## **Telecontrol equipment and systems**

### **Part 1.4: General considerations— Basic aspects of telecontrol data transmission and organization of Standards IEC 60870-5 and IEC 60870-6**

---

[IEC title: Telecontrol equipment and systems, Part 1: General considerations, Section 4: Basic aspects of telecontrol data transmission and organization of standards IEC 60870-5 and IEC 60870-6]

This Australian Standard was prepared by Committee IT/24, Supervisory Control and Data Acquisition. It was approved on behalf of the Council of Standards Australia on 23 September 1997 and published on 5 January 1998.

---

The following interests are represented on Committee IT/24:

Association of Consulting Engineers Australia  
AUSTEL  
Australasian Railway Association  
Australian Electrical and Electronic Manufacturers Association  
Australian Fire Authorities Council  
Australian Gas Association  
Australian Pipeline Industry Association  
Australian Security Industry Association  
AUSTROADS  
CIGRE AP35  
Electricity Supply Association of Australia  
Fire Protection Association of Australia  
Institution of Engineers Australia  
Telstra Corporation  
Water Services Association of Australia

---

**Review of Australian Standards.** To keep abreast of progress in industry, Australian Standards are subject to periodic review and are kept up to date by the issue of amendments or new editions as necessary. It is important therefore that Standards users ensure that they are in possession of the latest edition, and any amendments thereto.

Full details of all Australian Standards and related publications will be found in the Standards Australia Catalogue of Publications; this information is supplemented each month by the magazine 'The Australian Standard', which subscribing members receive, and which gives details of new publications, new editions and amendments, and of withdrawn Standards.

Suggestions for improvements to Australian Standards, addressed to the head office of Standards Australia, are welcomed. Notification of any inaccuracy or ambiguity found in an Australian Standard should be made without delay in order that the matter may be investigated and appropriate action taken.

---

*This Standard was issued in draft form for comment as DR 97096.*

## PREFACE

This Standard was prepared by the Standards Australia Committee IT/24, Supervisory Control and Data Acquisition.

The Standard is identical with and has been reproduced from IEC 870-1-4:1994, *Telecontrol equipment and systems*, Part 1: *General considerations*, Section 4—*Basic aspects of telecontrol data transmission and organization of standards IEC 60870-5 and IEC 60870-6*.

IEC has decided to apply a new numbering system, the 60000 series, to all its existing and future publications, including amendments to existing Standards. As a consequence, IEC has modified the bibliographic references in its databases to accord with the new numbering system. All IEC publications issued since the beginning of 1997 will carry references in terms of the 60000 series numbering. Publications printed earlier than 1997 will continue to carry the old series of numbers. For example, a reference to the IEC 60870 series of Standards will be to IEC 870 if the current edition of the Standard was printed prior to 1997.

This Standard is identical to a pre-1997 document; therefore, it uses the old series of numbers.

The objective of this Standard is to provide manufacturers and users of telecontrol equipment and systems with a tutorial on transmission techniques, equipment and protocols in order to guide Australian users of Parts 5 and 6 of this Standard.

As this Standard is reproduced from an international Standard, the following applies:

- (a) Its number does not appear on each page of text and its identity is shown only on the cover and title page.
- (b) In the source text 'this International Standard' should read 'this Australian Standard'.
- (c) A full point substitutes for a comma when referring to a decimal marker.

The references to international Standards should be replaced by references to the following Australian/New Zealand Standards:

<i>Reference to International Standard or other publication</i>		<i>Australian or Joint Australian/New Zealand Standard</i>
