Australian/New Zealand Standard[®]

**Telecommunications installations—
Integrated telecommunications
cabling systems for small
office/home office premises**

AS/NZS 3086:1996

This Joint Australian/New Zealand Standard was prepared by Joint Technical Committee IT/17, Integrated Cabling Systems for Buildings. It was approved on behalf of the Council of Standards Australia on 28 June 1996 and on behalf of the Council of Standards New Zealand on 20 June 1996. It was published on 5 September 1996.

The following interests are represented on Committee IT/17:

AT&T New Zealand
AUSTEL
Australian Electrical and Electronic Manufacturers Association
Australian Information Industry Association
Australian Telecommunications Users Group
BICSI Australia
Clearfield Consulting, New Zealand
Connector Systems, New Zealand
Department of Defence, Australia
Electricity Supply Association of Australia
Institution of Radio and Electronics Engineers Australia
International Facility Management Association, Australia
Lincolne Scott, New Zealand
Modempak, New Zealand
Murray Gillespie, New Zealand
National Electrical Contractors Association, Australia
New Zealand consulting interests
New Zealand Defence Force
Optus Communications, Australia
Telstra Corporation, Australia
Telecom, New Zealand

Additional interests participating in preparation of Standard:

Equipment manufacturers

Review of Standards. To keep abreast of progress in industry, Joint Australian/New Zealand Standards are subject to periodic review and are kept up to date by the issue of amendments or new editions as necessary. It is important therefore that Standards users ensure that they are in possession of the latest edition, and any amendments thereto.

Full details of all Joint Standards and related publications will be found in the Standards Australia and Standards New Zealand Catalogue of Publications; this information is supplemented each month by the magazines 'The Australian Standard' and 'Standards New Zealand', which subscribing members receive, and which give details of new publications, new editions and amendments, and of withdrawn Standards.

Suggestions for improvements to Joint Standards, addressed to the head office of either Standards Australia or Standards New Zealand, are welcomed. Notification of any inaccuracy or ambiguity found in a Joint Australian/New Zealand Standard should be made without delay in order that the matter may be investigated and appropriate action taken.

This Standard was issued in draft form for comment as DR 94363.

PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee IT/17, Integrated Cabling Systems for Buildings.

The Standard is based on EIA/TIA-570 (1991), *Residential and Light Commercial Telecommunications Wiring Standard*, with significant changes.

The objective of this Standard is to provide telecommunications carriers, equipment designers and manufacturers, owners of premises and individuals or companies involved with the sale, installation and maintenance of telecommunications infrastructure and services, with a document that will advise on components and practices which will result in acceptable and compatible telecommunications facilities for 'small office/home office (SOHO)' scenarios in domestic/residential and light commercial premises, within the scope of this Standard.

The Standard describes a premises cabling system intended for connecting one to four exchange lines to various types of customer equipment at various locations within single premises or, for multi-occupancy buildings, within each occupant's part of the premises. It specifies physical interfaces, connecting techniques, and installation methods for telecommunications cabling of individual buildings. Some requirements, especially on cable and cabling topology, are new to the industry but are included in anticipation of new telecommunications services.

© Copyright — STANDARDS AUSTRALIA/STANDARDS NEW ZEALAND

Users of Standards are reminded that copyright subsists in all Standards Australia and Standards New Zealand publications and software. Except where the Copyright Act allows and except where provided for below no publications or software produced by Standards Australia or Standards New Zealand may be reproduced, stored in a retrieval system in any form or transmitted by any means without prior permission in writing from Standards Australia or Standards New Zealand. Permission may be conditional on an appropriate royalty payment. Australian requests for permission and information on commercial software royalties should be directed to the head office of Standards Australia. New Zealand requests should be directed to Standards New Zealand.

Up to 10 percent of the technical content pages of a Standard may be copied for use exclusively in-house by purchasers of the Standard without payment of a royalty or advice to Standards Australia or Standards New Zealand.

Inclusion of copyright material in computer software programs is also permitted without royalty payment provided such programs are used exclusively in-house by the creators of the programs.

Care should be taken to ensure that material used is from the current edition of the Standard and that it is updated whenever the Standard is amended or revised. The number and date of the Standard should therefore be clearly identified.

The use of material in print form or in computer software programs to be used commercially, with or without payment, or in commercial contracts is subject to the payment of a royalty. This policy may be varied by Standards Australia or Standards New Zealand at any time.
