Public Record Office Victoria
Queensland State Archives
Records and Information Management Professionals Australasia
State Records NSW
State Records Office of Western Australia
University of Sydney

Additional Interests:

Enterprise Knowledge
Microsystems
Recordkeeping Innovation

Keeping Standards up-to-date

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about joint Australian/New Zealand Standards can be found by visiting the Standards Web Shop at www.saiglobal.com.au or Standards New Zealand web site at www.standards.co.nz and looking up the relevant Standard in the on-line catalogue.

For more frequent listings or notification of revisions, amendments and withdrawals, Standards Australia and Standards New Zealand offer a number of update options. For information about these services, users should contact their respective national Standards organization.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Please address your comments to the Chief Executive of either Standards Australia or Standards New Zealand at the address shown on the back cover.

This Standard was issued in draft form for comment as DR AS/NZS 12029:2014.

AS/NZS ISO 12029:2014

Australian/New Zealand Standard™

Document management—Machine-readable paper forms—Optimal design for user friendliness and electronic document management systems (EDMS)

PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee IT-021, Records and Document Management Systems, to supersede AS/NZS ISO 12029:2007, *Electronic imaging—Forms design optimization for electronic image management*.

The objective of this Standard is to specify requirements concerning the design of forms for user friendliness, with optimal machine readability for processing by electronic document management systems (EDMS). These requirements are limited to forms using roman characters.

This Standard is identical with, and has been reproduced from ISO 12029:2010, *Document management—Machine-readable paper forms—Optimal design for user friendliness and electronic document management systems (EDMS)*.

As this Standard is reproduced from an International Standard, the following applies:

(a)   In the source text 'this International Standard' should read 'this Australian/New Zealand Standard'.

(b)   A full point substitutes for a comma when referring to a decimal marker.

None of the normative references in the source document have been adopted as Australian or Australian/New Zealand Standards.
