

Australian/New Zealand Standard™

Powertrack systems

Part 1: General requirements (IEC 61534-1, Ed. 1 (2003) MOD)

AS/NZS 61534.1:2008

This Joint Australian/New Zealand Standard was prepared by Joint Technical Committee EL-004, Electrical Accessories. It was approved on behalf of the Council of Standards Australia on 28 December 2007 and on behalf of the Council of Standards New Zealand on 18 January 2008.
This Standard was published on 12 March 2008.

The following are represented on Committee EL-004:

Australasian Railway Association
Australian Chamber of Commerce and Industry
Australian Electrical and Electronic Manufacturers Association
Australian Information Industry Association
Canterbury Manufacturers Association, New Zealand
Consumer Electronics Suppliers Association
Consumers Federation of Australia
Electrical Compliance Testing Association
Electrical Regulatory Authorities Council
Energy Networks Association
Ministry of Consumer Affairs, New Zealand
Plastics Industry Pipe Association of Australia
Telarc New Zealand
Testing Interests, Australia

Keeping Standards up-to-date

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about joint Australian/New Zealand Standards can be found by visiting the Standards Web Shop at www.standards.com.au or Standards New Zealand web site at www.standards.co.nz and looking up the relevant Standard in the on-line catalogue.

Alternatively, both organizations publish an annual printed Catalogue with full details of all current Standards. For more frequent listings or notification of revisions, amendments and withdrawals, Standards Australia and Standards New Zealand offer a number of update options. For information about these services, users should contact their respective national Standards organization.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Please address your comments to the Chief Executive of either Standards Australia or Standards New Zealand at the address shown on the back cover.

This Standard was issued in draft form for comment as DR 07414.

PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee EL-004, Electrical Accessories.

The objective of this Standard is to provide designers, manufacturers, importers, test laboratories and users with requirements for powertrack systems.

This Standard is an adoption with national modifications and has been reproduced from IEC 61534-1, Ed.1 (2003), *Powertrack systems – Part 1: General requirements*, and has been varied as indicated to take account of Australian/New Zealand conditions.

Variations to IEC 61534-1, Ed.1 (2003) are indicated at the appropriate places throughout this Standard. Strikethrough (~~example~~) identifies IEC text, tables and figures which, for the purposes of this Australian/New Zealand Standard, are deleted. Where text, tables or figures are added, each is set in its proper place and identified by shading (example). Added figures are not themselves shaded, but are identified by a shaded border.

As this Standard is reproduced from an International Standard, the following applies:

- (a) Its number does not appear on each page of text and its identity is shown only on the cover and title page.
- (b) In the source text 'IEC 61534-1' should read 'AS/NZS 61534.1'.
- (c) A full point should be substituted for a comma when referring to a decimal marker.

The terms 'normative' and 'informative' are used to define the application of the annex to which they apply. A normative annex is an integral part of a standard, whereas an informative annex is only for information and guidance.

CONTENTS

	<i>Page</i>
1 Scope	1
2 Normative references	1
3 Terms and definitions	4
4 General requirements	9
5 General notes on tests	9
6 Ratings	9
7 Classification	10
8 Marking and documentation	11
9 Construction	13
10 Clearances, creepage distances and solid insulation	16
10.1 Clearances	16
10.1.1 Clearances for basic insulation	17
10.1.2 Clearances for functional insulation	17
10.1.3 Clearances for supplementary insulation	17
10.1.4 Clearances for reinforced insulation	18
10.2 Creepage distances	18
10.2.1 Creepage distances for basic insulation	18
10.2.2 Creepage distances for functional insulation	19
10.2.3 Creepage distances for supplementary insulation	19
10.2.4 Creepage distances for reinforced insulation	19
10.3 Solid insulation	19
11 Protection against electric shock	20
11.1 Access to live parts	20
11.2 Provision for earthing	21
11.3 Effectiveness of protective circuit continuity	21
12 Terminals and terminations	21
13 Screws, current carrying parts and connections	24
14 Mechanical strength	26
14.1 Impact test	26
14.2 Static load test	27
15 Insulation resistance test and dielectric strength test	28
15.1 Humidity treatment	28
15.2 Insulation resistance test	29
15.2.1 Test for functional insulation	29
15.2.2 Test for basic insulation, supplementary insulation and reinforced insulation	29
15.3 Dielectric strength test	29
16 Normal operation	30
17 Temperature rise	31
18 Resistance to heat	34
19 Fire hazard	35
19.1 Flammability	35
19.2 Flame spread	35
