Australian/New Zealand Standard[®]

**Limits and methods of measurement
of electromagnetic disturbance
characteristics of industrial,
scientific and medical (ISM)
radiofrequency equipment**

AS/NZS 2064:1997

This Joint Australian/New Zealand Standard was prepared by Joint Technical Committee TE/3, Electromagnetic Interference. It was approved on behalf of the Council of Standards Australia on 19 November 1996 and on behalf of the Council of Standards New Zealand on 30 October 1996. It was published on 5 February 1997.

The following interests are represented on Committee TE/3:

Association of Consulting Engineers, Australia
Association of New Zealand Electrical Appliance Distributors
Australian Broadcasting Corporation
Australian Chamber of Commerce and Industry
Australian Electrical and Electronic Manufacturers Association
Australian Information Industry Association
Australian Telecommunication Authority
Consumer Electronics Suppliers Association, Australia
CSIRO—Division of Applied Physics, Australia
Department of Communication and the Arts, Australia
Department of Defence, Australia
Electrical Compliance Testing Association of Australia
Federation of Australian Commercial Television Stations, Australia
Institution of Engineers, Australia
Institution of Radio and Electronics Engineers, Australia
Ministry of Commerce, Communications Division, New Zealand
National Standards Commission, Australia
Optus Communications, Australia
Public Transport Corporation, Australia
Society of Automotive Engineers, Australia
Spectrum Management Agency, Australia
Telstra Corporation, Australia
Wireless Institute of Australia

Review of Standards. To keep abreast of progress in industry, Joint Australian/New Zealand Standards are subject to periodic review and are kept up to date by the issue of amendments or new editions as necessary. It is important therefore that Standards users ensure that they are in possession of the latest edition, and any amendments thereto.

Full details of all Joint Standards and related publications will be found in the Standards Australia and Standards New Zealand Catalogue of Publications; this information is supplemented each month by the magazines 'The Australian Standard' and 'Standards New Zealand', which subscribing members receive, and which give details of new publications, new editions and amendments, and of withdrawn Standards.

Suggestions for improvements to Joint Standards, addressed to the head office of either Standards Australia or Standards New Zealand, are welcomed. Notification of any inaccuracy or ambiguity found in a Joint Australian/New Zealand Standard should be made without delay in order that the matter may be investigated and appropriate action taken.

PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee TE/3 on Electromagnetic Interference as one of a series of Standards intended to facilitate control of electromagnetic interference and the compatibility of electrical and electronic equipment. It is equivalent to and has been reproduced from IEC/CISPR 11 (1990), *Limits and methods of measurement of electromagnetic disturbance characteristics of industrial, scientific and medical (ISM) radio-frequency equipment*, prepared by CISPR Subcommittee B and includes Amendment 1 (1996) and Amendment 2 (1996). This edition supersedes AS/NZS 2064:1992, Parts 1 and 2 of the same title.

The objective of this Standard is to provide designers, manufacturers and installers of ISM equipment having radiofrequency or spark erosion operation with limits and methods of test to afford protection to the radiofrequency spectrum from radio disturbances.

The contents of the Amendments have been inserted in the body of the Standard at the appropriate places and any deletions to the original CISPR 11 as instructed by the amendments have been removed. This Standard now reflects only current information.

Additional Australian and New Zealand requirements are contained in Annex ZZ. They include variations to accommodate local frequency allocations for ISM use and additional allocations and limits for specific safety services, namely air navigation. The application of the additional requirements to the text is indicated by a double vertical bar in the left hand margin.

Statements expressed in mandatory terms in notes and figures are deemed to be requirements of this Standard.

As this Standard is reproduced from an international Standard the following applies:

- (a) Its number appears on the cover and title page while the International Standard number appears only on the cover.
- (b) In the source text 'this International Standard' should read 'this Australian/ New Zealand Standard'.
- (c) A full point substitutes for a comma when referring to a decimal marker.

References to international Standards should be replaced by equivalent Australian or Joint Australian/New Zealand Standards as follows:

© Copyright — STANDARDS AUSTRALIA/STANDARDS NEW ZEALAND

Users of Standards are reminded that copyright subsists in all Standards Australia and Standards New Zealand publications and software. Except where the Copyright Act allows and except where provided for below no publications or software produced by Standards Australia or Standards New Zealand may be reproduced, stored in a retrieval system in any form or transmitted by any means without prior permission in writing from Standards Australia or Standards New Zealand. Permission may be conditional on an appropriate royalty payment. Australian requests for permission and information on commercial software royalties should be directed to the head office of Standards Australia. New Zealand requests should be directed to Standards New Zealand.

Up to 10 percent of the technical content pages of a Standard may be copied for use exclusively in-house by purchasers of the Standard without payment of a royalty or advice to Standards Australia or Standards New Zealand.

Inclusion of copyright material in computer software programs is also permitted without royalty payment provided such programs are used exclusively in-house by the creators of the programs.

Care should be taken to ensure that material used is from the current edition of the Standard and that it is updated whenever the Standard is amended or revised. The number and date of the Standard should therefore be clearly identified.

The use of material in print form or in computer software programs to be used commercially, with or without payment, or in commercial contracts is subject to the payment of a royalty. This policy may be varied by Standards Australia or Standards New Zealand at any time.
