

Australian Standard™

Lifts, escalators, and moving walks

Part 15: Low-rise passenger lifts—Non-automatically controlled

This Australian Standard was prepared by Committee ME-004, Lift Installations. It was approved on behalf of the Council of Standards Australia on 29 March 2002 and published on 18 April 2002.

The following interests are represented on Committee ME-004:

Association of Consultants in Access Australia
Association of Consulting Engineers Australia
Association of Independent Lift Companies
Australian Building Codes Board
Australian Chamber of Commerce and Industry
Australian Elevator Association
Australian Industry Group
Department for Administrative and Information Services (SA)
Department of Industrial Relations (Qld)
Department of Industries and Business NT
Department of Infrastructure, Energy and Resources (Tasmania)
Institution of Engineers Australia
Lift Engineering Society of Australia
NSW Department of Public Works and Services
New Zealand Lift and Escalator Association
Property Council of Australia
Technical Aid to the Disabled
Victorian WorkCover Authority
WorkCover New South Wales
WorkSafe Western Australia

Keeping Standards up-to-date

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about Standards can be found by visiting the Standards Australia web site at www.standards.com.au and looking up the relevant Standard in the on-line catalogue.

Alternatively, the printed Catalogue provides information current at 1 January each year, and the monthly magazine, *The Australian Standard*, has a full listing of revisions and amendments published each month.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Contact us via email at mail@standards.com.au, or write to the Chief Executive, Standards Australia International Ltd, GPO Box 5420, Sydney, NSW 2001.

PREFACE

This Standard was prepared by the Australian/New Zealand members of the joint Standards Australia/Standards New Zealand committee ME-004, Lift Installations, to supersede AS 1735.15—1990.

After consultation with stakeholders in both countries, Standards Australia and Standards New Zealand decided to develop this Standard as an Australian Standard rather than an Australian/New Zealand Standard.

The objective of this Standard is to provide requirements for non-automatically controlled low-speed lifts intended to be used primarily by people with limited mobility.

This Standard is one of a series of Standards covering lifting devices which are able to assist persons with limited mobility. Other Standards in the series are as follows:

AS

- 1735 Lifts, escalators and moving walks
- 1735.2 Part 2: Passenger and goods lifts—Electric
- 1735.3 Part 3: Passenger and goods lifts—Electrohydraulic
- 1735.7 Part 7: Stairway lifts
- 1735.12 Part 12: Facilities for persons with disabilities
- 1735.13 Part 13: Lifts for persons with limited mobility—Manually powered
- 1735.14 Part 14: Low-rise platforms for passengers
- 1735.16 Part 16: Lifts for persons with limited mobility—Restricted use—Automatically controlled
- 1735.17 Part 17: Lifts for people with limited mobility—Restricted use—Water-drive
- 1735.18 Part 18: Passenger lifts for private residence—Automatically controlled

The term 'informative' has been used in this Standard to define the application of the appendix to which they apply. An 'informative' appendix is only for information and guidance.
