

AS/NZS 3129.1:1993

Australian/New Zealand Standard

**Approval and test specification—
Electric fence energizers**

**Part 1: Safety requirements for
mains-operated electric fence
energizers**

AS/NZS 3129.1:1993

This Joint Australian/New Zealand Standard was prepared by Joint Technical Committee EL/2, Electrical Approvals Standards. It was approved on behalf of the Council of Standards Australia on 15 June 1993 and on behalf of the Council of Standards New Zealand on 30 July 1993. It was published on 11 October 1993.

The following interests are represented on Committee EL/2:

Australian Chamber of Commerce and Industry
Australian Electrical and Electronic Manufacturers Association
Consumer Electronics Suppliers Association, Australia
Electrical regulatory authorities
Electrical Supply Association of Australia
Electrical test laboratories
Electricity Supply Association, New Zealand
Federal Bureau of Consumer Affairs, Australia
Institution of Engineers, Australia
Metal Trades Industry Association of Australia
Ministry of Commerce (Energy Inspection), New Zealand
New Zealand Electrical Institute
New Zealand Electrical Range Manufacturers Association
New Zealand Manufacturers Federation

Review of Standards. To keep abreast of progress in industry, Joint Australian/New Zealand Standards are subject to periodic review and are kept up to date by the issue of amendments or new editions as necessary. It is important therefore that Standards users ensure that they are in possession of the latest edition, and any amendments thereto.

Full details of all Joint Standards and related publications will be found in the Standards Australia and Standards New Zealand Catalogue of Publications; this information is supplemented each month by the magazines 'The Australian Standard' and 'Standards New Zealand', which subscribing members receive, and which give details of new publications, new editions and amendments, and of withdrawn Standards.

Suggestions for improvements to Joint Standards, addressed to the head office of either Standards Australia or Standards New Zealand, are welcomed. Notification of any inaccuracy or ambiguity found in a Joint Australian/New Zealand Standard should be made without delay in order that the matter may be investigated and appropriate action taken.

AS/NZS 3129.1:1993

Australian/New Zealand Standard

Approval and test specification— Electric fence energizers

Part 1: Safety requirements for mains-operated electric fence energizers

First published in Australia as AS C129—1959.
Revised and redesignated AS 3129—1981.
Second edition 1985.
Third edition 1989.

First published in New Zealand as NZS 1525:1962.
Revised and redesignated NZS 6203.1:1987.

AS 3129—1989 and NZS 6203.1:1987 jointly revised and
designated as Joint Standard AS/NZS 3129.1:1993.

Incorporating:
Admt 1—1994
Admt 2—1995

PUBLISHED JOINTLY BY:

PREFACE

This Specification was prepared by the Joint Australian/New Zealand Standards Committee EL/2 on Electrical Approvals Standards to supersede AS 3129—1989 in Australia and NZS 6203.1:1987 in New Zealand. It was prepared to align Australian approval and test specifications and New Zealand Standards progressively with International Electrotechnical Commission (IEC) Standards for appliances.

This Specification is issued as a Joint Standard under the terms of the Active Cooperation Agreement between Standards Australia and Standards New Zealand, with the objective of reducing technical barriers to trade between the two nations.

Under arrangements made between Standards Australia, Standards New Zealand and the international Standards bodies, ISO and IEC, as well as certain other Standards organizations, users of this Australian/New Zealand Standard are advised of the following:

- (a) In Australia copyright is vested in Standards Australia. In New Zealand copyright is vested in Standards New Zealand.
- (b) The number of this Standard is not reproduced on each page; its identity is shown only on the cover and title pages.

This Specification is reproduced from IEC 1011:1989, *Electric fence energizers—Safety requirements for mains-operated electric fence energizers* including Amendment 1.

A number of variations have been made in this Specification to the requirements of IEC 1011:1989. These variations are necessary, to take into account the national requirements for electrical fence energizers that apply in both Australia and New Zealand. Text subject to variation is indicated throughout the text of this Specification by boxes. Beneath the boxed IEC text and indicated by a marginal bar is the Australian/New Zealand requirement.

These variations also form the Australian national variations for purposes of the IEC scheme for recognition of results of testing to Standards for safety of electrical equipment (the CB scheme).

The numbering of Clauses and Figures closely follows that of IEC 1011:1989. To allow for the introduction of additional material by the IEC, the numbers 1 to 100 have been reserved. Clauses numbered from 101 are used by the IEC to add to the body of the Specification by the appendices. To allow additional material to be introduced by Australia or New Zealand, the numbers 201 to 300 are used. This scheme eliminates the possibility of the IEC and Australia or New Zealand using the same Clause or Figure number for differing requirements. The use of the word VOID indicates that the IEC requirement is not used in Australia or New Zealand. The word is also used where the deletion of a particular requirement such as a Table would lead to the consequential renumbering of references within the body of the Specification. Where Australia and New Zealand has added a requirement or made a change to a particular Clause of IEC 1011 that Clause number remains unchanged.

In this Specification the requirements appear in roman type, notes and explanatory matter appear in smaller roman type, and tests appear in italics.

This Specification will supersede AS 3129—1989 in Australia and NZS 6203.1:1987 in New Zealand two years from publication.

Reference to IEC or ISO publications should be replaced by reference to Australian Standards as follows:
