

AS/NZS 60076.1:2014

AS/NZS 60076.1:2014

Australian/New Zealand Standard™

**Power transformers**

**Part 1: General (IEC 60076-1, Ed. 3.0  
(2011) MOD)**

## **AS/NZS 60076.1:2014**

This Joint Australian/New Zealand Standard was prepared by Joint Technical Committee EL-008, Power Transformers. It was approved on behalf of the Council of Standards Australia on 9 May 2014 and on behalf of the Council of Standards New Zealand on 7 February 2014.

This Standard was published on 10 June 2014.

---

The following are represented on Committee EL-008:

Australasian Railway Association  
Australian Chamber of Commerce and Industry  
Australian Industry Group  
Department of Industry  
Electricity Engineers Association, New Zealand  
Energy Efficiency and Conservation Authority of New Zealand  
Energy Networks Association  
Engineers Australia  
Industry Training Body

### **Keeping Standards up-to-date**

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about joint Australian/New Zealand Standards can be found by visiting the Standards Web Shop at [www.saiglobal.com.au](http://www.saiglobal.com.au) or Standards New Zealand web site at [www.standards.co.nz](http://www.standards.co.nz) and looking up the relevant Standard in the on-line catalogue.

For more frequent listings or notification of revisions, amendments and withdrawals, Standards Australia and Standards New Zealand offer a number of update options. For information about these services, users should contact their respective national Standards organization.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Please address your comments to the Chief Executive of either Standards Australia or Standards New Zealand at the address shown on the back cover.

# Australian/New Zealand Standard™

## Power transformers

### Part 1: General (IEC 60076-1, Ed. 3.0 (2011) MOD)

Originated in Australia as part of AS C61—1931.  
Previous edition AS 60076.1—2005.  
Jointly revised and designated as AS/NZS 60076.1:2014.

## PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee EL-008, Power Transformers, to supersede AS 60076.1—2005, *Power transformers*, Part 1: *General* (IEC 60076-1, Ed. 2.1 (2000) MOD).

The objective of this Standard is to provide manufacturers, suppliers, test laboratories, purchasers and users of power transformers with general requirements for three-phase and single-phase transformers. The exceptions are some small and special purpose transformers.

This Standard is an adoption with national modifications. It has been reproduced from IEC 60076-1, Ed. 3.0 (2011), *Power transformers*, Part 1: *General*, and has been varied as indicated to take account of Australian/New Zealand conditions.

This edition includes the following significant technical changes with respect to the previous edition:

- (a) Addition of a definition of harmonic content.
- (b) Addition of a subclause on transport.
- (c) Addition of functional method of specification.
- (d) Addition of connection symbols for single-phase transformers.
- (e) Addition of safety and environmental requirements.
- (f) Addition of requirements for liquid preservation systems.
- (g) Addition of a clause on DC currents.
- (h) Addition of vacuum, pressure and leak tests on tanks.
- (i) The requirements formerly in Annex A are now incorporated in the text and Annex A is now an informative checklist.
- (j) Informative annexes have been added on facilities for condition monitoring and environmental and safety considerations.

This Standard is structured as follows:

- (i) Preface.
- (ii) IEC 60076-1, Ed. 3.0 (2011) (unedited from the contents page to the final clause of the source document).
- (iii) Appendix ZZ—(Australian/New Zealand) variations to the source document.
- (iv) Appendices ZA and ZB—for Australia/New Zealand.

This Standard is Part 1 of the AS/NZS 60076 series which is progressively replacing the AS 2374 series. This series will consist of adoptions, with national modifications when necessary, of the IEC 60076 series on power transformers.

The variations listed in Appendix ZZ address issues, including the following:

- (A) Definition and details of T-T connected transformers.
- (B) Clarification to the type testing scope for Australian/New Zealand conditions.
- (C) Clarification of the scope and limitations for sound level to ensure consistency with AS/NZS 60076.10, which includes the required maximum sound levels.
- (D) Additional items to appear on the rating plate to suit Australian/New Zealand conditions and practices.
- (E) Additional safety considerations to suit Australian/New Zealand conditions and practices.
- (F) Additional special information items for order/enquiry to suit Australian/New Zealand conditions and practices.

The variations described in Appendix ZZ form the Australian/New Zealand variations for the purposes of the IECEE CB Scheme for recognition of testing to standards for safety of electrical equipment.

Table 6.1 of AS 2067 (minimum values for separating outdoor transformers) was consulted during the preparation of this Standard, with respect to liquid volumes contained in outdoor transformers.

As this Standard is reproduced from an International Standard, the following applies:

- (1) In the source text ‘this part of IEC 60076’ should read ‘this Australian/New Zealand Standard’.
- (2) A full point substitutes for a comma when referring to a decimal marker.

References to International Standards should be replaced by references to Australian or Australian/New Zealand Standards, as follows:

<i>Reference to International Standard</i>		<i>Australian/New Zealand Standard</i>

Only normative references that have been adopted as Australian or Australian/New Zealand Standards have been listed.

The terms ‘normative’ and ‘informative’ have been used in this Standard to define the application of the annex or appendix to which they apply. A ‘normative’ annex or appendix is an integral part of a Standard, whereas an ‘informative’ annex or appendix is only for information and guidance.
