

AS 1391—2007
(Incorporating Amendment No. 1)
Reconfirmed 2017

AS 1391—2007

Australian Standard[®]

**Metallic materials—Tensile testing at
ambient temperature**

This Australian Standard® was prepared by Committee MT-006, Mechanical Testing of Metals. It was approved on behalf of the Council of Standards Australia on 7 May 2007. This Standard was published on 12 July 2007.

The following are represented on Committee MT-006:

- Bureau of Steel Manufacturers of Australia
 - Materials Australia
 - National Association of Testing Authorities
 - National Measurement Institute
-

This Standard was issued in draft form for comment as DR 06728.

Standards Australia wishes to acknowledge the participation of the expert individuals that contributed to the development of this Standard through their representation on the Committee and through the public comment period.

Keeping Standards up-to-date

Australian Standards® are living documents that reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued.

Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments that may have been published since the Standard was published.

Detailed information about Australian Standards, drafts, amendments and new projects can be found by visiting www.standards.org.au

Standards Australia welcomes suggestions for improvements, and encourages readers to notify us immediately of any apparent inaccuracies or ambiguities. Contact us via email at mail@standards.org.au, or write to Standards Australia, GPO Box 476, Sydney, NSW 2001.

AS 1391—2007 (Reconfirmed) 2017-03-31

STANDARDS AUSTRALIA

RECONFIRMATION

OF

AS 1391—2007

Metallic materials—Tensile testing at ambient temperature
