AS IEC 61131.3:2014 IEC 61131-3, Ed. 3.0 (2013)

Programmable controllers

Part 3: Programming languages

This is a free page sample. Access the full version online.

This Australian Standard® was prepared by Committee IT-006, Industrial Process Measurement, Control and Automation. It was approved on behalf of the Council of Standards Australia on 14 November 2014. This Standard was published on 19 December 2014.

The following are represented on Committee IT-006:

- Australian Computer Society
- Australian Industry Group
- Australian Petroleum Production and Exploration Association
- Australian Safety Critical Systems Association
- Consult Australia
- Engineers Australia
- Institute of Chemical Engineers Australia
- Institute of Instrumentation, Control and Automation Australia
- ISACA
- Process Control Society
- University of Queensland
- Workplace Health and Safety Queensland

This Standard was issued in draft form for comment as DR AS IEC 61131.3:2014.

Standards Australia wishes to acknowledge the participation of the expert individuals that contributed to the development of this Standard through their representation on the Committee and through the public comment period.

Keeping Standards up-to-date

Australian Standards® are living documents that reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued.

Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments that may have been published since the Standard was published.

Detailed information about Australian Standards, drafts, amendments and new projects can be found by visiting www.standards.org.au

Standards Australia welcomes suggestions for improvements, and encourages readers to notify us immediately of any apparent inaccuracies or ambiguities. Contact us via email at mail@standards.org.au, or write to Standards Australia, GPO Box 476, Sydney, NSW 2001.

Australian Standard®

Programmable controllers

Part 3: Programming languages

Originated as AS 4168.3—1994. Previous edition AS IEC 61131.3—2004. Second edition 2014.

PREFACE

This Standard was prepared by the Standards Australia Committee IT-006, Industrial Process Measurement, Control and Automation, to supersede AS IEC 61131.3—2004.

The objective of this Standard is to specify syntax and semantics of programming languages for programmable controllers as defined in AS IEC 61131.1.

This Standard should be read in conjunction with the other parts of the AS IEC 61131 series.

This Standard is identical with, and has been reproduced from, IEC 61131-3, Ed. 3.0 (2013), *Programmable controllers*—Part 3: *Programming languages*.

This edition is a fully compatible extension of the previous (2004) edition. The main extensions are new data types and conversion functions, references, name spaces and the object oriented features of classes and function blocks. For further details, see Annex B.

As this Standard is reproduced from an International Standard, the following applies:

(a) In the source text 'this part of IEC 61131' should read 'this Australian Standard'.

(b) A full point substitutes for a comma when referring to a decimal marker.

References to International Standards should be replaced by references to Australian or Australian/New Zealand Standards, as follows:

Reference to International Standard			Australian Standard		
IEC		AS IEC			
61131	Programmable controllers	61131	Programmable controllers		
61131-1	Part 1: General information	61131.1	Part 1: General information		
61131-5	Part 5: Communications	61131.5	Part 5: Communications		

Only normative references that have been adopted as Australian or Australian/New Zealand Standards have been listed.

The terms 'normative' and 'informative' are used to define the application of the annex to which they apply. A normative annex is an integral part of a standard, whereas an informative annex is only for information and guidance.
