

AS 4200.2:2017
(Incorporating Amendment Nos 1 and 2)

AS 4200.2:2017

Pliable building membranes and underlays

Part 2: Installation

This Australian Standard® was prepared by Committee BD-058, Thermal Insulation. It was approved on behalf of the Council of Standards Australia on 27 September 2016. This Standard was published on 2 May 2017.

The following are represented on Committee BD-058:

- Aluminium Foil Insulation Association
 - Australasian Fire and Emergency Service Authorities Council
 - Australian Building Codes Board
 - Australian Cellulose Insulation Manufacturers Association
 - Australian Professional Thermography Association
 - Community Energy Network
 - Consumers Federation of Australia
 - Council of Textile and Fashion Industries of Australia
 - CSIRO
 - Curtin University of Technology
 - Electrical Regulatory Authorities Council
 - Housing Industry Association
 - Insulation Australasia
 - Insulation Contractors Association of Australia NSW
 - Insulation Council of Australia and New Zealand
 - Master Builders Australia
 - Plastics and Chemicals Industries Association
 - Pliable Membranes Association of Australia and New Zealand
 - Polyester Insulation Manufacturers Association
 - Recessed Luminaire Enclosure Association of Australia
-

This Standard was issued in draft form for comment as DR AS 4200.2:2015.

Standards Australia wishes to acknowledge the participation of the expert individuals that contributed to the development of this Standard through their representation on the Committee and through the public comment period.

Keeping Standards up-to-date

Australian Standards® are living documents that reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued.

Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments that may have been published since the Standard was published.

Detailed information about Australian Standards, drafts, amendments and new projects can be found by visiting **www.standards.org.au**

Standards Australia welcomes suggestions for improvements, and encourages readers to notify us immediately of any apparent inaccuracies or ambiguities. Contact us via email at **mail@standards.org.au**, or write to Standards Australia, GPO Box 476, Sydney, NSW 2001.

AS 4200.2:2017
(Incorporating Amendment Nos 1 and 2)

Australian Standard[®]

Pliable building membranes and underlays

Part 2: Installation

Originated in Australia as part of AS CA22—1965.
Previous edition AS/NZS 4200.2:1994.
Third edition revised and designated AS 4200.2:2017.
Reissued incorporating Amendment No. 1 (June 2018).
Reissued incorporating Amendment No. 2 (June 2021).

PREFACE

This Standard was prepared by the Australian members of Joint Standards Australia/Standards New Zealand Committee BD-058, Thermal Insulation, to supersede AS/NZS 4200.2:1994, *Pliable building membranes and underlays, Part 2: Installation requirements*.

This Standard incorporates Amendment No. 1 (June 2018) and No. 2 (June 2021). The changes required by the Amendment are indicated in the text by a marginal bar and amendment number against the clause, note, table, figure or part thereof affected.

After consultation with stakeholders in both countries, Standards Australia and Standards New Zealand decided to develop this Standard as an Australian Standard rather than an Australian/New Zealand Standard.

The objective of this revision is to specify procedures for the installation of pliable building membranes in buildings that are consistent with good building practice. The requirements for installation have been compiled from a wide range of procedures used in Australia and considered as good practice in the installation of pliable building membranes.

A2

This Standard is intended to be read in conjunction with AS 4200.1, *Pliable building membranes and underlays, Part 1: Materials*.

The term ‘informative’ has been used in this Standard to define the application of the appendix to which it applies. An ‘informative’ appendix is only for information and guidance.

This Standard incorporates a Commentary on some Clauses. The Commentary directly follows the relevant clause, is designated by ‘C’ preceding the clause number and is printed in italics in a panel. The Commentary is intended to help readers understand the background to the clause but does not form part of the clause.

CONTENTS
