[IEC title: Medical electrical equipment—Part 2: Particular requirements for the safety of blankets, pads and mattresses, intended for heating in medical use]

## AS/NZS 3200.2.35:1999

---

This Joint Australian/New Zealand Standard was prepared by Joint Technical Committee HE/3, Medical Electrical Equipment. It was approved on behalf of the Council of Standards Australia on 12 March 1999 and on behalf of the Council of Standards New Zealand on 26 March 1999. It was published on 5 June 1999.

---

The following interests are represented on Committee HE/3:

Australian Society of Anaesthetists  
Australasian College of Physical Scientists and Engineers in Medicine  
Australasian Society for Ultrasound in Medicine  
Australian & New Zealand College of Anaesthetists  
Australian Chamber of Commerce and Industry  
Australian Dental Association  
Australian Institute of Radiography  
Australian Radiation Laboratory  
College of Biomedical Engineering Institution of Engineers Australia  
Commonwealth Department of Health and Family Services  
Department of Defence (Australia)  
Medical Industry Association of Australia  
Ministry of Commerce New Zealand  
Royal Australasian College of Surgeons  
Royal Australasian College of Physicians  
Royal Australasian College of Radiologists

---

**Review of Standards.** To keep abreast of progress in industry, Joint Australian/New Zealand Standards are subject to periodic review and are kept up to date by the issue of amendments or new editions as necessary. It is important therefore that Standards users ensure that they are in possession of the latest edition, and any amendments thereto.

Full details of all Joint Standards and related publications will be found in the Standards Australia and Standards New Zealand Catalogue of Publications; this information is supplemented each month by the magazines 'The Australian Standard' and 'Standards New Zealand', which subscribing members receive, and which give details of new publications, new editions and amendments, and of withdrawn Standards.

Suggestions for improvements to Joint Standards, addressed to the head office of either Standards Australia or Standards New Zealand, are welcomed. Notification of any inaccuracy or ambiguity found in a Joint Australian/New Zealand Standard should be made without delay in order that the matter may be investigated and appropriate action taken.

## PREFACE

This Standard was prepared by the Joint Standards Australian/Standards New Zealand Committee HE/3, Medical Electrical Equipment as a Joint Standard.

This particular Standard is identical with and has been reproduced from IEC 60601-2-35:1996 *Medical electrical equipment, Part 2: Particular requirements for the safety of blankets, pads and mattresses, intended for heating in medical use* which modifies and supplements the corresponding Clauses of IEC 60601-1:1988, *Medical electrical equipment, Part 1: General requirements for safety* which has been adopted as AS/NZS 3200.1.0:1998, hereinafter referred to as the General Standard.

IEC has decided to apply a new numbering system, the 60000 series, to all its existing and future publications, including amendments to existing Standards. As a consequence, IEC has modified the bibliographic references in its databases to accord with the new numbering system. All IEC publications issued since the beginning of 1997 will carry references in terms of the 60000 series numbering. Publications printed earlier than 1997 will continue to carry the old series of numbers, for example, a reference to the IEC 60598 series of Standards will be to IEC 598 if the current edition of the Standard was printed prior to 1997.

The General Standard details electrical safety requirements for all types of medical electrical equipment. A particular Standard details additional safety requirements for a related group of medical electrical devices. A Collateral Standard details additional safety requirements for a range of devices within the scope of the General Standard which may not be related but share common problems. In the text of this Standard, the following print types are used:

- (a) Requirements, compliance with which can be tested and definitions . in large Roman type
- (b) Explanations, advice, introductions, general statements, exceptions and references . . . . . in smaller roman type
- (c) Headings of sub-clauses and text specifications . . . . . in italic type
- (d) Terms used throughout the Standard, which have been defined in Clause 2 and which are also in the index . . . . . IN SMALL CAPITALS

\* An asterisk is placed before each Clause for which rationale is included in Annex AA.

The even numbered pages of the original publication are in French and are omitted from this version.

Some other pages of the original, which relate to IEC administrative matters, are also omitted from this edition.

As this publication has been reproduced from an international Standard, the following modifications apply:

- (i) Its number does not appear on each page of text and its identity is shown on the cover and title page
- (ii) The words 'this Australian/New Zealand Standard' should replace the words 'this International Standard' wherever they appear.
- (iii) Substitute a full point for a comma where it appears as a decimal marker.

The references to international Standards should be replaced by references to the following Australian or Joint Australian/New Zealand Standards:

## iii
