Australian/New Zealand Standard™

Geographic information—Conceptual schema language

AS/NZS ISO 19103:2006

This Joint Australian/New Zealand Standard was prepared by Joint Technical Committee IT-004, Geographical Information/Geomatics. It was approved on behalf of the Council of Standards Australia on 11 January 2006 and on behalf of the Council of Standards New Zealand on 27 January 2006.
This Standard was published on 20 February 2006.

The following are represented on Committee IT-004:

ACT Planning and Land Authority
ANZLIC - the Spatial Information Council
Association of Crown Research Institutes New Zealand
Australasian Fire Authorities Council
Australian Antarctic Division
Australian Bureau of Statistics
Australian Hydrographic Office
Australian Map Circle
Australian Spatial Information Business Association
CSIRO Exploration & Mining
Department for Administrative and Information Services, SA
Department of Conservation, New Zealand
Department of Defence (Australia)
Department of Infrastructure, Planning and Environment, NT
Department of Natural Resources and Mines, Qld
Department of Primary Industries, Water and Environment, Tas
Geoscience Australia
Inter Governmental Committee on Surveying and Mapping
Land Information New Zealand
Land Victoria
Mapping Sciences Institute, Australia
Telecom New Zealand
Western Australian Land Information System

Keeping Standards up-to-date

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about joint Australian/New Zealand Standards can be found by visiting the Standards Web Shop at www.standards.com.au or Standards New Zealand web site at www.standards.co.nz and looking up the relevant Standard in the on-line catalogue.

Alternatively, both organizations publish an annual printed Catalogue with full details of all current Standards. For more frequent listings or notification of revisions, amendments and withdrawals, Standards Australia and Standards New Zealand offer a number of update options. For information about these services, users should contact their respective national Standards organization.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Please address your comments to the Chief Executive of either Standards Australia or Standards New Zealand at the address shown on the back cover.

This Standard was issued in draft form for comment as DR 05519.

PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee IT-004, Geographical Information/Geomatics.

This Standard is identical with, and has been reproduced from ISO/TS 19103:2005, *Geographic information—Conceptual schema language*.

The objective of this Standard is to provide system designers and analysts with a profile of the Unified Modeling Language (UML) for use with geographic information, and to provide guidelines on how UML should be used to create standardized geographic information and service models.

The terms ‘normative’ and ‘informative’ are used to define the application of the annex to which they apply. A normative annex is an integral part of a standard, whereas an informative annex is only for information and guidance.

As this Standard is reproduced from an international standard, the following applies:

- (a) Its number appears on the cover and title page while the international standard number appears only on the cover.
- (b) In the source text ‘this Technical Specification’ should read ‘this Australian/New Zealand’.
- (c) A full point substitutes for a comma when referring to a decimal marker.

References to International Standards should be replaced by references to Australian or Australian/New Zealand Standards, as follows:

<i>Reference to International Standard</i>		<i>Australian/New Zealand Standard</i>	
ISO		AS/NZS ISO	
19101	Geographic information—Reference model	19101	Geographic information—Reference model
19501	Information technology—Open Distributed Processing—Unified Modeling Language (UML) Version 1.4.2	—	

CONTENTS

	<i>Page</i>
1 Scope	1
2 Conformance	1
3 Normative references	1
4 Terms, definitions and abbreviations	1
4.1 ISO/TS 19103 terms	1
4.2 UML terms	3
4.3 Abbreviations	7
5 Organization	7
6 The ISO/TS 19103 UML Profile.....	8
6.1 Introduction	8
6.2 General usage of UML	8
6.3 Classes	9
6.4 Attributes	9
6.5 Data types	9
6.6 Operations	28
6.7 Relationships and associations	28
6.8 Stereotypes and tagged values	29
6.9 Optional, conditional and mandatory attributes and associations	29
6.10 Naming and name spaces.....	30
6.11 Packages	31
6.12 Notes	32
6.13 Constraints	32
6.14 Documentation of models.....	32
Annex A (normative) Abstract test suite.....	34
Annex B (informative) On conceptual schema languages.....	35
Annex C (informative) Modeling guidelines.....	45
Annex D (informative) Introduction to UML.....	54
Bibliography	67
