Australian/New Zealand Standard™

Underground mining—Shaft equipment

Part 8: Conveyances for inclined shafts

AS/NZS 3785.8:2016

This Joint Australian/New Zealand Standard was prepared by Joint Technical Committee ME-018, Mining Equipment. It was approved on behalf of the Council of Standards Australia on 16 August 2016 and by the New Zealand Standards Approval Board on 8 August 2016.

This Standard was published on 6 September 2016.

The following are represented on Committee ME-018:

Australasian Institute of Mining and Metallurgy
Australian Chamber of Commerce and Industry
Australian Industry Group
Construction and Mining Equipment Industry Group
Department of Industry, Skills and Regional Development, NSW
Department of Mines and Petroleum, WA
Department of Natural Resources and Mines, Qld
Minerals Council of Australia
Mining Electrical and Mining Mechanical Engineering Society
Solid Energy New Zealand
Straterra

Keeping Standards up-to-date

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about joint Australian/New Zealand Standards can be found by visiting the Standards Web Shop at www.saiglobal.com or Standards New Zealand web site at www.standards.govt.nz and looking up the relevant Standard in the on-line catalogue.

For more frequent listings or notification of revisions, amendments and withdrawals, Standards Australia and Standards New Zealand offer a number of update options. For information about these services, users should contact their respective national Standards organization.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Please address your comments to the Chief Executive of Standards Australia or the New Zealand Standards Executive at the address shown on the back cover.

This Standard was issued in draft form for comment as DR AS/NZS 3785.8:2015.

PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee ME-018, Mining Equipment, to supersede AS 3785.8—1994, *Underground mining—Shaft equipment*, Part 8: *Personnel conveyances in other than vertical shafts*.

The objective of this Standard is to specify general requirements for conveyances used in inclined shafts that do not exceed a gradient of one in three.

It is one of a series of Standards on shaft equipment for underground mines. The other Standards in the series are as follows:

AS(/NZS)

3785	Underground mining—Shaft equipment
3785.1	Part 1: Shaft overwind safety catch system
3785.2	Part 2: Shaft winding arresting systems
3785.3	Part 3: Drum winding gripper systems
3785.4	Part 4: Conveyances for vertical shafts
3785.5	Part 5: Headframes
3785.6	Part 6: Fixed guides, rope guides and rubbing ropes for conveyances
3785.7	Part 7: Sheaves

The principal differences between this and the previous edition are as follows:

- (a) Expansion of the scope to cover all types of conveyances.
- (b) Introduction of functional safety principles in the design philosophy of conveyances.
- (c) Introduction of commissioning the conveyance on site.
- (d) Introduction of in-service brake testing of the emergency braking system.
- (e) Introduction of maintenance of conveyances.

The term ‘normative’ has been used in this Standard to define the application of the appendix to which it applies. A ‘normative’ appendix is an integral part of a Standard.

CONTENTS

	<i>Page</i>
1 SCOPE	4
2 REFERENCED DOCUMENTS	4
3 DEFINITIONS	5
4 DESIGN PHILOSOPHY	7
5 STRUCTURAL DESIGN	8
6 GENERAL DESIGN REQUIREMENTS	10
7 WELDING	14
8 CONTROL SYSTEM	15
9 INSPECTION AND TESTING DURING MANUFACTURE	17
10 TEST CERTIFICATES	18
11 MARKING	19
12 COMMISSIONING	19
13 IN SERVICE TRACK BRAKE TESTING	21
14 INSPECTION AND MAINTENANCE	23
 APPENDICES	
A INFORMATION TO BE PROVIDED BY THE PURCHASER	25
