

Australian/New Zealand Standard™

**Specification for radio disturbance and  
immunity measuring apparatus and  
methods**

**Part 2.2: Methods of measurement of  
disturbances and immunity—  
Measurement of disturbance power**

## **AS/NZS CISPR 16.2.2:2012**

This Joint Australian/New Zealand Standard was prepared by Joint Technical Committee TE-003, Electromagnetic Interference. It was approved on behalf of the Council of Standards Australia on 12 October 2012 and on behalf of the Council of Standards New Zealand on 15 September 2012.  
This Standard was published on 5 November 2012.

---

The following are represented on Committee TE-003:

Australian Broadcasting Corporation  
Australian Chamber of Commerce and Industry  
Australian Communications and Media Authority  
Australian Industry Group  
Australian Information Industry Association  
Consumer Electronics Suppliers Association  
Curtin University  
Department of Defence  
Electrical Compliance Testing Association  
Energy Networks Association  
Engineers Australia  
EMC Society of Australia  
Free TV Australia  
Lighting Council of Australia  
Ministry of Economic Development, New Zealand  
National Measurement Institute  
SingTel Optus  
Wireless Institute Australia

---

### **Keeping Standards up-to-date**

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about joint Australian/New Zealand Standards can be found by visiting the Standards Web Shop at [www.saiglobal.com.au](http://www.saiglobal.com.au) or Standards New Zealand web site at [www.standards.co.nz](http://www.standards.co.nz) and looking up the relevant Standard in the on-line catalogue.

For more frequent listings or notification of revisions, amendments and withdrawals, Standards Australia and Standards New Zealand offer a number of update options. For information about these services, users should contact their respective national Standards organization.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Please address your comments to the Chief Executive of either Standards Australia or Standards New Zealand at the address shown on the back cover.

---

*This Standard was issued in draft form for comment as DR AS/NZS CISPR 16.2.2.*

## PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee TE-003, Electromagnetic Interference, to supersede AS/NZS CISPR 16.2.2:2006.

The objective of this Standard is to provide a basic standard which specifies the methods of measurement of disturbance power using the absorbing clamp in the frequency range 30 MHz to 1000 MHz.

This Standard is identical with, and has been reproduced from, CISPR 16-2-2, Ed 2.0 (2010), *Specification for radio disturbance and immunity measuring apparatus and methods—Part 2-2: Methods of measurement of disturbances and immunity—Measurement of disturbance power*.

As this Standard is reproduced from an International Standard, the following applies:

- (a) Its number appears on the cover and title page while the International Standard number appears only on the cover.
- (b) In the source text ‘this part of CISPR 16’ should read ‘this Australian/New Zealand Standard’.
- (c) A full point substitutes for a comma when referring to a decimal marker.

References to International Standards should be replaced by references to Australian or Australian/New Zealand Standards, as follows:

| <i>Reference to International Standard</i> |  | <i>Australian/New Zealand Standard</i> |  |

|       |   |    |
|-------|---|----|
| 1     | Scope .....   | 7  |
| 2     | Normative references .....  | 7  |
| 3     | Terms and definitions .....                                       | 7  |
| 4     | Types of disturbance to be measured .....                         | 12 |
| 4.1   | General .....   | 12 |
| 4.2   | Types of disturbance .....  | 12 |
| 4.3   | Detector functions .....  | 12 |
| 5     | Connection of measuring equipment .....                           | 13 |
| 5.1   | General .....   | 13 |
| 5.2   | Connection of ancillary equipment .....                           | 13 |
| 6     | General measurement requirements and conditions .....             | 13 |
| 6.1   | General .....   | 13 |
| 6.2   | Disturbance not produced by the equipment under test .....        | 13 |
| 6.2.1 | General .....   | 13 |
| 6.2.2 | Compliance testing .....  | 13 |
| 6.3   | Measurement of continuous disturbance .....                       | 13 |
| 6.3.1 | Narrowband continuous disturbance .....                           | 13 |
| 6.3.2 | Broadband continuous disturbance .....                            | 14 |
| 6.3.3 | Use of spectrum analyzers and scanning receivers .....            | 14 |
| 6.4   | Operating conditions of the EUT .....                             | 14 |
| 6.4.1 | General .....   | 14 |
| 6.4.2 | Normal load conditions .....                                      | 14 |
| 6.4.3 | The time of operation .....                                       | 14 |
| 6.4.4 | Running-in time .....   | 14 |
| 6.4.5 | Supply .....  | 14 |
| 6.4.6 | Mode of operation .....   | 14 |
| 6.5   | Interpretation of measuring results .....                         | 14 |
| 6.5.1 | Continuous disturbance .....                                      | 14 |
| 6.5.2 | Discontinuous disturbance .....                                   | 15 |
| 6.5.3 | Measurement of the duration of disturbances .....                 | 15 |
| 6.6   | Measurement times and scan rates for continuous disturbance ..... | 15 |
| 6.6.1 | General .....   | 15 |
| 6.6.2 | Minimum measurement times .....                                   | 15 |
| 6.6.3 | Scan rates for scanning receivers and spectrum analyzers .....    | 16 |
| 6.6.4 | Scan times for stepping receivers .....                           | 17 |
| 6.6.5 | Strategies for a spectrum overview using the peak detector .....  | 18 |
| 6.6.6 | Timing considerations using FFT-based instruments .....           | 21 |
| 7     | Measurements using the absorbing clamp .....                      | 23 |
| 7.1   | Introduction to ACMM .....  | 23 |
| 7.2   | Application of the absorbing clamp measurement method .....       | 24 |
| 7.2.1 | General .....   | 24 |
| 7.2.2 | Frequency range .....   | 24 |
| 7.2.3 | EUT unit dimensions .....   | 24 |
| 7.2.4 | LUT requirements .....  | 24 |
| 7.3   | Requirements for measurements instrumentation and test site ..... | 24 |
