part of MP 30—1976.
Previous edition AS 3859—1991.
Jointly revised and redesignated in part as AS/NZS 60479.1:2002.
Second edition 2010.

PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee EL-001, Wiring Rules.

The objective of this Standard is to provide basic guidance on the effects of shock current on human beings and livestock, for use in the establishment of electrical safety requirements.

This Standard is identical with, and has been reproduced from IEC/TR 60479-1, Ed. 4.0(2005), *Effects of current on human beings and livestock – Part 1: General aspects*.

As this Standard is reproduced from an International Standard, the following applies:

- (a) Its number does not appear on each page of text and its identity is shown only on the cover and title page.
- (b) In the source text ‘this technical specification’ should read ‘this Australian/New Zealand Standard’.
- (c) A full point should be substituted for a comma when referring to a decimal marker.

The terms ‘normative’ and ‘informative’ are used to define the application of the annex to which it applies. A normative annex is an integral part of a Standard, whereas an informative annex is only for information and guidance.

CONTENTS

	<i>Page</i>
INTRODUCTION	iv
1 Scope	1
2 Normative references	1
3 Terms and definitions	2
3.1 General definitions	2
3.2 Effects of sinusoidal alternating current in the range 15 Hz to 100 Hz	3
3.3 Effects of direct current	3
4 Electrical impedance of the human body	4
4.1 Internal impedance of the human body (Z_i)	4
4.2 Impedance of the skin (Z_s)	4
4.3 Total impedance of the human body (Z_T)	5
4.4 Factors affecting initial resistance of the human body (R_0)	5
4.5 Values of the total impedance of the human body (Z_T)	5
4.6 Value of the initial resistance of the human body (R_0)	13
5 Effects of sinusoidal alternating current in the range of 15 Hz to 100 Hz	13
5.1 Threshold of perception	13
5.2 Threshold of reaction	13
5.3 Immobilization	13
5.4 Threshold of let-go	13
5.5 Threshold of ventricular fibrillation	14
5.6 Other effects related to electric shocks	14
5.7 Effects of current on the skin	15
5.8 Description of time/current zones (see Figure 20)	15
5.9 Application of heart-current factor (F)	16
6 Effects of direct current	16
6.1 Threshold of perception and threshold of reaction	16
6.2 Threshold of immobilization and threshold of let-go	17
6.3 Threshold of ventricular fibrillation	17
6.4 Other effects of current	17
6.5 Description of time/current zones (see Figure 22)	18
6.6 Heart factor	18
Annexes	37
Annex A (normative) Measurements of the total body impedances Z_T made on living human beings and on corpses and the statistical analysis of the results	38
Annex B (normative) Influence of frequency on the total body impedance (Z_T)	41
Annex C (normative) Total body resistance (R_T) for direct current	42
Annex D (informative) Examples of calculations of Z_T	43
Bibliography	47
