

Australian Standard[®]

**Medical gas systems—Installation and
testing of non-flammable medical gas
pipeline systems**

This Australian Standard® was prepared by Committee HE-017, Medical Gas Systems. It was approved on behalf of the Council of Standards Australia on 13 January 2011. This Standard was published on 8 February 2011.

The following are represented on Committee HE-017:

- Australian Chamber of Commerce and Industry
 - Australian Industry Group
 - Australian Society of Anaesthetists
 - Australian and New Zealand College of Anaesthetists
 - Master Plumbers and Mechanical Contractors Association of New South Wales
 - Therapeutic Goods Administration
-

This Standard was issued in draft form for comment as DR AS 2896.

Standards Australia wishes to acknowledge the participation of the expert individuals that contributed to the development of this Standard through their representation on the Committee and through the public comment period.

Keeping Standards up-to-date

Australian Standards® are living documents that reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued.

Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments that may have been published since the Standard was published.

Detailed information about Australian Standards, drafts, amendments and new projects can be found by visiting **www.standards.org.au**

Standards Australia welcomes suggestions for improvements, and encourages readers to notify us immediately of any apparent inaccuracies or ambiguities. Contact us via email at **mail@standards.org.au**, or write to Standards Australia, GPO Box 476, Sydney, NSW 2001.

AS 2896—2011

Australian Standard[®]

Medical gas systems—Installation and testing of non-flammable medical gas pipeline systems

Originated as part of AS CZ9—1963.
Previous edition AS 2896—1998.
Fourth edition 2011.

PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee HE-017, Medical Gas Systems, to supersede AS 2896—1998. After consultation with stakeholders in both countries, Standards Australia and Standards New Zealand decided to develop this Standard as an Australian Standard rather than an Australian/New Zealand Standard.

It should be noted that for installation of a pipeline, a high quality of workmanship and experience is essential. For medical gases that are not referenced in Clause 1.2, special pipeline designs may be required, and these are not covered by this Standard. For certain situations, e.g. hyperbaric conditions, special design and performance criteria for pipelines may be required.

Requirements in this Standard may be used as a guide for piping systems for other non-flammable medical gases and anaesthetic gas scavenging systems but variations in the requirements may be necessary.

The Sleeve Indexing System (SIS) for gas specific connections for terminal units previously in the Standard is now covered by AS 2902—2005, including connections for surgical tool gas along with other gases. The new surgical tool gas connection is recommended as it contains a thread, and reduces the risk of ‘hose whip’. The use of adaptors with ‘quick connect/disconnect’ (Schrader) fittings does not comply with this Standard.

In the preparation of this Standard, cognizance was taken of ISO 7396:2007 *Medical gas pipeline systems—Part 1: Pipeline systems for compressed medical gases and vacuum*.

The differences between ISO 7396 and this Standard are as follows:

- (a) Testing procedures in this edition are more in keeping with Australian industry practice.
- (b) Performance criteria vary substantially.
- (c) Copper pipe specifications differ.
- (d) Medical participation in commissioning is required by AS 2896.

All medical oxygen cylinder valve outlets will be yoke type connections after 2011. Flexible cylinder leads will be replaced as part of this program. See AS 2473.3—2007 for details.

The terms ‘normative’ and ‘informative’ have been used in this Standard to define the application of the Appendix to which they apply. A ‘normative’ Appendix is an integral part of a Standard, whereas an ‘informative’ Appendix is only for information and guidance.

CONTENTS

	<i>Page</i>
FOREWORD.....	5
 SECTION 1 SCOPE AND GENERAL	
1.1 SCOPE	6
1.2 APPLICATION	6
1.3 REFERENCED DOCUMENTS	7
1.4 DEFINITIONS	7
 SECTION 2 SOURCE OF SUPPLY	
2.1 GENERAL	11
2.2 SOURCE OF SUPPLY	11
2.3 PROVISION IN CASE OF FAILURE OF SUPPLY	11
2.4 CYLINDER SUPPLY SYSTEM	12
2.5 PRESSURE REGULATORS	16
2.6 DESIGN OF GAS CONTROL SYSTEMS	16
2.7 PRESSURE RELIEF VALVES	17
2.8 CRYOGENIC SYSTEMS	17
2.9 MEDICAL AIR SYSTEM	18
2.10 MEDICAL SUCTION SYSTEMS	29
2.11 AIR FOR SURGICAL TOOLS	34
2.12 LOCATIONS OF SOURCES OF GAS SUPPLY	36
2.13 ENCLOSURES FOR CYLINDER SUPPLY SYSTEMS	36
 SECTION 3 GENERAL REQUIREMENTS	
3.1 ALARM SYSTEMS	39
3.2 MATERIALS	43
3.3 REQUIREMENTS FOR PIPELINES	44
3.4 PIPELINE SHUT-OFF VALVES	45
3.5 TERMINAL UNITS AND CONNECTORS	46
3.6 IDENTIFICATION OF PIPELINES	50
3.7 PRESSURE GAUGES	51
 SECTION 4 INSTALLATION REQUIREMENTS FOR PIPELINES	
4.1 GENERAL	54
4.2 ELECTRICAL SEGREGATION	54
4.3 PROTECTION OF PIPELINES	54
4.4 MEDICAL GAS RISERS	56
4.5 RISERS AND DROPPERS TO TERMINAL UNITS	56
4.6 SLEEVES	56
4.7 CONTACT WITH CORROSIVE MATERIALS	56
4.8 ROUTING	56
4.9 CUTTING INTO AN EXISTING SYSTEM	56
4.10 INTERCONNECTION	56
4.11 PIPELINE SUPPORTS	56
4.12 COPPER PIPELINE JOINTS	57
4.13 CONNECTION TO EXISTING SYSTEMS	58
4.14 FIXED SECONDARY EQUIPMENT	58
