

Australian Standard™

**Fire hazard testing**

**Part 1.40: Guidance for assessing the  
fire hazard of electrotechnical  
products—Insulating liquids**

This Australian Standard was prepared by Committee EL-053, Fire hazard testing—  
Electrotechnical equipment. It was approved on behalf of the Council of Standards  
Australia on 23 May 2006.  
This Standard was published on 22 June 2006.

---

The following are represented on Committee EL-053:

Australian Electrical and Electronic Manufacturers Association  
Australian Information Industry Association  
Electrical Compliance Testing Association  
Electrical Regulatory Authorities Council  
Energy Networks Association

---

### **Keeping Standards up-to-date**

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about Standards can be found by visiting the Standards Web Shop at [www.standards.com.au](http://www.standards.com.au) and looking up the relevant Standard in the on-line catalogue.

Alternatively, the printed Catalogue provides information current at 1 January each year, and the monthly magazine, *The Global Standard*, has a full listing of revisions and amendments published each month.

Australian Standards™ and other products and services developed by Standards Australia are published and distributed under contract by SAI Global, which operates the Standards Web Shop.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Contact us via email at [mail@standards.org.au](mailto:mail@standards.org.au), or write to the Chief Executive, Standards Australia, GPO Box 476, Sydney, NSW 2001.

---

*This Standard was issued in draft form for comment as DR 06176.*

## PREFACE

This Standard was prepared by the Standards Australia Committee EL-053, Fire hazard testing—Electrotechnical equipment.

The objective of this series of standards is to provide the electrotechnology industry and standards writing committees with a series of standards which give guidance on assessing the fire hazard of electrotechnical products.

This Standard is identical with, and has been reproduced from IEC 60695-1-40, Ed 1.0 (2002), *Fire hazard testing - Part 1-40: Guidance for assessing the fire hazard of electrotechnical products - Insulating liquids*.

As this Standard is reproduced from an International Standard, the following applies:

- (a) Its number does not appear on each page of text and its identity is shown only on the cover and title page.
- (b) In the source text 'IEC 60695-1-40' should read 'AS 60695.1.40'.
- (c) A full point should be substituted for a comma when referring to a decimal marker.
- (d) Any French text on figures should be ignored.

The terms 'normative' and 'informative' are used to define the application of the annex to which they apply. A normative annex is an integral part of a standard, whereas an informative annex is only for information and guidance.

Any International Standard referenced should be replaced by an equivalent Australian Standard where one is available. The availability of equivalent Australian Standards can be determined either from the Standards Web Shop at [www.standards.com.au](http://www.standards.com.au) or from the annual printed catalogue of Australian Standards.

## CONTENTS

	<i>Page</i>
INTRODUCTION .....	iv
1 Scope .....	1
2 Normative references .....	1
3 Definitions .....	1
4 Classification of insulating liquids .....	2
5 Types of electrotechnical equipment containing insulating liquids .....	2
6 Fire parameters .....	2
7 Fire scenarios .....	3
8 Protective measures against fire .....	5
9 Considerations for the selection of test methods .....	6
Annex A (informative) History of insulating liquids .....	8
Annex B (informative) Preventive and protective measures against fire .....	9
Annex C (informative) Transformers .....	10
Annex D (informative) Power capacitors .....	12
Annex E (informative) Cables .....	13
Annex F (informative) Bushings .....	15
Annex G (informative) Switchgear .....	16
Bibliography .....	17
Table 1 – Classification of insulating liquids .....	2
