

AS/NZS 2430.3.4:2004
(Incorporating Amendment No. 1)

AS/NZS 2430.3.4:2004

Australian/New Zealand Standard™

Classification of hazardous areas

**Part 3.4: Examples of area
classification—Flammable gases**

AS/NZS 2430.3.4:2004

This Joint Australian/New Zealand Standard was prepared by Joint Technical Committee MS-011, Classification of Hazardous Areas. It was approved on behalf of the Council of Standards Australia on 31 March 2004 and on behalf of the Council of Standards New Zealand on 30 April 2004.
This Standard was published on 20 May 2004.

The following are represented on Committee MS-011:

Auckland Regional Chamber of Commerce
Australian Association of Certification Bodies
Australian Chamber of Commerce and Industry
Australian Gas Association
Australian Industry Group
Australian Liquefied Petroleum Gas Association Limited
Australian Paint Manufacturers Federation
Certification Bodies (Australia)
Department of Labour New Zealand
Department of Natural Resources and Mines (Qld)
Electricity Supply Association of Australia
Gas Association of New Zealand Inc
Institute of Electrical Inspectors
Institute of Instrumentation and Control Australia
Institution of Engineers Australia
LPG Association of New Zealand (Inc)
Ministry of Economic Development (New Zealand)
National Electrical and Communications Association
New Zealand Association of Marine, Aviation and Power Engineers
New Zealand Chemical Industry Council Inc
New Zealand Oil Companies
Victorian WorkCover Authority
WorkCover New South Wales

Keeping Standards up-to-date

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about joint Australian/New Zealand Standards can be found by visiting the Standards Web Shop at www.standards.com.au or Standards New Zealand web site at www.standards.co.nz and looking up the relevant Standard in the on-line catalogue.

Alternatively, both organizations publish an annual printed Catalogue with full details of all current Standards. For more frequent listings or notification of revisions, amendments and withdrawals, Standards Australia and Standards New Zealand offer a number of update options. For information about these services, users should contact their respective national Standards organization.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Please address your comments to the Chief Executive of either Standards Australia or Standards New Zealand at the address shown on the back cover.

This Standard was issued in draft form for comment as DR 03561.

AS/NZS 2430.3.4:2004
(Incorporating Amendment No. 1)

Australian/New Zealand Standard™

Classification of hazardous areas

Part 3.4: Examples of area classification—Flammable gases

Originated in Australia as part of AS 1076.2—1977.
Originated in New Zealand as part of NZS 6101P:1972.
Previous edition AS/NZS 2430.3.4:1997.
Second edition 2004.
Reissued incorporating Amendment No. 1 (March 2007).

PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee MS-011, Classification of Hazardous Areas, to supersede AS/NZS 2430.3.4:1997, *Classification of hazardous areas, Part 3.4: Examples of area classification—Flammable gases*.

This Standard incorporates Amendment No. 1 (March 2007). The changes required by the Amendment are indicated in the text by a marginal bar and amendment number against the clause, note, table, figure or part thereof affected.

The objective of the AS/NZS 2430.3 series of Standards is to provide guidance to the industries and statutory authorities concerned with the classification of hazardous areas.

Changes to the 1997 edition include—

- (a) incorporation of the issued amendment;
- (b) addition of Clause 8 - *High pressure gas transmission systems*;
- (c) rewording of Clauses 1, 5.1, 6.1, 6.2.4, 7.1, 7.2.7 and 7.2.12;
- (d) correction of typographical errors;
- (e) alteration of the symbols for hazardous areas zones (to align with AS/NZS 60079.10); and
- (f) update of referenced documents.

This series of Standards details examples of area classification of commonly occurring situations, based on the principles of AS/NZS 60079.10, *Electrical apparatus for explosive gas atmospheres*, Part 10: *Classification of hazardous areas*.

The AS/NZS 2430.3 series is as follows:

AS/NZS

2430.3	Classification of hazardous areas—Examples of area classification
2430.3.1	Part 3.1: General
2430.3.2	Part 3.2: Vehicle workshops, vehicle parking, fuel dispensing stations and aircraft hangars
2430.3.3	Part 3.3: Flammable liquids
2430.3.4	Part 3.4: Flammable gases (this Part)
2430.3.5	Part 3.5: Refineries and major processing plants
2430.3.6	Part 3.6: Laboratories including fume cupboards and flammable medical agents
2430.3.7	Part 3.7: Landfill gas, sewage treatment and sewage pumping plants
2430.3.8	Part 3.8: Surface coatings and adhesives
2430.3.9	Part 3.9: Miscellaneous

The AS 2430 series of Standards for classification of hazardous areas used to be formed by AS 2430.1, AS 2430.2 and AS 2430.3.

AS 2430.2 was replaced by AS/NZS 61241.3 in 1999 and AS 2430.1 was replaced by AS/NZS 60079.10 in 2004.

In 1997, AS 2430.3 was split into a Series of nine Parts – 3.1 to 3.9; these initial nine Parts have been superseded by this 2004 edition.

CONTENTS

	<i>Page</i>
1 SCOPE.....	4
2 REFERENCED DOCUMENTS.....	4
3 DEFINITIONS.....	5
4 GAS INDUSTRY CODES—CONSUMER INSTALLATIONS	5
5 GAS INDUSTRY CODES—DISTRIBUTION SYSTEMS	6
6 LIGHTER-THAN-AIR FLAMMABLE GASES—OTHER INSTALLATIONS.....	7
7 HEAVIER-THAN-AIR FLAMMABLE GASES—OTHER INSTALLATIONS	10
8 HIGH PRESSURE GAS TRANSMISSION SYSTEMS	18
