

AS 3795—1996

Australian Standard[®]

**Copper alloy tubes for plumbing
and drainage applications**

This Australian Standard was prepared by Committee WS/18, Copper and Copper Alloy Tubes for Plumbing and Gasfitting. It was approved on behalf of the Council of Standards Australia on 15 January 1995 and published on 5 April 1996.

The following interests are represented on Committee WS/18:

Australian Association of Certification Bodies
Brisbane City Council
CSIRO — Division of Materials Science and Technology
Department of Land and Water Conservation, N.S.W.
Hunter Water Corporation
Metal Trades Industry Association of Australia
South Australian Water Corporation
Sydney Water Corporation

Review of Australian Standards. To keep abreast of progress in industry, Australian Standards are subject to periodic review and are kept up to date by the issue of amendments or new editions as necessary. It is important therefore that Standards users ensure that they are in possession of the latest edition, and any amendments thereto.

Full details of all Australian Standards and related publications will be found in the Standards Australia Catalogue of Publications; this information is supplemented each month by the magazine 'The Australian Standard', which subscribing members receive, and which gives details of new publications, new editions and amendments, and of withdrawn Standards.

Suggestions for improvements to Australian Standards, addressed to the head office of Standards Australia, are welcomed. Notification of any inaccuracy or ambiguity found in an Australian Standard should be made without delay in order that the matter may be investigated and appropriate action taken.
