Australian/New Zealand Standard™

**Generic cabling systems for data centres**

## **AS/NZS ISO/IEC 24764:2012**

This Joint Australian/New Zealand Standard was prepared by Joint Technical Committee CT-001, Communications Cabling. It was approved on behalf of the Council of Standards Australia on 11 October 2011 and on behalf of the Council of Standards New Zealand on 19 December 2011.

This Standard was published on 25 January 2012.

---

The following are represented on Committee CT-001:

Australian Chamber of Commerce and Industry  
Australian Communications and Electrical Alliance  
Australian Communications and Media Authority  
Australian Industry Group  
Australian Information Industry Association  
Australian Telecommunications Users Group  
BICSI Australia  
Communications Alliance  
Consulting Interests, New Zealand  
Electrical and Communications Association, Qld  
Electrical Compliance Testing Association  
Electrical Regulatory Authorities Council  
Electrical Trades Union  
Energy Networks Association  
Engineers Australia  
National Electrical and Communications Association  
New Zealand Consulting Interests  
New Zealand Defence Force  
Telecommunications Interests  
Vendor Interests, New Zealand

### **Keeping Standards up-to-date**

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about joint Australian/New Zealand Standards can be found by visiting the Standards Web Shop at [www.saiglobal.com.au](http://www.saiglobal.com.au) or Standards New Zealand web site at [www.standards.co.nz](http://www.standards.co.nz) and looking up the relevant Standard in the on-line catalogue.

For more frequent listings or notification of revisions, amendments and withdrawals, Standards Australia and Standards New Zealand offer a number of update options. For information about these services, users should contact their respective national Standards organization.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Please address your comments to the Chief Executive of either Standards Australia or Standards New Zealand at the address shown on the back cover.

## PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee CT-001, Communications Cabling.

The objective of this Standard is to specify generic cabling that supports a wide range of communications services for use within the data centre. It covers balanced cabling and optical fibre cabling.

This Standard is identical with, and has been reproduced from ISO/IEC 24764:2010, *Information technology—Generic cabling systems for data centres*.

As this Standard is reproduced from an International Standard, the following applies:

- (a) Its number appears on the cover and title page while the international standard number appears only on the cover.
- (b) In the source text ‘this International Standard’ should read ‘this Australian/New Zealand Standard’.
- (c) A full point substitutes for a comma when referring to a decimal marker.

References to International Standards should be replaced by references to Australian or Australian/New Zealand Standards, as follows:

<i>Reference to International Standard</i>	<i>Australian/New Zealand Standard</i>
ISO/IEC	AS/NZS
11801 Information technology—Generic cabling systems for data centres	3080 Telecommunications installations—Generic cabling for commercial premises (ISO/IEC 11801:2002, MOD)
	AS/NZS ISO/IEC
14763 Information technology—Implementation and operation of customer premises cabling	14763 Telecommunications installations—Implementation and operation of customer premises cabling
14763-3 Part 3: Testing of optical fibre cabling	14763.3 Part 3: Testing of optical fibre cabling
	AS/NZS IEC
61935 Testing of balanced communication cabling in accordance with ISO/IEC 11801	61935 Testing of balanced communication cabling in accordance with ISO/IEC 11801
61935-1 Part 1: Installed cabling	61935.1 Part 1: Installed cabling

Only international references that have been adopted as Australian or Australian/New Zealand Standards have been listed.

The terms ‘normative’ and ‘informative’ have been used in this Standard to define the application of the appendix to which they apply. A ‘normative’ appendix is an integral part of a Standard, whereas an ‘informative’ appendix is only for information and guidance.

CONTENTS

1 Scope.....8

2 Normative references .....8

3 Terms and definitions and abbreviations.....10

    3.1 Terms and definitions .....10

    3.2 Abbreviations .....11

4 Conformance.....11

5 Structure of the generic cabling system .....12

    5.1 General.....12

    5.2 Functional elements .....12

    5.3 General structure and hierarchy .....13

    5.4 Cabling subsystems .....14

        5.4.1 General .....14

        5.4.2 Network access cabling subsystem.....14

        5.4.3 Main distribution cabling subsystem .....14

        5.4.4 Zone distribution cabling subsystem .....15

        5.4.5 Design objectives .....15

    5.5 Accommodation of functional elements.....15

    5.6 Interfaces .....16

        5.6.1 Equipment interfaces and test interfaces .....16

        5.6.2 Channels and links .....16

    5.7 Dimensioning and configuring.....18

        5.7.1 Distributors.....18

        5.7.2 Redundancy .....18

        5.7.3 External network interface .....19

        5.7.4 Cables.....20

        5.7.5 Equipment cords.....20

        5.7.6 Patch cords and jumpers .....20

        5.7.7 Equipment outlets.....20

        5.7.8 LDP.....20

        5.7.9 Building entrance facilities.....21

    5.8 Earthing and equipotential bonding .....21

6 Channel performance .....21

    6.1 General.....21

    6.2 Transmission performance .....22

        6.2.1 General .....22

        6.2.2 Balanced cabling .....22

        6.2.3 Optical fibre cabling.....22

7 Reference implementations .....22

    7.1 General.....22

    7.2 Balanced cabling.....23

        7.2.1 Assumptions.....23

        7.2.2 Zone distribution cabling.....23

        7.2.3 Main distribution cabling.....26

        7.2.4 Network access cabling .....28
